Civilian Response to Active Shooter Events

The average police arrival time in the U.S is between 3 - 5 minutes. In an active shooter event, would YOU know what to do during this time gap?

As a result of increased public awareness, many citizens have asked what individuals can do protect themselves and reduce the dangers faced during an Active Shooter Event.

Civilian Response to Active Shooter Events (CRASE) course, designed and built on the Avoid, Deny, Defend (ADD) strategy developed by ALERRT in 2004, provides strategies, guidance and a proven plan for surviving an active shooter event.

Topics for this two hour course include:

- Active shooter data and profiles
- Situational awareness development
- Effects of stress on rational behavior
- Recent events and lessons learned
- AVOID-DENY-DEFEND Strategies
- Law Enforcement actions on arrival

A available free of charge
to all our clients.
