Contents.

- 01 Exploring Themes on Aquatic Toxicology**
- 02 Thermal Analysis Applied to Complex Systems: Slags, Glasses and Ceramics**
- 03 The Mechanics of Faulting: From Laboratory to Real Earthquakes**
- 04 Educational Testing and Evaluation**
- 05 Guidance: Principles and Procedures**
- 06 Medicinal Plants as Antioxidant Agents: Understanding Their Mechanism of Action and Therapeutic Efficacy**
- 07 Noise Control: Theory, Application and Optimization in Engineering**
- 08 The Lower Extremity Wounds**
- 09 Cellulose and Other Naturally Occurring Polymers**
- 10 Host-Pathogen Interaction: At the Frontier of Cellular Microbiology**
- 11 Carbohydrates Applications in Medicine**
- 12 Estrogens and Cognition. Psychobiological and Clinical Aspects**

Contents.

- 13 EM Shielding – Theory and Development of New Materials**
- 14 Medicinal Chemistry in Drug Discovery: Design, Synthesis and Screening**
- 15 Strategic Organizational Planning and Management: An Introduction**
- 16 Impact of Climate Change on Natural Resources and Community Livelihoods in Tanzania**
- 17 Biomass Conversion Technology for Renewable Energy Generation: Analysis, Selection and Testing**
- 18 Advances in Ocular Drug Delivery**
- 19 Plant Based Medicines**
- 20 Iron and Ascorbic Acid Contents of Selected Green Leafy Vegetables**
- 21 Production and Characterization of Polyhydroxybutyrate by *Bacillus licheniformis* Using Sago Starch Medium**
- 22 Advances in Pharmaceutical Sciences III**

Contents.

- 23 Advances in Pharmaceutical Sciences II**
- 24 Advances in Pharmaceutical Sciences IV**
- 25 Recent Advances in Pharmaceutical Sciences VI**
- 26 Handbook of Medicinal Plants and their Bioactive Compounds**
- 27 Evaluation of Electrochemical Reactors as a New Way to Environmental Protection**
- 28 Molecular Aspects of Inflammation**
- 29 Advanced Research in Electronics for Biomedical Applications**
- 30 Biochemistry, Molecular Biology and Molecular Genetics of Genetic Disorders**
- 31 Monte Carlo Simulation of an Anthropomorphic Beating Heart: Application of Geant4 for Cardiac SPECT Imaging**
- 32 Research Trends in Molecular Biology**
- 33 Key Techniques for Ultrahigh Performance Sintered Nd-Fe-B Magnets Preparation**

Contents.

