

How Would YOU Like to Get PAID... to GIVE-AWAY MONEY
(Up to \$26K Per W2 Employee)
that the **US Government** provides? Our team member Kurt (a furniture salesman), earned around **\$1,000,000 in his first 8 WEEKS.**

Make sure to watch this important video from one of the owners.

(This is the video you will ask businesses to watch. It works like a charm!!)

How Would You Like to Get Paid 6 Figures, and Potentially 7 Figures in the Next Year for GIVING-AWAY Money (from the **US**

Government's "ERC" Program) to Businesses?

Sounds Crazy, right? But think about it... ***Who Can't GIVE-AWAY MONEY?*** A LOT of money!! For example, a small business of even 15 employees can get as much as \$390K, from the *US Government's "ERC" (Employee Retention Credit) program*. And, even better... they do *not* have to pay it back; and can use the money for whatever they want.

No matter WHAT job or business you work now... you still need to see this. NOW!

Ok, are we really "*giving away money*" to US businesses? Well, that's one way to put it. You see, the large CPA Accounting firm we work with helps businesses all across the US acquire up to \$26K per W2 employee from the ERC, a division of the CARES ACT that was first instituted in 2020 for the issues caused by the COVID-19 pandemic.

Once you understand that this is the "real deal," you'll most likely jump all over this. Even just putting in *3 to 5 hours weekly* (Of actual work. Relax, it's simple stuff. lol), as your "*Plan B / Side Hustle*," so to speak... you could crush this, and potentially earn more than a full-time job. Potentially (but realistically) *much* more.

And, the really cool thing is... **the CPA firm we work with, specializes in these ERC payments, and answers questions** the business owners have, and then **they close the deals for us.** (Note: Businesses do NOT want to let a *regular* CPA do this very *specialized* task. That could be very costly, both in their charges and not knowing how to get all the ERC funds they can for the businesses). You do not need to be "Super Salesman" to make BANK here, starting today at no cost to you.

Why YOU Should Make the Time for This... Well, because THIS is real. And, it's SUPER SIMPLE to actually do. On the contrary, so many home-bizopp people think their business or MLM deal is the best thing since sliced bread, that it's going to pay-off big-time... yet (historically and statistically) 95% of the time... THEY NEVER DO!! They jump from one bizopp to another, always touting it's the *best ever*, yet they never seem to make much money, but rather lose money, time, and integrity. Even friends. How sad. Many of these are new *startup* deals, and 95%+ of them fail.

Stop falling for these again and again!! PLEASE!! One reason is that their products or services are priced so low. It takes a *lot* of people on your team to make a living on a \$25 product. Most people usually lose money and worse yet, time. Is that you?

Let's be honest... the majority of these people are just *lazy*, and/or they have *flashy object syndrome*, and move from one deal to the next as often as they change their underwear. Or, they just never seem to, *get started*. They're always going to *get rich* with their "latest" deal, yet never do, even after a couple of dozen of these so-called *life- changing* opportunities, and 20 years later. They are known as "junkies." I know, I was one for many years. Of course, there are exceptions, but far and few between.

If This is YOU... **Stop That *Insanity* today!!** It really is crazy!! You're wasting precious TIME! Can you afford to continually do that?

THIS OPPORTUNITY... on the other hand, can change all that, rather quickly.

Let me encourage you to...

Take a Breath!!

THINK about what you learned in the video above, and read on this page.

Then, if you like what you learn (and you should)... Take MASSIVE ACTION!!

THIS IS REAL!! It's NOW!! It's HUGE!!

It's **FREE** to become a ***Referral Agent...*** and start offering money from the US Treasury to businesses (even churches) in your city. Starting today. Actually, you can offer these ERC funds to businesses anywhere in the USA. Money is not only something local business owners want... many NEED it just to stay in business. Well, you can help them, at no cost out of your pocket. And, a **typical business of 50 employees can collect around \$1,000,000 from the Government, and you'd earn about \$84,000.** *Plus overrides* if you build a team of agents (that is *optional*).

What if you could earn more in the next 3 to 12 months, than you have made in your lifetime, combined? Potentially *much* more! Would THIS interest you? Of course, the vast majority of people will NOT make this kind of money, however, what if you could earn even an extra \$10K this next year, by *giving-away money* to a small business or two with very few employees? And, basically, **all you did was share a 5-minute video** with them. Would that interest you?

Here's a *real* side-hustle you can do in literally a few hours a week, or as much as you want... and it won't conflict with your current job or business in any way.

Sounds too good to be true, right? Well, it is true, and **it's probably the best income opportunity you or I have seen or will ever see.**

So, let me ask you this... how would you like to get paid to *give-away* up to \$26K to US businesses for “each” qualifying W2 employee? FYI, **they can use the money however they want, and there's no payback.** It's not a loan, it's money in their pocket, a refund, from the *US Treasury*, and we're just the "middleman" so to speak.

