

MESSAGE FROM OUR
CHIEF EXECUTIVE OFFICER

MUHAMMAD
SAQLAIN KHAN

Maheen Textile Mills (Pvt) Ltd: Pioneering Excellence with Visionary Leadership

Since 2010, Maheen Textile Mills has emerged as a global leader in the home textiles industry, combining innovation, sustainability, and superior craftsmanship. As we approach our 15th anniversary in 2025, we celebrate a journey defined by resilience, achievement, and impact. I have embarked on my career in the textile industry in 1997, gaining invaluable experience and a deep understanding of the market's complexities. With a mission to redefine the standards of quality and sustainability in home textiles.

Rising to Global Challenges with Purpose

Under my guidance, Maheen Textile Mills has consistently addressed the pressing global challenges of climate change, resource scarcity, and social inequality. These efforts have not only strengthened our operations but also contributed to creating a positive environmental and social impact.

- **Sustainability Leadership:** A 41% verified reduction in carbon footprint achieved in 2024 and the launch of a 2 MW solar energy project in 2024 underline our commitment to eco-conscious manufacturing.

- **Operational Excellence:** Strategic energy-saving measures, such as optimized RO plant schedules and energy-free cooling solutions, reflect our dedication to resource efficiency.

- **Empowering Communities:** Initiatives to increase women's workforce participation to 20% by 2025 demonstrate our commitment to inclusivity and equality. Today we have partnered with Kaaryan and its extensive network across Pakistan with the women of Pakistan from Rural areas and train them to bring to you beautiful commercial works of art, which are recognized by leading organizations such as; British Asian Trust, UN Women, Unesco and together paving the way.

Crafting Products with Purpose

Maheen Textile Mills has built a reputation for delivering products that seamlessly blend innovation, quality, and sustainability. From institutional bedding and luxury linens to eco-friendly blackout curtains and advanced waterproof mattresses, every product reflects our commitment to excellence and functionality. Trusted by industries ranging from healthcare to aviation and hospitality, our solutions meet the diverse needs of a global clientele.

A Vision for the Future

As we look toward the future, as a CEO my leadership continues to inspire our journey as a company. By 2025, we aim to achieve 60% sustainable material usage in production, advancing to 80% by 2030. These milestones align with our vision of creating a sustainable, prosperous future for our customers, stakeholders, and the planet.

Celebrating 15 Years of Leadership and Impact, Our 15th anniversary in 2025 marks a significant milestone in our journey. It is a celebration of the trust of our partners, the dedication of our team, and my vision as a CEO, my commitment to innovation and sustainability has been the cornerstone of our success.

Maheen Textile Mills is not just a company; it is a legacy of progress, a symbol of resilience, and a beacon of leadership. We are poised to shape the future of home textiles and leave an enduring mark on the global stage.

PRODUCTION CAPACITY

SUSTAINABLE WITH COMFORT AND STYLE

CLOSED LOOP RECYCLING

cradle to cradle

Maheen Textiles invests heavily on renewable energy; alongside our closed loop recycling system.

Our after sales service can provide collection of used clothes, apparel and Home Textiles to be sorted and recycled.

Line 1: Convert Directly into fiber for direct use for fill products.

Line 2: Convert Directly into yarn for re-purpose.

We use 100% solar power to manufacture our products. All the processes involved are made with CLEAN ENERGY.

ECO FACTORY

Retail, Health Care, Hospitality, Travel Industry

The Paris Agreement's goal is to keep the rise in global temperature to well below 2 °C and preferably limit the increase to 1.5 °C.

Emissions reductions to reach net zero by the middle of the 21st century.

To stay below 1.5 °C of global warming, emissions need to be cut by roughly 50% by 2030.

Addressing Climate Change Through Sustainable Practices

Emission Reduction Normalised Percentage

Year	Maheen Textile Mills (Pvt) Ltd	Percentage Reduction
2021	14%	
2022	27%	
2023	41% Verified	
2024	70%	
2025	97%	100% Green Energy

Paris Climate Agreement 2015

"Net Zero Emission by 2050 and shift on green energy by 2030 is the benchmark"

Maheen Textiles is 25 years ahead of the industry benchmark.

Why We Care.

We provide bespoke textile solutions for each of the different industries we work with.

We understand our partners all have specific requirements and that the smallest details are key to a project

A watercolor-style portrait of a woman's face, rendered in warm tones of red, orange, and pink. The style is soft and artistic, with visible brushstrokes and a slightly distressed, torn-paper edge effect. The woman's eyes are looking slightly to the right.

CREATIVE ARTISAN HAND MADE DESIGNS

Kaarvan Crafts Foundation
Crafting Livelihoods

Maheen Textiles has partnered with Kaarvan to provide life skills training to women in rural areas of Pakistan. These skills empower women to achieve economic independence and access material resources. They also build self-confidence, enable mobility, and equip women to actively participate in local decision-making. Beyond economic empowerment, these initiatives emphasize fundamental rights such as the right to development, the right to peace and right to healthful environment.