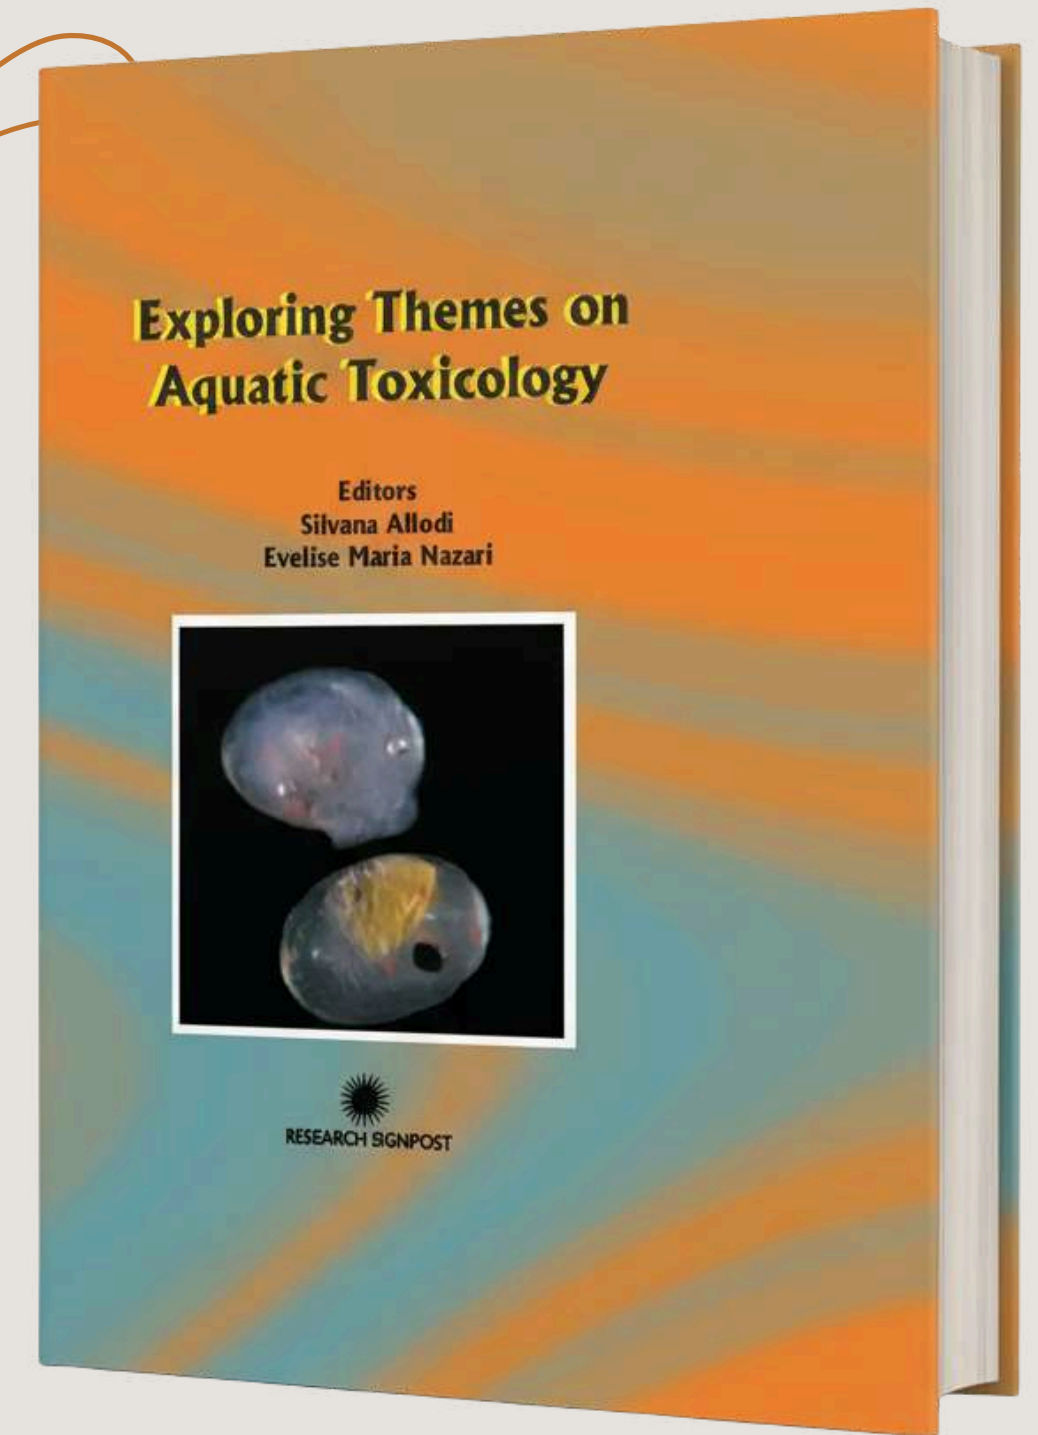

- 34 Escherichia coli and Bacillus subtilis: The Frontiers of Molecular Microbiology Revisited**
- 35 Nanotechnology in Progress: Pharmaceutical Applications**
- 36 Toxic Effects of Chemicals in Food, Chemical and Consumer Product Safety**
- 37 Advances in the II-VI Compounds Suitable for Solar Cell Applications**
- 38 Recent Advances in Carbohydrate Polymer Research**
- 39 Understanding the Dynamics of Emerging and Re-Emerging Infectious Diseases Using Mathematical Models**
- 40 Efficiency Theories and Their Applicability in Nigerian Secondary Schools**
- 41 Chemical Evolution vs Biological Evolution: Coupling Effect and Consequences**
- 42 Nitric Oxide Synthase Inhibitors: From Animal Studies to Clinical Implications**
- 43 Topical Series in Health Science 1 (TSHS-1)**
- 44 Frontiers in Nanoscience for Biomedical Research**
- 45 Hydrodynamics of Fish Farming Net Cage**

Exploring Themes on Aquatic Toxicology
