

# OUR BREEDER OATH

## LOVE

We truly love our dogs, our puppies, and our clients. We are committed to changing the stigma and changing breeding from bad to badass.

## LIFETIME RESPONSIBILITY

We are committed to taking 100% responsibility for every puppy for the entirety of its life and provide a minimum 2-year contract/warranty.

## PARENT STANDARDS

We promise to breed only health and temperament tested parents and to choose breeding pairs that accentuate and complement one another in these areas.

## PLANNED LITTERS

We promise to never contribute to overpopulation by being selective in our breeding pairs and always strive to improve our lines.

## PUPPY EVALUATIONS

We promise to evaluate puppies at 49 days or older and provide information to clients to ensure the best match is made. We promise to only let clients choose a puppy after they have reviewed all veterinary and BaB temperament records and videos so that they choose a puppy that best meets both their and the puppy's needs. We will guide and assist to ensure our puppies' voices are heard.

## MISSION

We promise to stay true to the reason why we started breeding. Healing hearts and changing lives through the power of a dog is a gift and our avenue to truly help others.

## CLIENT COMMUNITY

We are committed to educating clients, both new and experienced, to building a cohesive, active community and we are open to feedback, both positive and negative.

## PARENT CARE

We promise to honor and respect our dams and sires and to keep them healthy and happy. We will always provide a safe and enriching environment, high-quality veterinary care, nutrition, living quarters, and lots of love.

## PUPPY CURRICULUM

We promise to provide a structured curriculum to ensure our puppies learn that the world is safe, people are kind, and dogs are friendly.

## PUPPY DEVELOPMENT

We promise to guide, shape, and mold puppies based upon critical learning periods, constantly evaluating and adjusting to strengthen confidence, nerve strength, and the ability to believe in their own abilities. We will empower and not enable our puppies.
