

RapidVac

Revolutionary Cleaning System

Pool & Spa Overview

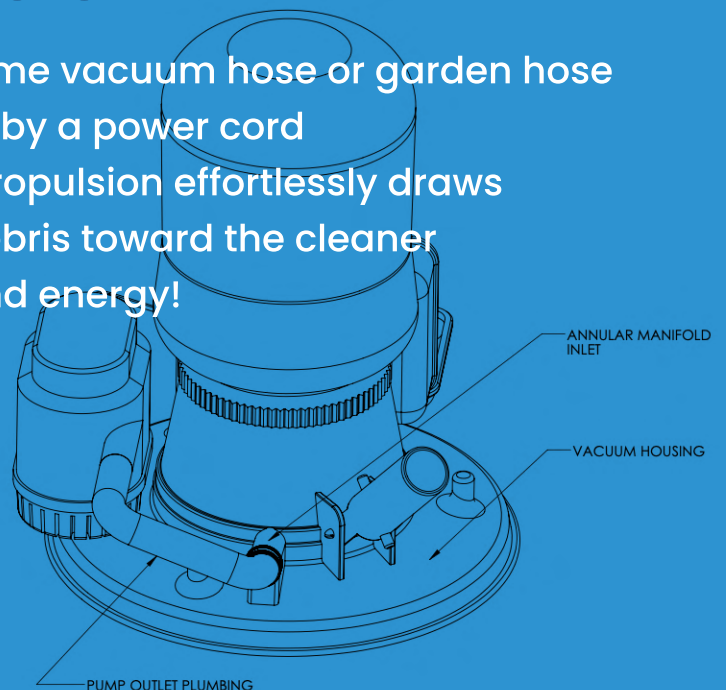

RapidVac's innovative system revolutionizes pool and spa maintenance with its distinctive features. Both battery-powered versions employ jet propulsion to effortlessly lift debris from pool or spa floors and deposit it into the attached collection bag.

The system's portability is enhanced by attaching it to a standard pool/spa pole, eliminating the need for cumbersome hoses and cords. With robust submersible pumps and rechargeable batteries encased in waterproof housings, the cleaner ensures optimal jet lift performance through precisely sized manifold and jets.

This design streamlines the cleaning process, making it an efficient and convenient solution for pool and spa maintenance in both residential and commercial use.

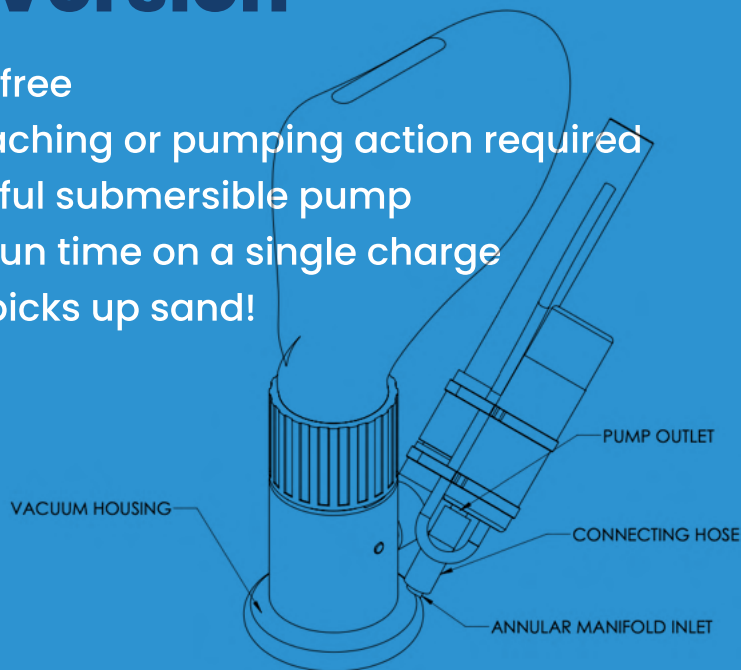

RapidVac Pool Version

- No cumbersome vacuum hose or garden hose
- Not restricted by a power cord
- Powerful jet propulsion effortlessly draws leaves and debris toward the cleaner
- Saves time and energy!

RapidVac Spa Version

- Hose-free
- No reaching or pumping action required
- Powerful submersible pump
- Long run time on a single charge
- Even picks up sand!
