

# Bli Bli State School

## Active transport improvements

### What was our process

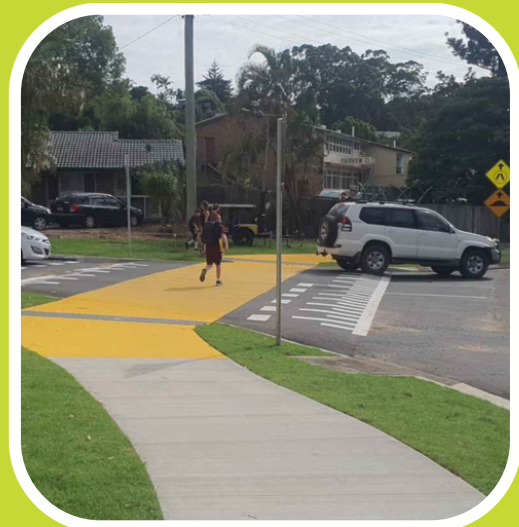

### What we did

- Used spatial engagement tools to engage with over 100 parents and teachers and find out where improvement to paths and crossings were needed
- Identified and mapped a short list of 20 projects for future investment
- Developed project scopes for 20 projects, to improve active transport in Bli Bli

### What were the outcomes

- Improved crossings at side roads east and west of the school
- New pathways connecting from the south and the west
- Study outcomes were incorporated into network augmentation plans for new masterplanned developments
- School Transport investment
