

Reasons to become lead safe certified?

Any contractor, from plumbers to electricians to painters, who disturbs lead paint while working in a pre-1978 home, school or day care center, now **must** be lead safe certified. If you're not, you can face tens of thousands of dollars in fines. Plus, you put the health of yourself, your workers and your customers at risk, which could result in lawsuits. (EPA visit epa.gov/getleadsafe) or call 800-424-LEAD.
