

ROADMAP

Introduction

The Apocalyptics NFT collection, is a multifaceted project. Our vision is to create a fun, creative and valuable NFT collection. Our goal is to incorporate our post-apocalyptic collection into an online simple 2D PvP turn based NFT gaming dApp, for everyone to enjoy. Our main storyline circulates around a fictitious post-apocalyptic era, brought about by a world-shattering meteorite that collided on the Australian continent wiping it out completely. Along with the massive loss of life, natural disasters took root claiming even more lives. From Tsunamis, to earthquakes, to forest fires, the world went dark, into chaos and depravity. To make things even worse, rogue nations declared war on one another in a desperate attempt to capture valuable resources which in this case was fresh drinking water and arable lands for agricultural purposes as well as livestock rearing. This is where The Apocalyptics story begins, years after a nuclear war breaks out by those rogue nations. A few humans survive mainly on the South American continent. The Andes is the location for our story because it has one of the world's longest mountain ranges, with its varied terrain that encompasses glaciers, volcanoes, grassland, desert, lakes, and forests. Being on the other side of the world thousands of miles away from the Meteorite's ground zero, the Andes had the highest survival rate, hence the reasoning behind our base Terrain cards. Only a small percentage of human life remains and the few who are still alive are struggling to survive due to radiation, mutants, and the lack of food in the wasteland.

Strategy

We have been proactive in creating awareness within the Wax blockchain community, be it on a one-to-one basis with our brand base, or through several social media outlets. We continually strive to develop and improve our collection, by commissioning professional illustrators and by overseeing and implementing stringent quality controls.

Why are we involved?

Jarrett

"With my entrepreneur attitude, passion for collecting NFTs, and love for the post-apocalyptic theme, founding The Apocalypics was inevitable. I had the idea to create a post apocalyptic themed NFT card game but didn't know where to start so naturally I approached friends in the community".

Silver

"I first came across the word NFT sometime around March 2021. After researching it thoroughly, and successfully embedding a meta-verse geo-location into the Ethereum blockchain by way of an NFT, I became so excited with its potential. Meanwhile, well established members of that same Metaverse, had created their first NFT card collection. I obviously joined their discord server and became an avid collector. I had a deep-rooted desire to create my own collection, I just didn't know what at the time. Then along came my friend Tobias (an NFT collector), now Co-Founder colleague, and asked if I was interested in joining a small team (also friends and NFT collectors) hoping to create their own unique NFT collection. I agreed without hesitation, and the rest is history as they say".

Tobias

"I have always been a fan of the idea of an apocalypse and have enjoyed watching movies about it and enjoyed playing games with an apocalyptic theme. As an avid NFT collector the opportunity to start a collection like this was impassable".

Felix

"Collecting NFTs and spending time in discord communities is a hobby of mine. When I was approached by a group of friends wanting to begin their own collection, naturally I was onboard".

Group statement

"We the founders, are all genuine guys that absolutely love this project. With passion and a can-do attitude, we answered the call of a new challenge and a new project. We know where we want to take our project, and we are excited to see where this project leads us!"
