Title: Innovate and Automate Through Your Own Digital Transformation Journey
Presented by: Shannon Roche-MiPro
In this session we will provide an introduction as to how you can you transform your business through innovation and automation within your Finance, Supply Chain, Human Capital Management, and Student Information systems, such as PeopleSoft, Oracle Cloud, etc. We will provide an overview of how you can use robotic process automation, smart optical character recognition (OCR), artificial intelligence (AI)/machine learning (ML), etc. to enable your team members to focus on more strategic activities.

Centennial C
Track: JDE
Title: How AI Can Help JDE Businesses
Presented by: Drew Robb & Dan Stallard-ERP Suites
Discover how generative AI can address specific pain points across various departments. From preventing machine downtime through machine learning to automating document extraction from PDF contracts, AI offers tangible benefits. The ERP Suites AI Advisory team will cover:
1. AI Tips and Tricks
2. AI Security Concerns
3. AI Use Cases
By embracing AI, businesses can unlock efficiency, profitability, and competitive differentiation within their JD Edwards systems.

Let's take a moment to get to know each other. This is a great time to connect with your community and ask questions.

1:30pm-2:10pm

Centennial AB
Track: Oracle Cloud HCM
Title: Inclusive HR
Presented by: Jay Chatterjee, North America Oracle Cloud HCM Practice Leader, IBM
Amy Adkins, Client Solutions Leader, IBM
Organizations with inclusive culture financially perform 30% better than their competitors and have better access of critical skills with lower attrition. Organizations are missing the opportunity to partner with their workforce to achieve their goals and therefore the move from Sustainability Strategy to execution is not yet mapped. HR has a significant role to play, starting by identifying ways to encourage, harness and report on the collective workforce impact across their company with respect to DE&I practices. InclusiveHR can equip HR Managers to create a positive impact for society, improve financial performance and are adequately equipped to take informed organizational decisions.

Title: Unlocking Efficiency through 3rd Party Integration with JD Edwards Orchestration
Presented by: William Shepard-Kenai
This goal of this session is to explore the revolutionary potential that 3rd Party Integration with JD Edwards Orchestration holds for businesses and provide the information and understanding needed to start a successful third-party integration journey with JD Edwards Orchestration. An introduction to JD Edwards Orchestration will open the session, giving participants a thorough grasp of the platform's features and how it functions as a strong foundation for business process automation. The emphasis will then be on integrating third-party apps into the JD Edwards ecosystem and explaining how doing so can lead to increased data accuracy, decreased manual intervention, and quicker decision-making. Through case studies and success stories from the real world, the audience will learn about the concrete benefits of JD Edwards Orchestration's Third-Party Integration and how

businesses can achieve a smooth information flow across various systems, whether it is through improving supply chain visibility, streamlining financial processes, or enhancing customer relationship management. In today's fast-paced business environment, organizations can achieve unprecedented levels of operational efficiency, agility, and innovation by utilizing the synergy between JD Edwards and external applications.