Kaarvan's unwavering commitment to empowering women has resulted in the establishment of over 250 training centers across 12 districts and 1,000+ villages in Punjab and Khyber Pakhtunkhwa. To date, more than 29,000 women have received life skills training, with over 8,000 women linked to market opportunities to integrate them into the economy. Additionally, 455 women have undergone hands-on training through exposure to real-time market hubs, where they learn essential business and entrepreneurial skills.

Brew A Cuppa

200 GSM JERSEY ORGANIC PRINT

When the world is at odds And the mind is all at sea,
Then cease the useless tedium
And brew a cup of tea. There is magic in its fragrance,
There is solace in its taste; And the laden moments vanish
somehow into space. The world becomes a lovely thing
There's beauty as you'll see;
All because you briefly stopped
To brew a cup of tea.

Enoki

T-200 BCI COTTON

Just it is like flower, Blossom and spread its fragrance,
Put a signature on several hearts. Memory of its beauty,
Aura remains all the time everywhere In hearts of those
who had seen it! Some by their wisdom and knowledge
Some with deeds and virtues,
Flowers, beautiful flowers of God's Garden!

140 GSM BRUSHED POLY COTTON

I drew a line; this far, and no further,
never will I go further than this;

When I went further,
I drew a new line, and then another line.

The Sun wash shining and everywhere I saw people,
hurried and serious, and everyone was drawing a line,
everyone went further.

Charlotte Finch

Banana fabric is a beautiful, animal-free textile that mimics real silk, and act as a great vegan alternative.

The fiber material comes from the stalk of the banana plant, and while it is certainly a unique idea, it is not new. The textile has been used in Japanese and Southeast Asian cultures as early as the 13th century.

HOW COPPER WORKS

The innovative copper yarn is able to ensure human wellness thanks to its main properties perfect for three main essential uses:

- * bio-chemist use: it allows skin to absorb copper;
- * electro-magnetic use: as a resonant frequency;
- * bio-electric use: regulating microorganism.

This is an important discovery based on the ancient Cupro Therapy, that shows how copper can be assimilated by the skin, not only by eating or drinking.

PERFORMANCE

1. Antistatic Property: It disperses electric charges accumulated from the external environment
2. Metabolic Property: If absorbed by the skin copper supports human body growth and its wellness.
3. Antioxidant Property: It allows to fight free radicals that cause skin's ageing
4. Transparent Property: It speeds up to moisture transfer process.
5. Heat Regulating Property: Keeps the temperature constant.

REVITALIFE®

BODY REPAIR FORMULA

Superoxide Dismutase helps break down potentially harmful oxygen molecules in cells.

ANTISTATIC

The electricity charged from the environment or during workouts is absorbed and dispersed thanks to the resonant frequency of copper and the characteristic frequencies of the body. This helps to ground the mind in soul.

PERMANENT

Thanks to its structure, it maintains a constant effectiveness over time, even after many washings. For the life of the product.

WELLNESS - BENEFICIAL FOR HUMAN BODY

Copper is necessary for growth, metabolism development and good health.

COPPER FOR GROWTH

Copper is an essential element for children growth, especially for bones strength and for the support of the red and whiteblood cells production, cholesterol, heart contraction and brain development.

A survey on 300 people suffering from arthritis, who wore copper bracelets, showed that a significant number of them has received benefits from the bracelet.

COOLING: THERMAL REGULATION

reducing skin humidity, and keeps your body at a constant temperature through moisture wicking.

ANTIOXIDANT - ANTI AGEING - REJUVENATION

Moisture wicking speeds up the sweat evaporation process, Copper contains the superoxide dismutase enzyme: it has a strong antioxidant action that eliminates free radicals, the main cause of ageing therefore contributing to rejuvenate your body.

COOPER AGAINST AGEING

Copper is an ally against skin ageing, for adult a daily copper amount is recommended.

WATERPROOF
MATTRESS PROTECTOR

BREATHABLE JERSEY

50% Copper / 50% Recycled rPET

PERFORMANCE

1. Antistatic Property: It disperses electric charges accumulated from the external environment
2. Metabolic Property: If absorbed by the skin copper supports human body growth and its wellness.
3. Antioxidant Property: It allows to fight free radicals that cause skin's ageing
4. Transparent Property: It speeds up to moisture transfer process.
5. Heat Regulating Property: Keeps the temperature constant.

HOW COPPER WORKS

The innovative copper yarn is able to ensure human wellness thanks to its main properties perfect for three main essential uses:

- * bio-chemist use: it allows skin to absorb copper;
- * electro-magnetic use: as a resonant frequency;
- * bio-electric use: regulating microorganism.

This is an important discovery based on the ancient Cupro Therapy, that shows how copper can be assimilated by the skin, not only by eating or drinking.

