

Turn-Plus™ System

FOR CLASSIC MULTI-STAGE

Get your angles right at every turn . . . with the Turn-Plus.

TURNING
ANGLES
MATTER!

- Angles are consistent and correct from set to transfer, guaranteeing optimum airflow throughout the incubator.
- Distributed turning ensures uniformity and correct embryo agitation.
- Various control systems available depending on compatibility, or the Turn-Plus independent controller that is suitable for any machine.
- The simplest turning mechanism in multi-stage incubation.
