The beach is a wonderful place to enjoy,

DID YOU KNOW?

Disposable BBQs get very hot and can burn the sand and start fires.

Burying BBQs in the sand can trap the heat and harm wildlife.

Rubbish and glass can start fires in the sun.

Fires can damage dunes, plants and wildlife homes.

If there is a fire, tell an adult and call 999.

✓ GOOD CHOICES

DUNES ARE ALIVE!

Our sand dunes protect our coast and are home to amazing plants and animals.

Let's look after them so they can keep looking after us!

Daisy

Monty

Dunes might look like just sand, but they are very special!

Join Daisy, Kylo and Monty to discover why dunes are so important and how we can protect them for the future.

WHY DUNES MATTER

Dunes protect our homes and beaches from big waves and storms.

Plants hold the sand together and stop it blowing away.

Dunes are homes for lots of insects, birds and small animals.

Healthy dunes keep our beaches beautiful for everyone.

If we look after dunes, they will look after us!

CAN YOU SPOT AND CIRCLE THESE DUNE HABITATS?

DID YOU KNOW?

One dune plant can trap many grains of sand every year — slowly building bigger dunes over time!
