

How To Use BigVu Teleprompter

1

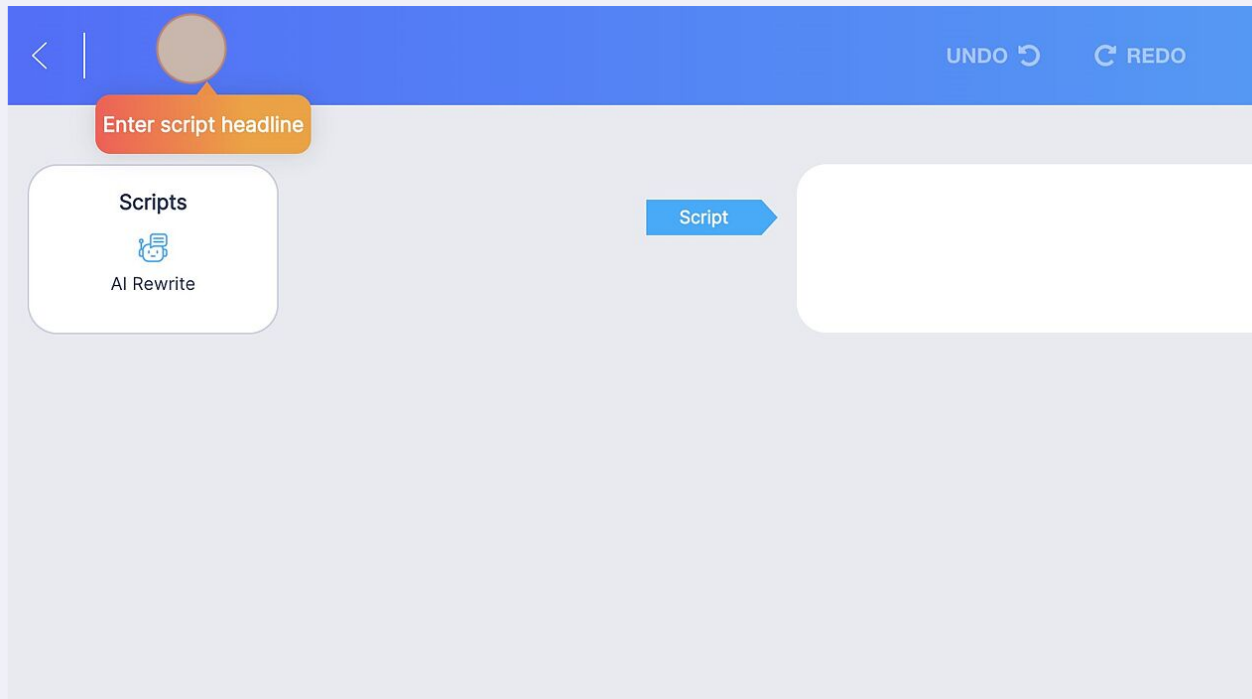

BigVu has a FREE plan and is enough for most beginners. With higher tier services, you get better customizations for your videos, the ability to block out sensitive information from screenshots, as well as AI scripting assistance for your videos. Navigate to desk.bigvu.tv/boards

