Junior Ambassadeur Waste Generated Data Collection

Institution/Chapter Name:_____

Students count and where possible, weigh the contents. Students should not rummage through the bins. You can work with the auxiliary/custodian staff for this.

Date	Number of bags	Weight (Kg)	% Difference*
TOTAL	**_____ # of bags**	**_____ kg**	

* Calculate the difference in percentage each time this is done. Indicate if there is an increase with a '+' sign and where there is a decrease, use a '–' sign. For example, an increase on 10% would be written as +10%. A decrease of 12% would be written as -12%.
