Notice from Concrete Contractor (Aug 18 2026)

Please do not move cones and drive into your driveways before the concrete has had time to cure.

The concrete workers will move the cones from the driveways and that will be the cue that you can pull in.

If the concrete cracks, the contractor will NOT be replacing it. Further, someone stepped in fresh concrete yesterday and it has to be removed and replaced again. If in doubt, please stay off the concrete.

Thank you for your consideration.