2

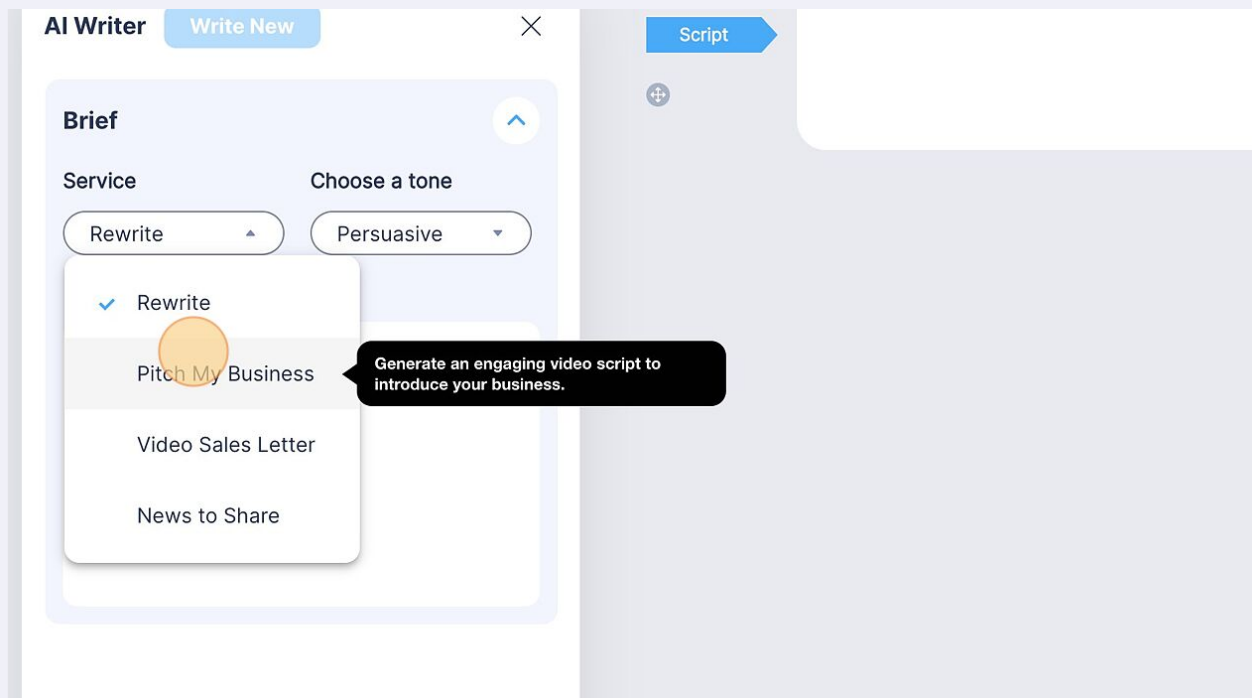

Click on "New Script" to create a new script

3 Give your script a name

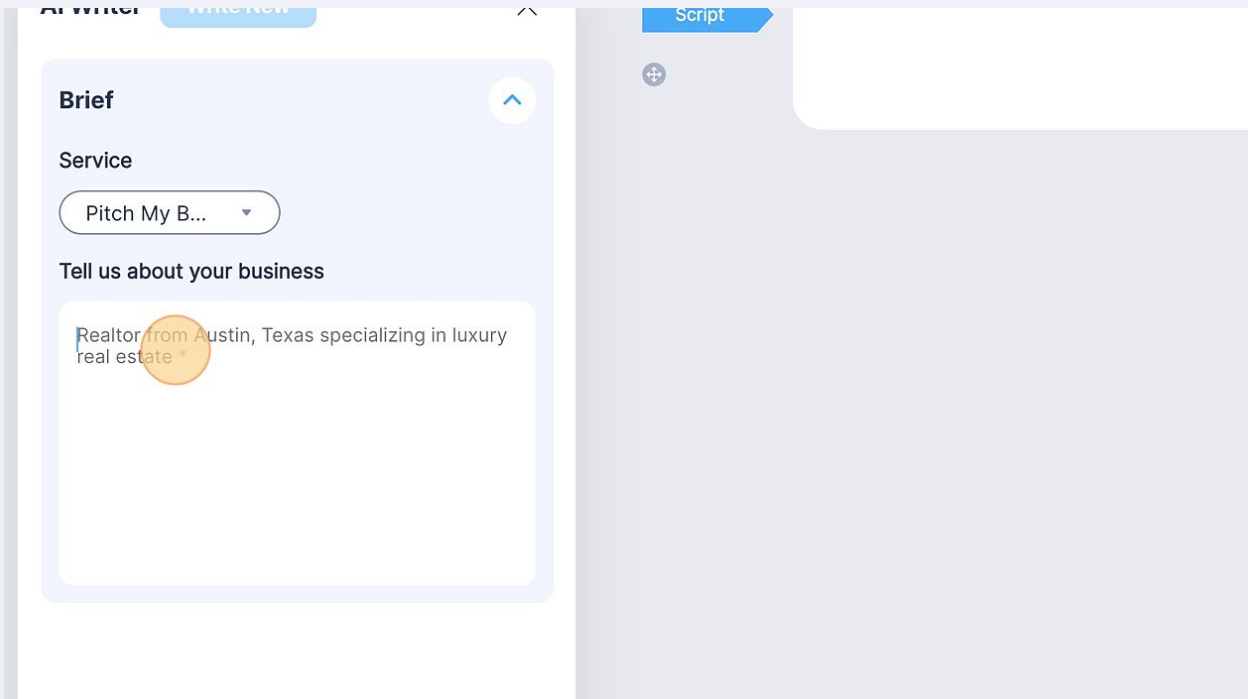

4 In paid versions of BigVu, you will have access to AI to help write your scripts

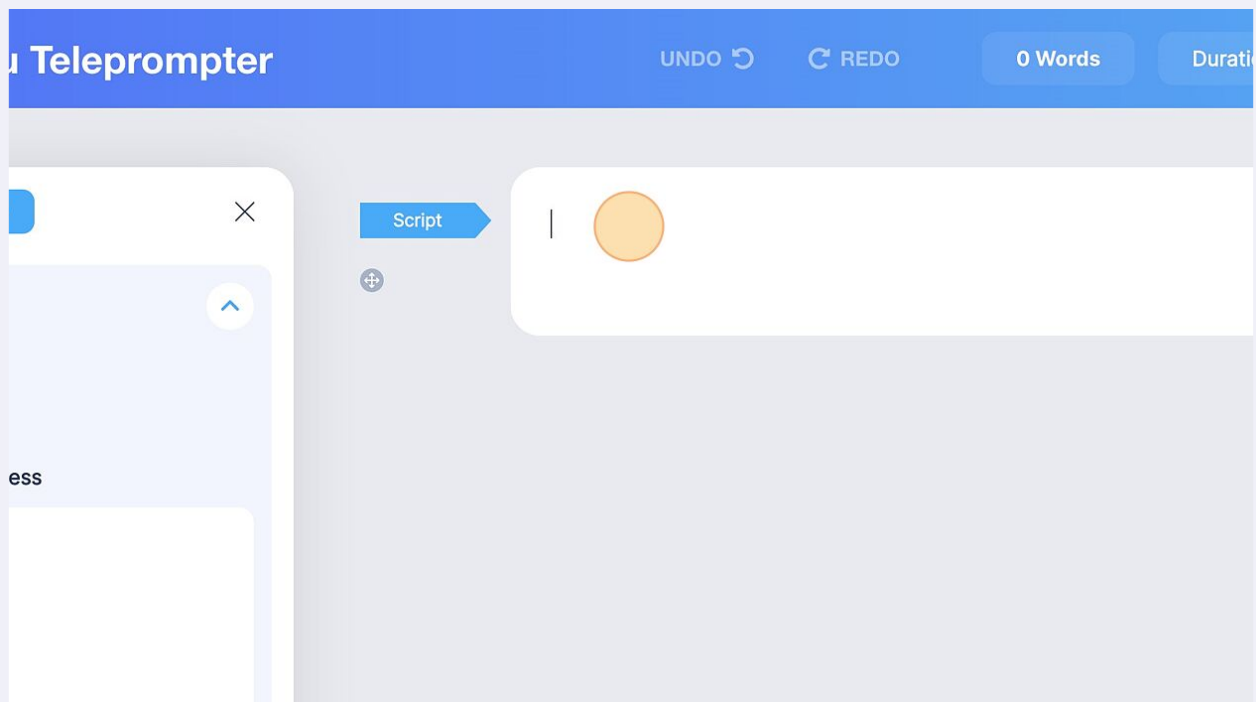

5 Type "social media influencer"

6 Select from the dropdown menu and write a short description of how you want the AI to help you

7 Or, simply start typing your own script (Free version).

8 In this example, I have written "Hi, I'm Ryan from BlockStoxx.com. In this video, I will teach you how to use the BigVu teleprompter for creating easy and professional-looking selfie videos for content or promotion. Simply type what you want to say. It helps to include keyword research, SEO terms, or trending hashtags in your verbiage, because web crawlers that search and rank websites can interpret voice and videos. So, make sure you do some research on keywords relevant to your promotion. I will show you how to do that in another tutorial."

9

As this app is linked to your mobile device, Your script will appear on your mobile as a new project as soon as you save it here.

Simply type what you want to say. It helps to include keyword research, SEO terms, or trending hashtags in your verbiage, because web crawlers that search and rank websites can interpret voice and videos. So, make sure you do some research on keywords relevant to your promotion. I will show you how to do that in another tutorial.

Live Streaming

Tip

Your script will appear on your mobile as a new project as soon as you save it here.

Don't have our mobile app yet? download it now for [iPhone/iPad](#) or [Android](#)

10

This way, you can use your mobile device as the teleprompter simultaneously recording yourself reading it!

Using BigVu Teleprompter

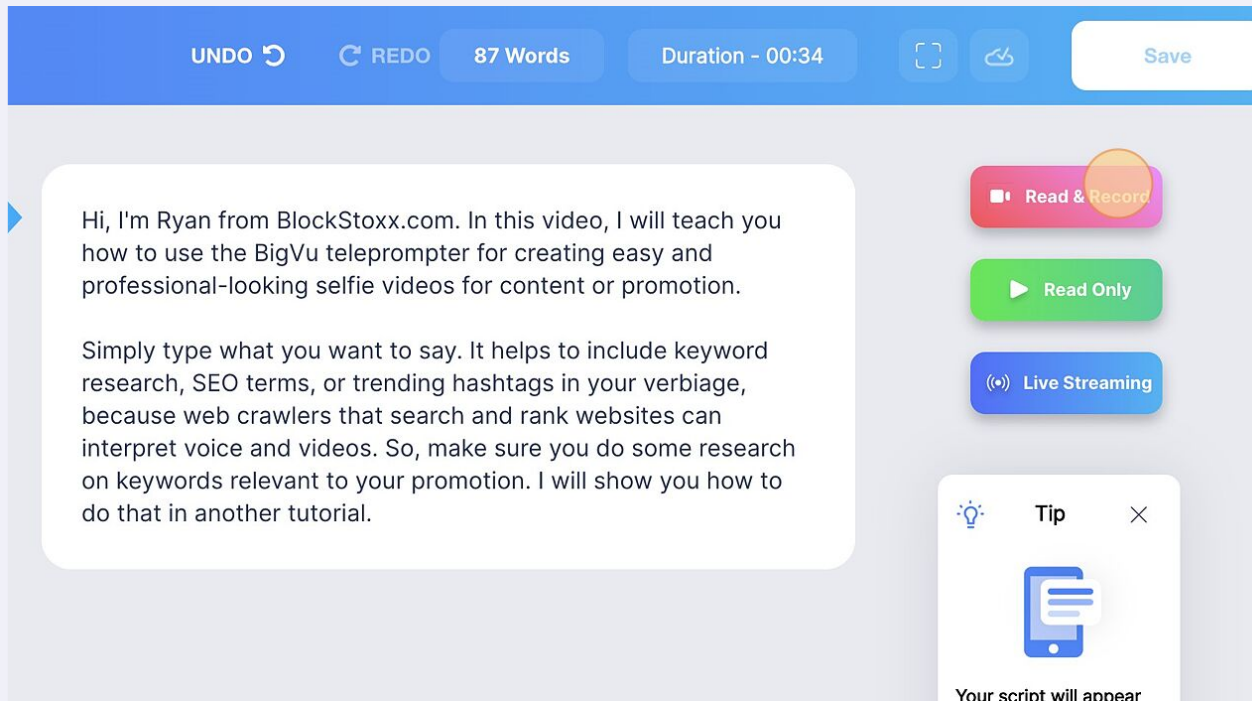

Hi, I'm Ryan from BlockStoxx.com. In this video, I will teach you how to use the BigVu teleprompter for creating easy and professional-looking selfie videos for content or promotion.

Simply type what you want to say. It helps to include keyword research, SEO terms, or trending hashtags in your verbiage, because web crawlers that search and rank websites can interpret voice and videos. So, make sure you do some research on keywords relevant to your promotion. I will show you how to do that in another tutorial.

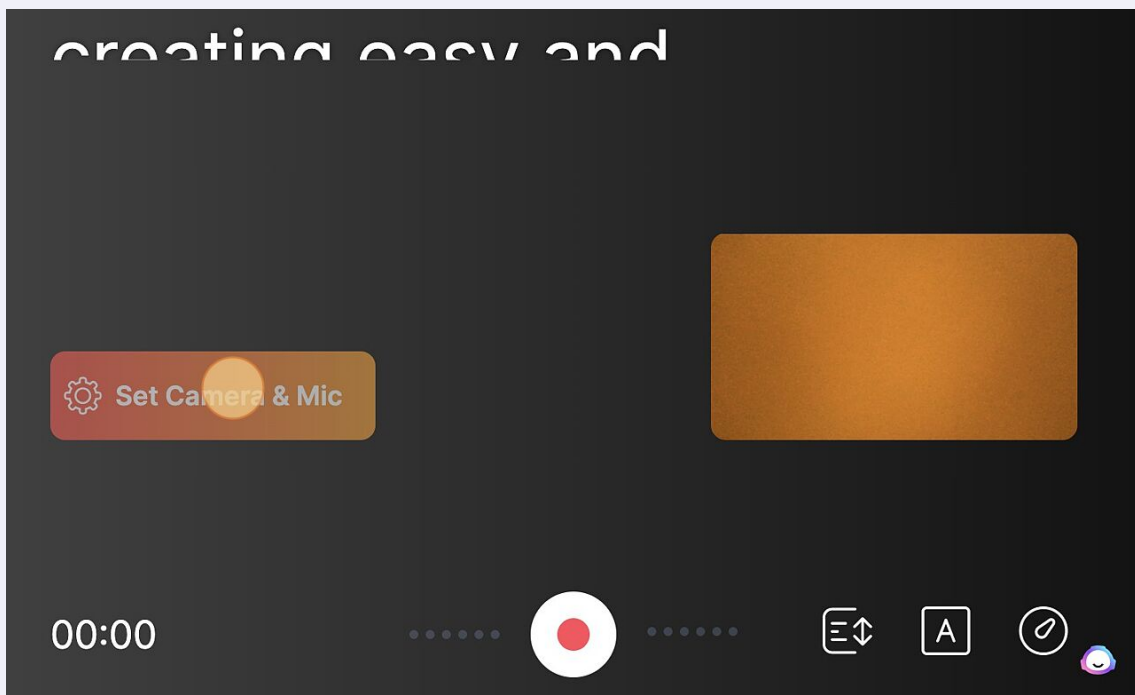

11

You can use either your mobile device or your computer or laptop to record yourself reading your new script!

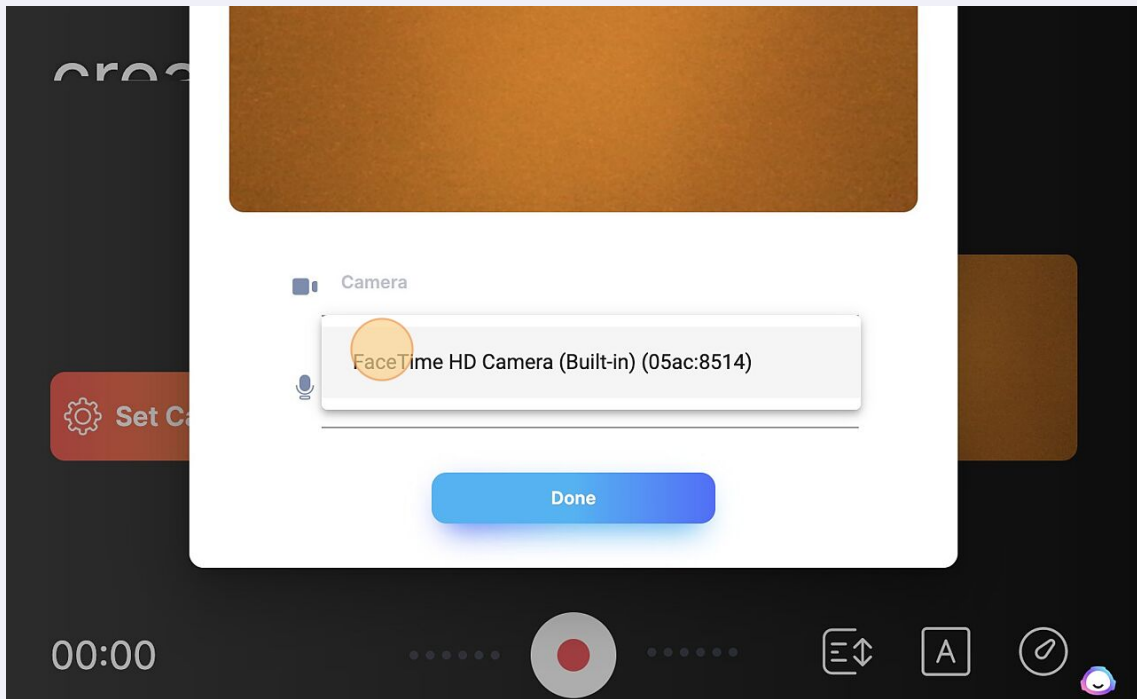

12

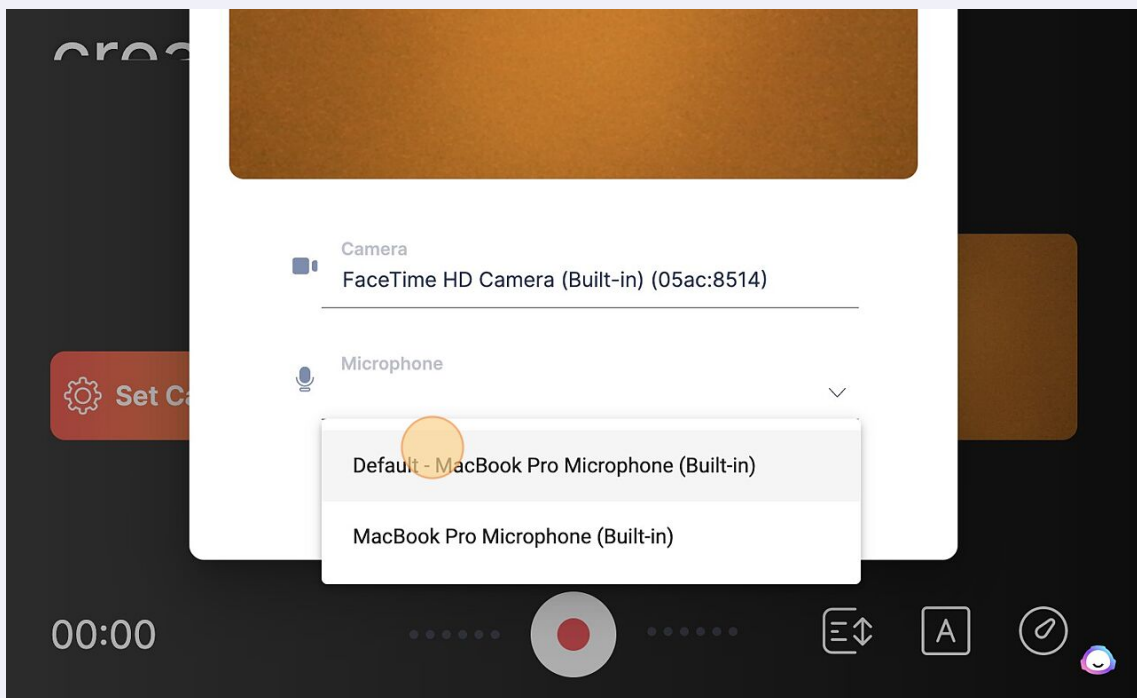

Be sure to "Allow" BigVu to access your built-in Camera and Microphone on your computer by clicking "Set Camera & Mic"

