

THE NO-NONSENSE GUIDE TO FLIPCAST DUO

One click. One capture. Two formats.

THE PROBLEM

You film a great **PORTRAIT** video for TikTok, Reels or Shorts...

...but you also need **LANDSCAPE** for YouTube.

Trying to crop one format into the other can **cut people or important content out of the shot**.

So your other options are:

FILM EVERYTHING TWICE

Once in portrait. Once in landscape.

OR USE TWO PHONES

Two phones. Two setups. Twice the hassle.

THE SOLUTION

FLIPCAST DUO CAPTURES BOTH AT THE SAME TIME.

PORTRAIT + LANDSCAPE. ONE PHONE. ONE CAPTURE.

Both versions are saved separately to your phone, ready to use.

One Click. One Capture. Two Formats.

HOW TO USE FLIPCAST DUO

1. HOLD IT

Hold your phone **LANDSCAPE** or **PORTRAIT**.

FlipCast Duo's **Smart Interface** **automatically adapts** when you rotate your phone, so you can use it either way.

2. FRAME IT

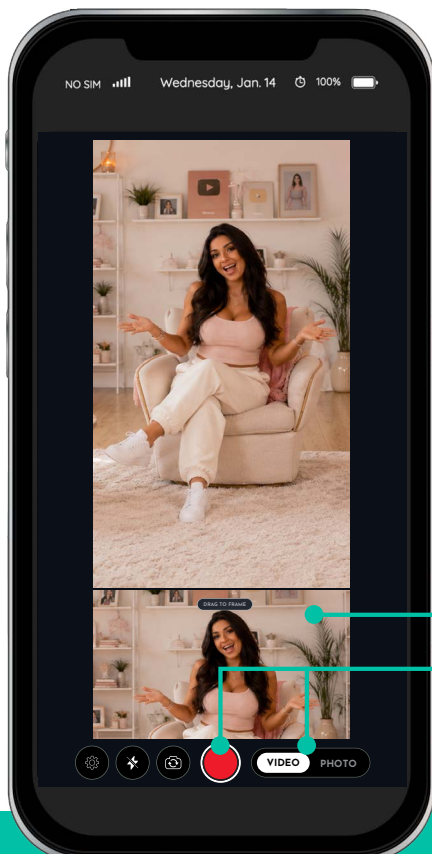

You can see both **formats on screen before you capture.**

PHONE HELD LANDSCAPE

Slide the **PORTRAIT** frame **LEFT** or **RIGHT** to choose what appears in your portrait version.

PHONE HELD PORTRAIT

Slide the **LANDSCAPE** frame **UP** or **DOWN** to choose what appears in your landscape version.

3. CAPTURE IT

Choose **VIDEO** or **PHOTO** and tap the capture button.

Your portrait AND landscape versions are captured at the same time and automatically saved to their own gallery on your device.

FIRST 7 DAYS - TRY FLIPCAST DUO

Try everything for 7 days - no capture limits:
