

PARTNERSHIP GUIDE

What's Inside

- What is CV Wine Lab?
- Advantages of using CV Wine Lab
- Winemaker's Quick Start Guide
- Planning a Quality Control Partnership

Welcome to Columbia Valley Wine Lab

Your Partner in the Lab

At CV Wine Lab, our mission is to provide the Columbia Valley AVA with the analytical precision of a world-class production facility, delivered with the personal service of a local neighbor.

Our team has deep industry roots including some of the largest programs on the West Coast such as E. & J. Gallo, Ste. Michelle Wine Estates, and Rogue Ales & Spirits. We bring corporate level dedication and TTB-certified accuracy to every sample we test.

We aren't just a service provider; we are your partner in the lab,
dedicated to helping Washington wines compete on the global stage.

The CV Wine Lab Advantage

Pay for the
testing you need,
not static
equipment &
labor costs

Results in your
inbox
formatted to
match your
needs

Results you can
trust from a
local TTB
Certified Lab

WHY PARTNER WITH US?

5 Strategic Advantages

01

TTB Certified Accuracy

Gain the peace of mind that comes with unbiased third-party validated data. Our lab provides third party results to meet the compliance needs of your customers.

02

Fast Local Turnaround

Same day answers for when timing matters. Most results are sent the afternoon samples are received. Our facility is built for high throughput regardless of the season.

03

Eliminate Lab Overhead

Convert fixed expenses like payroll, equipment, and reagent costs into a scalable, variable expense.

Only pay for the data you need!

04

Focused Staff

Allow your winemakers and enologists to step away from the bench and dedicate 100% of their expertise to the cellar, the blend, and the brand.

05

Consistent Workflow & Seamless Data

Production is unpredictable, but our process remains consistent. Just drop and go! We deliver data in a format that matches your needs: pdf, xlsx, csv or Innovint.

SUBMITTING SAMPLES

Support From Grape to Glass

1

Ensure every sample is clearly marked:

- Company Name
- Sample/Lot ID
- Specific Tests or Panels requested

We provide labels and sample tubes.

A minimum of 50 mL is required for all samples. 375 mL for stability and 750 mL for Bentonite Trials

2

Let us know by 9 am via text (**509-820-6837**) if samples will be dropped off that day.

This helps us save on courier costs and plan the sample runs for the day.

3

Check your inbox for the Results Report.

Reports are typically sent out the afternoon samples are received.

Check your spam filter, but reach out if you have not received results by the next day!