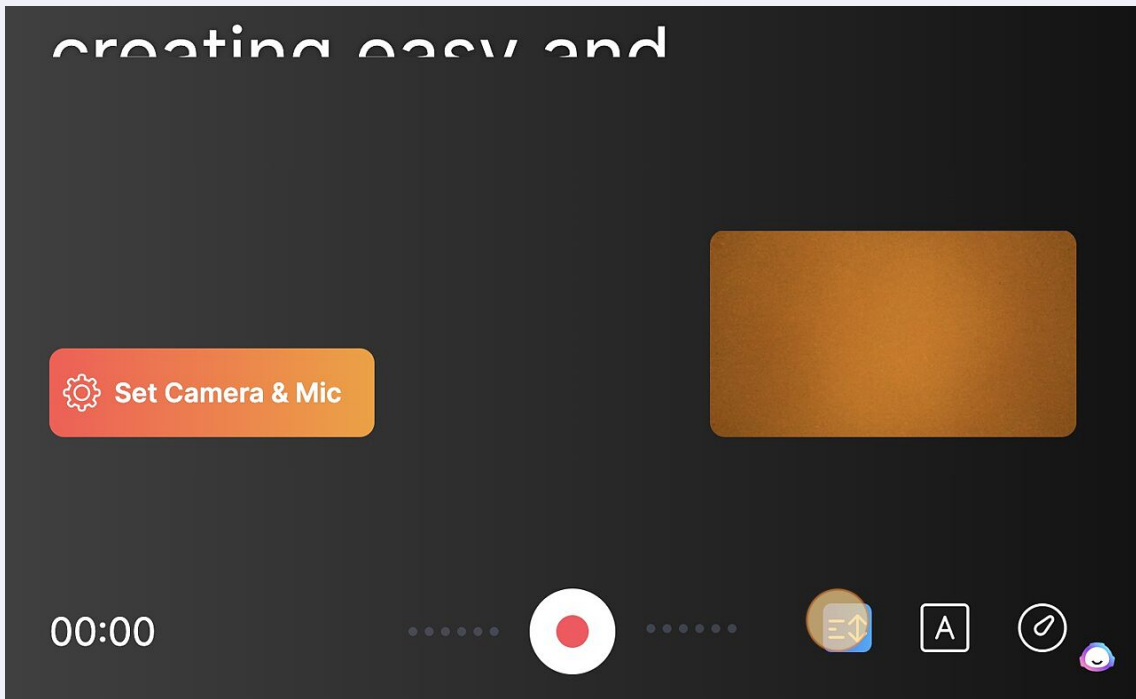

13

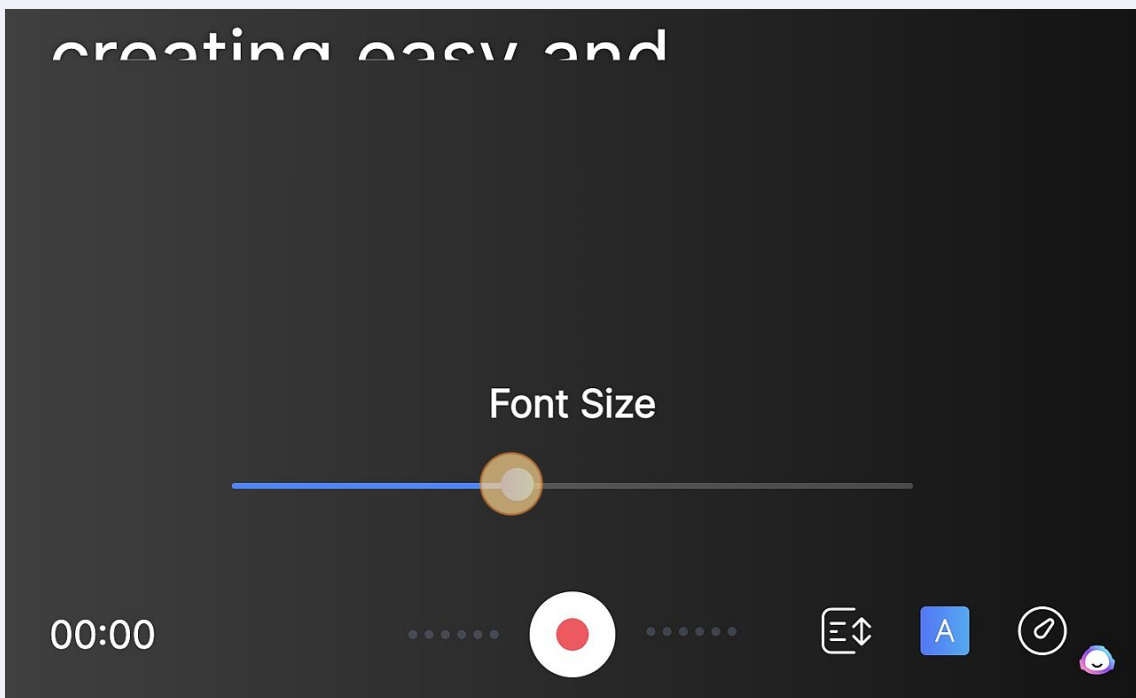

14 Click "Default - MacBook Pro Microphone (Built-in)"

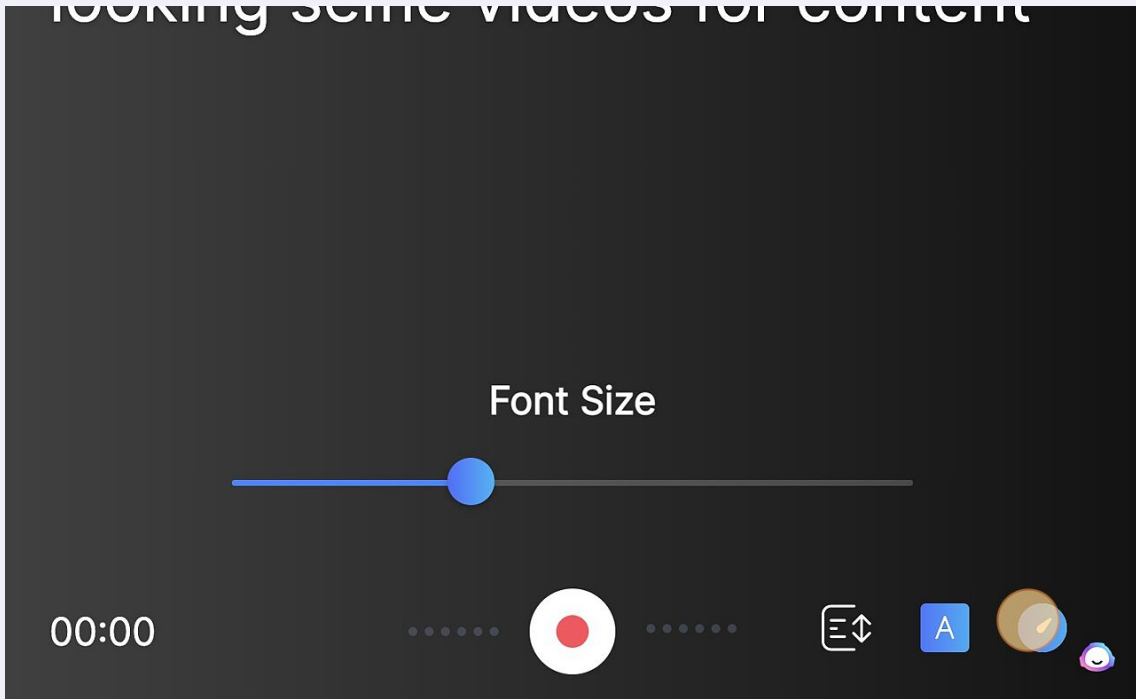

15 You can use the controls to view your text ...

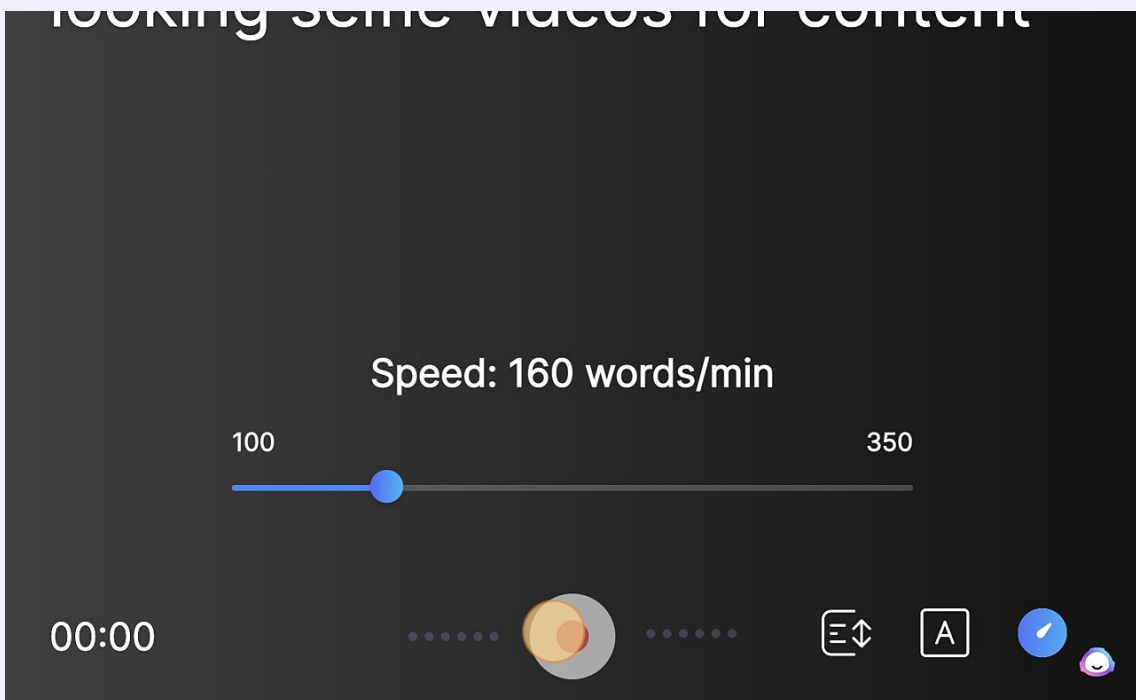

