

Capability Statement

WHO IS ISR ECO

Since 2018, IserEco has been a distributor and supplier of environmentally sustainable solutions to treat organically contaminated raw water with **(SEBS)** and providing **GREEN** janitorial cleaning products to industrial end users. Our company has the capability to ship quantities by the gallon, 5-gallon pail, 55-gallon drum, and 256-gallon tote monthly, quarterly, or annually for any clients.

CORE COMPETENCIES

Specific Enzyme Bacteria System (SEBS)

- Create customized (SEBS) solutions.
- Prepare certified lab reports sent to the client for verification.
- **Applications include** agricultural resolution stemming from organic wastewater, industrial, municipal, and commercial processing plants, and public facilities.

GREEN Janitorial Cleaning Products

- **Plant Based – GREEN** products for private and public sector applications including commercial, private, public institutions, and the transit industry.

PAST EXPERIENCES

The City of SeaTac WA Facilities Maintenance Community Programs & Services 2023, used (SEBS) Grease Trap maintenance product for approximately two months resulting in the eradication of a foul odor and the release of trap blockage in their commercial kitchen facility.

DIFFERENTIATORS

- In-house lab to identify and analyze contaminated water
- Formulas are available in concentrated or ready-to-use.
- Our CEO managed 40 District Managers as National Sales Manager – Paltier/Lyon Metal – Michigan City IN.
- Our Chemist has over 30 years of product development and manufacturing experience.
- IserEco sources 2 manufacturing locations for plant-based, green janitorial products and (SEBS), which allows IserEco to support client product capacity needs throughout the continental USA.
- Drop ship capability ranges from shipping in 3-5 business days for a minimum of 1-3 cases of (4x1 gallon) per case or 1-3 five-gallon pails per order to 14 business days on full pallets of (4x1 gallon) cases, five-gallon pails, 55-gallon drums or 256-gallon totes per order.