Client Testimonials

Overview and Pay Plan Explanation (Co-Founder Tony Swantek)

OUR JOB IS SIMPLE... The CPA company we work with does all the heavy lifting (answer questions, closes the deals, acquires the ERC funding, pays us). We simply connect businesses with them. As many as we want. The more we connect, the more we can earn of course.

The program is called **ERC (Employee Retention Act)**... which was created under the CARES ACT during US business shutdowns, etc. in 2020 and 2021.

The ERC program started with over a **TRILLION dollars** in the US Treasury, to give out to US businesses. Most of it is still there, waiting to be given to US businesses. Do a Google search, it's as real as it gets.

The company we work for will pay you around "\$1,000 per W2 full-time employee if they get the full amount possible offered by the ERC program, of \$26K per employee. In most cases it will be less (Jorn's average is around \$21K per employee, thus we would normally average earning around \$800 on each W2 employee that qualified).

They (Jorns) have **helped over 5,300 businesses get this ERC funding approved since July of 2021** and **retrieved over \$3 billion dollars** so far for these US businesses, with much more on its way. **One agent with this company has already earned over \$50 million dollars in his first 12 months.** Not a typo. Hard to believe, right? *Many* others are earning *very substantial* commissions and bonuses as well. A couple of referral agents have even earned 7+ figures in a "week." (Most people will not earn this kind of money, but it's possible).

The "Software" Makes a Big Difference... The company we work with spent **\$500,000 to build software (that helps**

their staff of over 200 CPAs) get the *most money* they can for the businesses (even non-profits), which averages around \$21K per full-time W2 employee. They are seeing about 96% of businesses who apply for the ERC money, get *approved*. The average ERC funds that other accounting firms get their clients is about \$12K to \$17K per employee, one reportedly is only \$5,500, which obviously pales in comparison.

WHERE Do Our Commissions Come From? It's simple. Our CPA firm *specializes* in ERC funding, and gets more to the business owner than virtually all other CPA firms who do ERC funding. That's where our proprietary software comes into play, also. We even have many CPA firms bringing their clients to us to process their ERC documents. Our firm gets a 20% fee from the ERC funds the business gets. We earn 4% of the *total* funds that the government pays them, before our CPA firm takes their 20%. So, for example, if our firm gets the business \$1,000,000 (maybe they have 50(ish) W2 employees), the business gets \$800K (that they did "not" have just 10 to 20 or so weeks ago), our firm gets \$200K, and you as the *referring agent* would get \$40K for the referral commission. The CPA firm charges a \$2,600 (100% fully refundable down payment) to start the process. They tried it for free, but the businesses were not getting their needed paperwork to our company very fast, so they decided to charge and it's working out much better. It's "not" an issue as you may be thinking. If they cannot get approved, they get their money back, *immediately*. If they do get approved, and the vast majority do (96%), then they

get it back from the 20% fee they'll pay our CPA firm *after* they receive the funds from the Treasury.

So, for example, if you find a company that has 100 employees, and they got the average our CPA firm usually gets (\$21K) for each employee, **you would earn around \$84K** in commissions. **EIGHTY-FOUR THOUSAND DOLLARS just for the REFERRAL.** It's really a rather easy sale. If you can call "*giving away money*" to businesses who may really need it to survive, a sale. lol. Again, the CPA firm *closes all deals for us*. We basically just *refer* businesses to them. Could our part really get any easier? Seriously. And, why wouldn't virtually every eligible business want to take this money? Compare this to selling a \$50 lotion or potion. That's a *lot* harder!

GET THIS... **The CPA firm pays us 20% of our earnings "upfront"** (out of their own pockets) shortly after they first know the business will indeed receive funds. This could be between 3 and 8 weeks from the inception of the business first applying for ERC funds with us. So, if your 4% commissions will be \$20K, then you will get \$4K upfront "before" the government pays out to the business. Then you'll get the other 80% due you shortly after the ERC pays the business. *This also pays upline in the compensation plan.*

Again, this is *real*, and it won't interfere with your current job or business. Just put in a few hours a week (or a day) if and

when you want. You can drop off cards or flyers in-person to local businesses, call them, text and email them, send postcards, join the local Chamber, Business Meet Up groups, advertise, etc. Start by calling the business owners you know. Ask friends for referrals.

Keep in mind... **you're not selling them anything.** You are simply asking them if you can help them get *free money* from the US Treasury thru the ERC program!! Then share a 5-minute video from one of the owners, that makes the presentation for you.

TEAM COMMISSIONS and BONUSES... By the way, there is also an *optional* team referral program... where you can earn a commission on the commissions of those you refer who also give-away this government money. This **pays up to 5-tiers deep, plus additional bonuses and a company-wide revenue sharing pool.** Even though you can get paid on the business you refer to the company (at no cost to you), there is a nominal yearly fee if you want to participate in the team referral program. You'll also get to use this team page (no cost) to help you build a team, plus marketing materials and ideas, a team Facebook page to help you, and more like our *resource* page (only for those who join our team).

This is a simple business and a fantastic opportunity you really should learn more about. Actually... **GET INVOLVED WITH!!** Why wouldn't you?
