## How to Measure Guide

When planning a renovation, measurements are a crucial aspect to start the process. Here is a quick guide to help you measure your space.

- Always measure the whole space to capture all the room dimensions.
- Start at one corner and work your way around the room.
- Include the trim or casing when measuring all openings like windows and doors.
- Make sure you measure to your plumbing center if you plan on keeping the sink in the same place.
- Mark out where your appliances are.
- Measure the height of your ceiling around the room to see if you have any slopes to factor in.

Here's an example:
