CIDSCANN ANNUAL MEETING

After 2.5 years of virtual meetings, we are finally able to meet face to face!

This will be aligned with the Meeting of the Minds (Mentoring in IBD and CCC Future Directions in IBD), so that anyone intending to come to Toronto could make plans to arrive in time for the CIDSCaNN meeting.

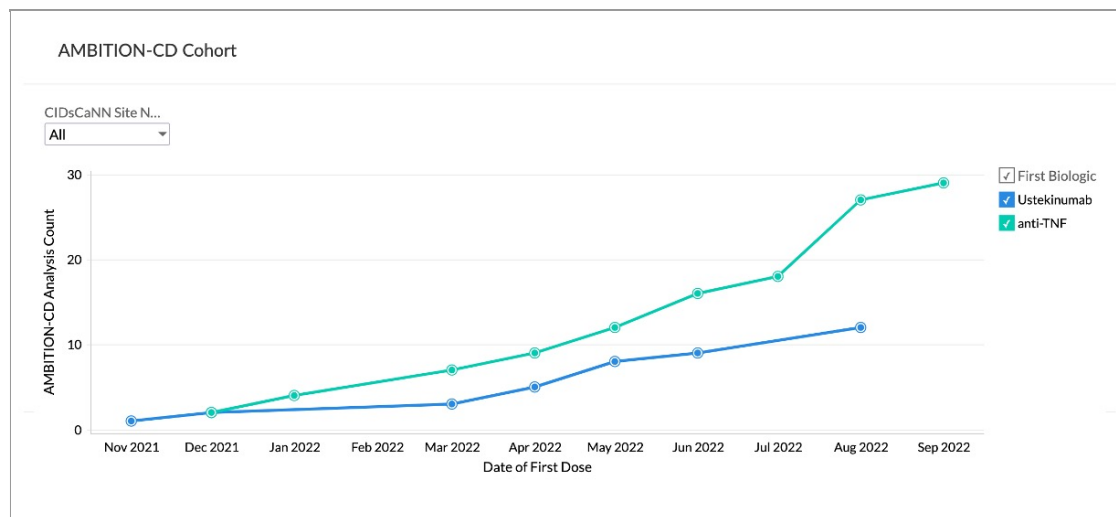

Virtual attendance is also possible for those not coming to Toronto.

Phase 2 enrolment into a prospective cohort of children and adolescents anticipated to initiate biologic therapy for luminal inflammatory Crohn's disease has begun.

As discussed at the investigator meetings, when patients are willing to provide biopsies for research, we **encourage enrolment prior to diagnostic (or**

If such an enrolled patient turns out to have ulcerative colitis or IBD-U rather than Crohn's disease, they will not be eligible for the AMBITION-CD analysis, and will not continue to be followed in the cohort. For these non-eligible patients, remuneration will be provided only for data and biospecimens collected at the time of enrolment.

We hope that this does not happen often, but we will be able to track occurrences by comparing enrolment numbers and ZOHO registrations when first dose of anti-TNF or ustekinumab is given to AMBITION-CD cohort patients.
