It's so much more than a tap. Its timeless, elegant design and wide water jet make it a real pleasure in the bathroom. INTERNAL MECHANISM

Resulting of our efforts to develop useful, smooth and quiet products, our internal mechanisms that we present to our customers are divided into two levels as single stage and double stages. The water accumulated in double stages internal mechanism can be discharged in two different ways as 3 and 6 liters. Thanks to double stages, it contributes to the required water saving by using as much as you need.
