RE: Sherman Lake Installation Schedule – Project Participants

Dear Sherman Lake Property Owner

GLSWA wanted to reach out and provide information on scheduling of the sewer installation around Sherman Lake. The weather has cooperated this winter and currently there are 18 installations scheduled for Yorkshire Drive. Going forward, the scheduling will be determined by the contractors and adjusted based on their availability and the weather. The order of installations will be as follows:

- 39th Street
- Forrest Beach Neighborhood
- North Sherman Lake Drive
- West Sherman Lake Drive
- South Sherman Lake Drive

Two to four weeks' notice will be provided and you will be contacted by the contractors directly. Once the outside electrical box is connected, assuming the inside work is completed, you do not need to be home for the installations. The grading and landscaping work may take longer than the installation and our goal is to have all the work done well before the September 1 deadline.

There have been several requests to alter the schedule based on individuals' needs. However, to keep the group pricing, we need everyone who is participating to be ready and commit to the schedule provided by the contractors. Should you need special consideration, please contact us ASAP and fill out the Special Request to Change Schedule of Installation form. There will be an additional contractor charge for these schedule changes of \$1,500.

To keep you informed, please make sure we have your contact information. You can email your phone number and mailing address to Heather at mezoh@glswa.org.

Feel free to reach out with any questions.

Respectfully,

John Crumb
Executive Director
