

Medhab: Transforming Healthcare with Remote Patient Monitoring (RPM)

Overview:

MedHab is transforming primary and specialty care settings by offering remote patient monitoring (RPM) and principal care management (PCM) services. Our goal is to improve patient outcomes via a nearly turnkey service while generating revenue for healthcare providers.

Why RPM Matters:

- 1 out of 2 US adults have hypertension.
- 6.1 million adults have atrial fibrillation.
- 42% of adults are obese.
- 15% suffer from lung issues.
- Over 38 million adults have diabetes.

What We Offer:

1. No monthly fees to the provider
2. No disruption to cash flow
3. BlueTooth and cellular devices (BP cuff, pulse oximeter, glucometer, weight scale)
4. Annual renewable agreement with 30 day termination without hidden termination fees
5. Medicare reimbursed fall detection device
6. Steprite insoles for gait, ROM and force (orthopedic)
7. Efficient Billing Services
8. Ability to integrate with your EMR
9. Monitor patient data and provide follow-up guidance based on physician-set parameters or alerts
10. No need for client to hire additional staff
11. MedHab hires local support to circulate through clients business to support client staff with all aspects of RPM. (accepts client recommendation for hiring when applicable)

Eligibility:

- Medicare, Medicaid, and private insurance
- Patients with at least 1 chronic condition

Billing Process:

- Medhab bills services through your NPI for Medicare reimbursements and manages all accounting.
- Outsourced work is compliant with Medicare regulations.

Revenue Projection:

- Monthly income per patient ranges from \$50 to \$75.
- Example: 1,000 patients per client = \$50k to \$75k per month OR \$600k to \$900k per year.

Conclusion:

MedHab streamlines patient monitoring, improves healthcare outcomes, and boosts revenue for clinical organizations. Join us in leading the transformation in healthcare delivery today!
