WEIGHTS EXPLAINED

Gross Combined Mass (GCM)

The combined weight of the towing vehicle and any trailer while coupled together.

Gross Vehicle Mass (GVM)

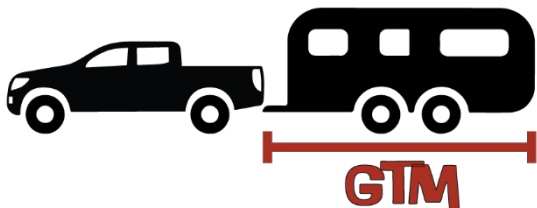

The weight transferred to the ground through the wheels of a fully loaded vehicle. Including the trailer attached if towing to ensure weight transferred through the tow hitch is included in calculations.

Tow Ball Mass (TBM)

The weight imposed on the tow vehicle's tow hitch (ball or other type) by the coupling of the trailer onto the tow bar.

Recommended to be 8 – 12% of ATM.

Gross Trailer Mass (GTM)

The weight transferred to the ground by the wheels of the trailer when coupled to a vehicle.

Aggregate Trailer Mass (ATM)

The weight of the loaded trailer including the tow ball weight.
