

-Performance Horse Arena-

Horsemanship on the Trail -Clinic-

Tom Wicklund
Trainer/Clinician

Tom starts with demonstrating how to maneuver with your horse in the arena. Working on groundwork, then moving to the rider while in the saddle on the trail.

Using visual aides, and direct instruction, Tom works on disengagements of the forehand and haunch of your horse. While also working with the hands and legs of you, the rider.

To reinforce better ballance and control of the horses's body, making a soild mind, and gaining them, and you, confidence.

My misson, improve your art of horsemanship.
