

Capabilities Statement

Lisa Evans HealthCare Solutions & Staffing provides executive-level healthcare operations consulting to medical and behavioral health organizations operating within complex public payer and managed care environments.

Core Capabilities

Healthcare operations consulting supporting organizations across Medicare, Medicaid, LTSS, HCBS waivers, and integrated care models. Expertise includes practice startup development, claims and revenue cycle operations, regulatory compliance, and value-based care readiness.

Practice Startup & Organizational Development

End-to-end practice startup consulting, including regulatory readiness, payer and managed care alignment, credentialing workflows, governance structures, and operational infrastructure development designed for participation in public payer and value-based reimbursement environments.

Managed Care & Government Program Alignment

Strategic support for organizations operating within managed care and government programs, including policy interpretation, compliance oversight, audit readiness, and administrative systems alignment supporting value-based and dual-eligible models.

LTSS & HCBS Operational Consulting

Operational solutions supporting Long Term Services and Supports (LTSS) and Home- and Community-Based Services (HCBS) programs, including Medicare–Medicaid policy administration, program oversight, and continuity of care frameworks.

Our Approach

A practical, compliance-driven consulting approach focused on operational sustainability, managed care performance, and high-quality service delivery across regulated healthcare systems.
