

Recovering From Behavior and Substance Addiction with EMDR Therapy

Presented by Sarah Osborne, LPC, LADC, NCC

January 16, 17, & 19, 2026 from 12pm – 4:30pm

Please join us for a live virtual training that includes small group practicum time – broken into 3 segments to decrease “zoom fatigue”

Interested in addressing substance use disorders and behavioral addictions with EMDR and getting lost in a maze of Feeling States, DeTURs and stabilization barriers? Need some direction? No worries, I’ve been down those roads and created a step by step, phase by phase, treatment map for you!

How do you learn? To accommodate a variety of learning styles, the training uses demonstration, case presentation, lecture, video clips, and practicum that explores the use of EMDR therapy in the treatment of substance use disorders and other compulsive behaviors—specifically, with clients who are not yet abstinent. This treatment focused and practical workshop teaches you how to stabilize clients and desensitize addiction memory networks without increasing risk of relapse.

Presented by Sarah Osborne, LPC, LADC, NCC

[Sarah Osborne, LPC, LADC, NCC](#) is a Licensed Professional Counselor, Licensed Alcohol and Drug Counselor, and Nationally Certified Counselor. She is a HAP Approved Facilitator, and EMDRIA Approved Consultant & Advanced Credit Provider who specializes in the treatment of addiction, complex trauma and dissociation. She has experience working in community mental health settings and private addiction treatment centers. Sarah is actively involved with integrating EMDR therapy into several addiction facilities across the levels of care. She is dedicated to promoting space for healing and wellness across diverse populations in her private EMDR practice, the work she does with first responders, and as a co-owner of a perinatal group practice. She also provides ongoing individual and group consultation to all levels of EMDR professionals and consultants-in-training.

The training material is integrated into each phase of EMDR Treatment

Goals and Objectives, participants will be able to:

1. Describe how trauma is connected to the vulnerability to addiction.
2. Explain the basic findings of the ACE (Adverse Childhood Experience) Study.
3. Identify history taking questions that can be used to assess client readiness for trauma processing
4. Identify history taking questions that can be used to assess addictions
5. Identify common resourcing needs of persons with histories of complex trauma and addiction.
6. Identify at least two addiction specific stabilization options for phase 2
7. Describe the steps involved in addressing and desensitizing cravings, urges and triggers related to behavioral/substance addictions.
8. Explain the term “maladaptive positive feeling state”
9. Identify how to address the maladaptive “positive” feelings, body sensations or irrational cognitions linked to addictions
10. Identify and describe when to address underlying trauma using Standard Protocol EMDR Therapy would be appropriate
11. Identify and describe when the use of Addictions Protocols would be appropriate
12. Identify treatment planning options and common NC/PCs related to addiction.
13. Describe how to apply EMDR therapy to address common treatment barriers.

All taught step-by-step with videos, demonstration, and practicum
