

The Major Activity Happening at Clark and Vahle Center

by Oasis of Hope | June 2022

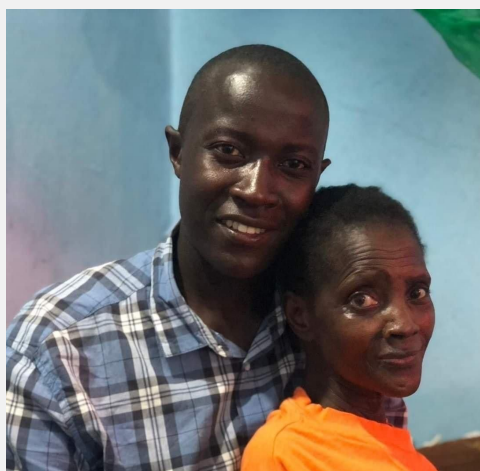

(Brian's friend, Jacob speaking here) We thank God for his love and grace to us, we experience cold weather in Kenya currently. The major activity happening at Clark and Vahle Educational Drop-In center is Saturday Bible class. We are studying the book of 1 Samuel. We appreciate how kids are eager to learn from God. They wish that every day should be Saturday!

We also hold counseling sessions mostly for teenagers and their parents. Currently, we are following up with Evans who is 17 years old, a student who is almost dropping out of school because he feels that his parents do not understand him.

We trust God that he will provide the resources for our library to be operational, most of our children do not have a place to do their homework and studies. You can donate to that [HERE](#).

Sam is one of many volunteers. We used to be in fellowship with his parents since my high school years. I knew him when he was still very young, in the year 1994 his dad died, and he was left with his mother and younger brother. Years later his brother died too leaving him with his mother who was the only family he knew. His mother has been sick for over five years and diagnosed with high blood pressure, tuberculosis, ulcers and diabetes.

She passed on leaving Sam without family.

Because we walked with Sam during her mother's ailment without seeing his relatives I became his family and mobilized the community, friends, churches, and local leaders to help raise funds for mama Sam's decent sent off it was not easy but I thank God all went well, we managed to lay her to rest I was held up in the past few weeks supporting my friend and brother Sam.

He is slowly coming to the reality that his mother is no more. Kindly keep him in your prayer as my family, and my colleagues are offering him a shoulder to lean on.

Thank you People Bridge and to you for continuous support here in Nairobi, Kenya!
