

EcoMist™

HUMIDIFICATION SYSTEM

A high-quality nozzle assembly that mixes water and compressed air through an atomiser to produce a vapour-like mist.

A reliable and efficient solution available to replace humidification systems in almost any setter or hatcher. Supplied as a complete machine kit or just the nozzle, with a self-cleaning version available on request.

NO MORE BLOCKED NOZZLES

- Air and water operated.
- System uses a potable water supply.
- Constructed using high quality stainless steel.
- Non-drip stop valve.
- Adjustable balance.
- Uses 50% less water and 30% less air compared to other spray humidifiers.
- Delivers 5.5 l/h @ 2.2 bar air pressure.
