

National Crisis Intervention Training Institute

Brief Summary of Time / Financial Cost of Components of NCITI Substance Abuse Early Intervention Program

Rationale and Purpose of Program

The mission and purpose of the *Substance Abuse Early Intervention Program* is to prevent recidivism of drug abuse-related offenses committed by current [*Acronym for educational institution*] students; to better prepare and protect students of [*name of educational institution*] from the dangers of misuse and abuse of alcohol and other mood/mind altering substances; to promote student retention by lessening the likelihood that failure-promoting behaviors will be committed by students; and to accomplish the rehabilitative and restorative purpose of the criminal justice system's functions, while at the same time providing an alternative to permanent legal ramifications which would stem from a criminal conviction.

Estimation of Maximum Allowed Duration of Program (6 months) is based upon likelihood that the Court and DA's Office will require a passive monitoring period of six months prior to considering dismissal of the deferred charges. Active monitoring would be over a three-month period (estim. four hours per week total over a 12-week duration). Passive monitoring involves status check at end of six month period to confirm no repeated incidents of criminal activity or substance abuse have been reported.

** Sliding Scale can be as little as \$0.00 dollars. Court costs to be determined by Judge dismissing the case.