16 ... adjust the size of the text ...

17 ... or adjust the rate of scrolling.

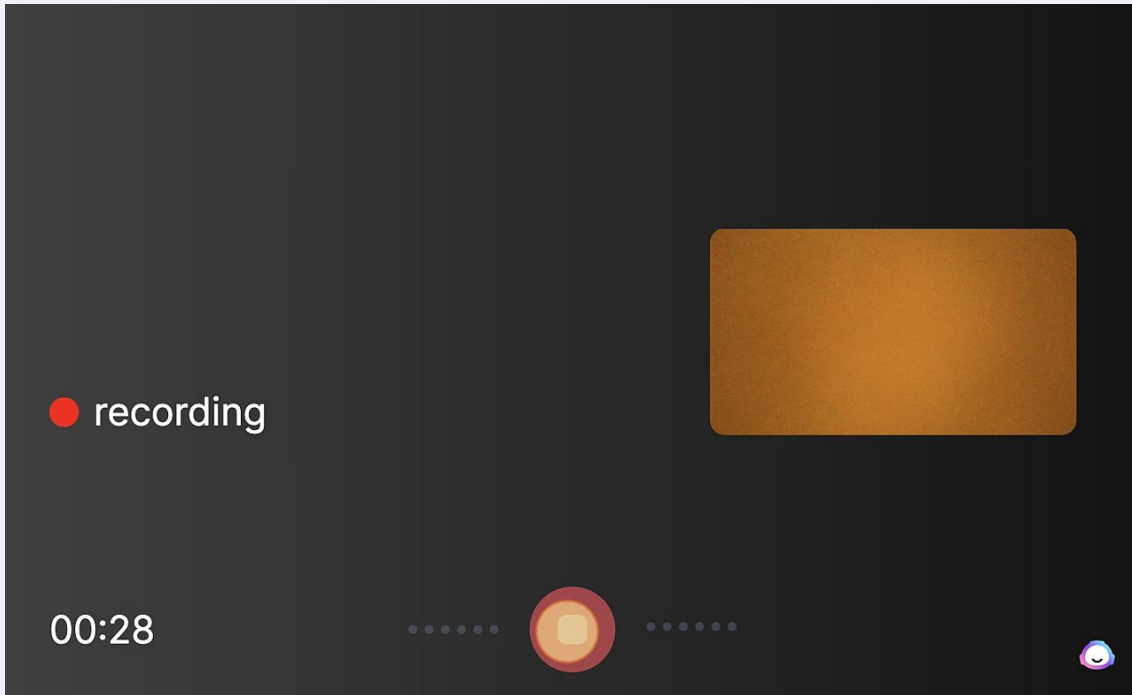

18

19

Then, click the Record button to start recording your video of yourself reading your own script. It may take some trial and error to get the scrolling speed just right, but the app is very user-friendly!

20

Once you have a version of your video that you like, you can download it for either immediate posting to social media, or to 'wash' through other video editing software to further customize your video!
