

**TANK PROTECTION PLAN
TERMS AND CONDITIONS**

Please read the provisions below to clearly understand your tank protection plan qualifications and exclusions.

SERVICES INCLUDED IN TANK PROTECTION: Our tank protection plan includes replacement of your leaking tank so be that the tank has no prior leaking and has not been repaired. All tanks must be inspected prior to enrollment in the tank protection program. The replacement includes a free replacement of a leaking tank of equal size up to 330 gallon capacity. This plan covers above-ground tanks that are indoors or outdoors. The replacement includes oil tank replacement, labor, and removal. In order to receive your tank replacement, you must be in good credit standing at time of replacement. Ron's Fuel will install a new oil tank if and when your above-ground oil tank is verified to be leaking at the time so long you are covered by the tank protection program. Additionally, this program does not cover emergency response costs in the event of a leak.

SERVICES NOT INCLUDED IN TANK PROTECTION: Our tank protection plan does not include cement pads, permit fees, disposal of tank or environmental costs. Tanks which are leaking prior to enrollment or have been repaired are not eligible. Underground or partially underground tanks and tank over 330 gallons in capacity are also excluded from this program. The protection plan does not cover expenses related to clean-up or remediation of environmental impact costs.

DISCLAIMER: Any cost, expense or governmental order that arises out of a fuel oil release, seepage, migration, or escape that requires clean up , removal, containment, treatment, monitoring, or detoxifying is not provided under our tank protection plan whether caused by the tank or any other source including any resulting in bodily injury or property damage.