REVITALIFE®

WELLNESS

[SUPEROXIDE DISMUTASE + CUPRUM]

COOLING: THERMAL REGULATION
reducing skin humidity, and keeps your body at a constant temperature through moisture wicking.

ANTIOXIDANT - ANTI AGEING - REJUVENATION
Moisture wicking speeds up the sweat evaporation process, Copper contains the superoxide dismutase enzyme: it has a strong antioxidant action that eliminates free radicals, the main cause of ageing therefore contributing to rejuvenate your body.

COOPER AGAINST AGEING

Copper is an ally against skin ageing, for adult a daily copper amount is recommended.

ANTISTATIC

The electricity charged from the environment or during workouts is absorbed and dispersed thanks to the resonant frequency of copper and the characteristic frequencies of the body. This helps to ground the mind in soul.

PERMANENT

Thanks to its structure, it maintains a constant effectiveness over time, even after many washings. For the life of the product.

WELLNESS - BENEFICIAL FOR HUMAN BODY
Copper is necessary for growth, metabolism development and good health.

COPPER FOR GROWTH

Copper is an essential element for children growth, especially for bones strength and for the support of the red and whiteblood cells production, cholesterol, heart contraction and brain development.

A survey on 300 people suffering from arthritis, who wore copper bracelets, showed that a significant number of them has received benefits from the bracelet.

REVITALIFE®

Odour Prevention
No bacteria. No odours, reduces the need for intensive cleaning and extends the lifespan of your products.

Viral Protection
It is tested and proven to reduce the cross contamination of viruses (including COVID-19).

Mould Prevention
Micro-fresh® prevents mould growing.

Hypoallergenic
Free from plastic and suitable for the most sensitive of skin types.

ULTRA-QUILTED
MICROFIBER SONIC

Benefits Of Bamboo Moisture Wicking

Bamboo has several advantages over other fabrics beyond its moisture-wicking properties: Eco-friendly Bamboo requires less water to grow than cotton and doesn't need harmful pesticides.

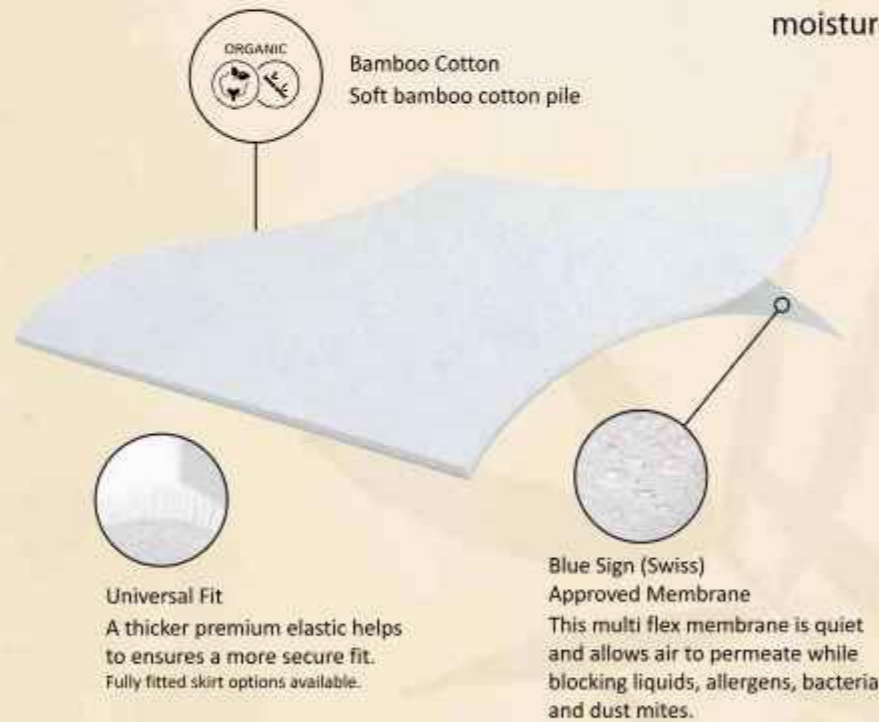

Using bamboo in place of cotton can reduce a product's carbon footprint significantly. Hypoallergenic

All organic bamboo fibers are naturally hypoallergenic due to being free from harsh chemical treatments. It makes it suitable for people with allergies or sensitive skin.

What does "moisture wicking" mean in relation to bamboo?

Moisture wicking refers to the ability of a fabric or material to draw moisture away from the skin and transfer it to the surface, where it can evaporate quickly. In relation to bamboo, this means that the fabric has the ability to keep you dry by absorbing sweat and other forms of moisture and moving them away from your body.

Bamboo fabric has natural wicking properties due its unique structure. The fibers are naturally porous, which allows for air circulation and aids in evaporation of any moisture that is absorbed by the fabric.

HYDROSTATIC HEAD PRESSURE TEST
BS EN 20811:1992
Area 100 cm²
SPECIMEN 1

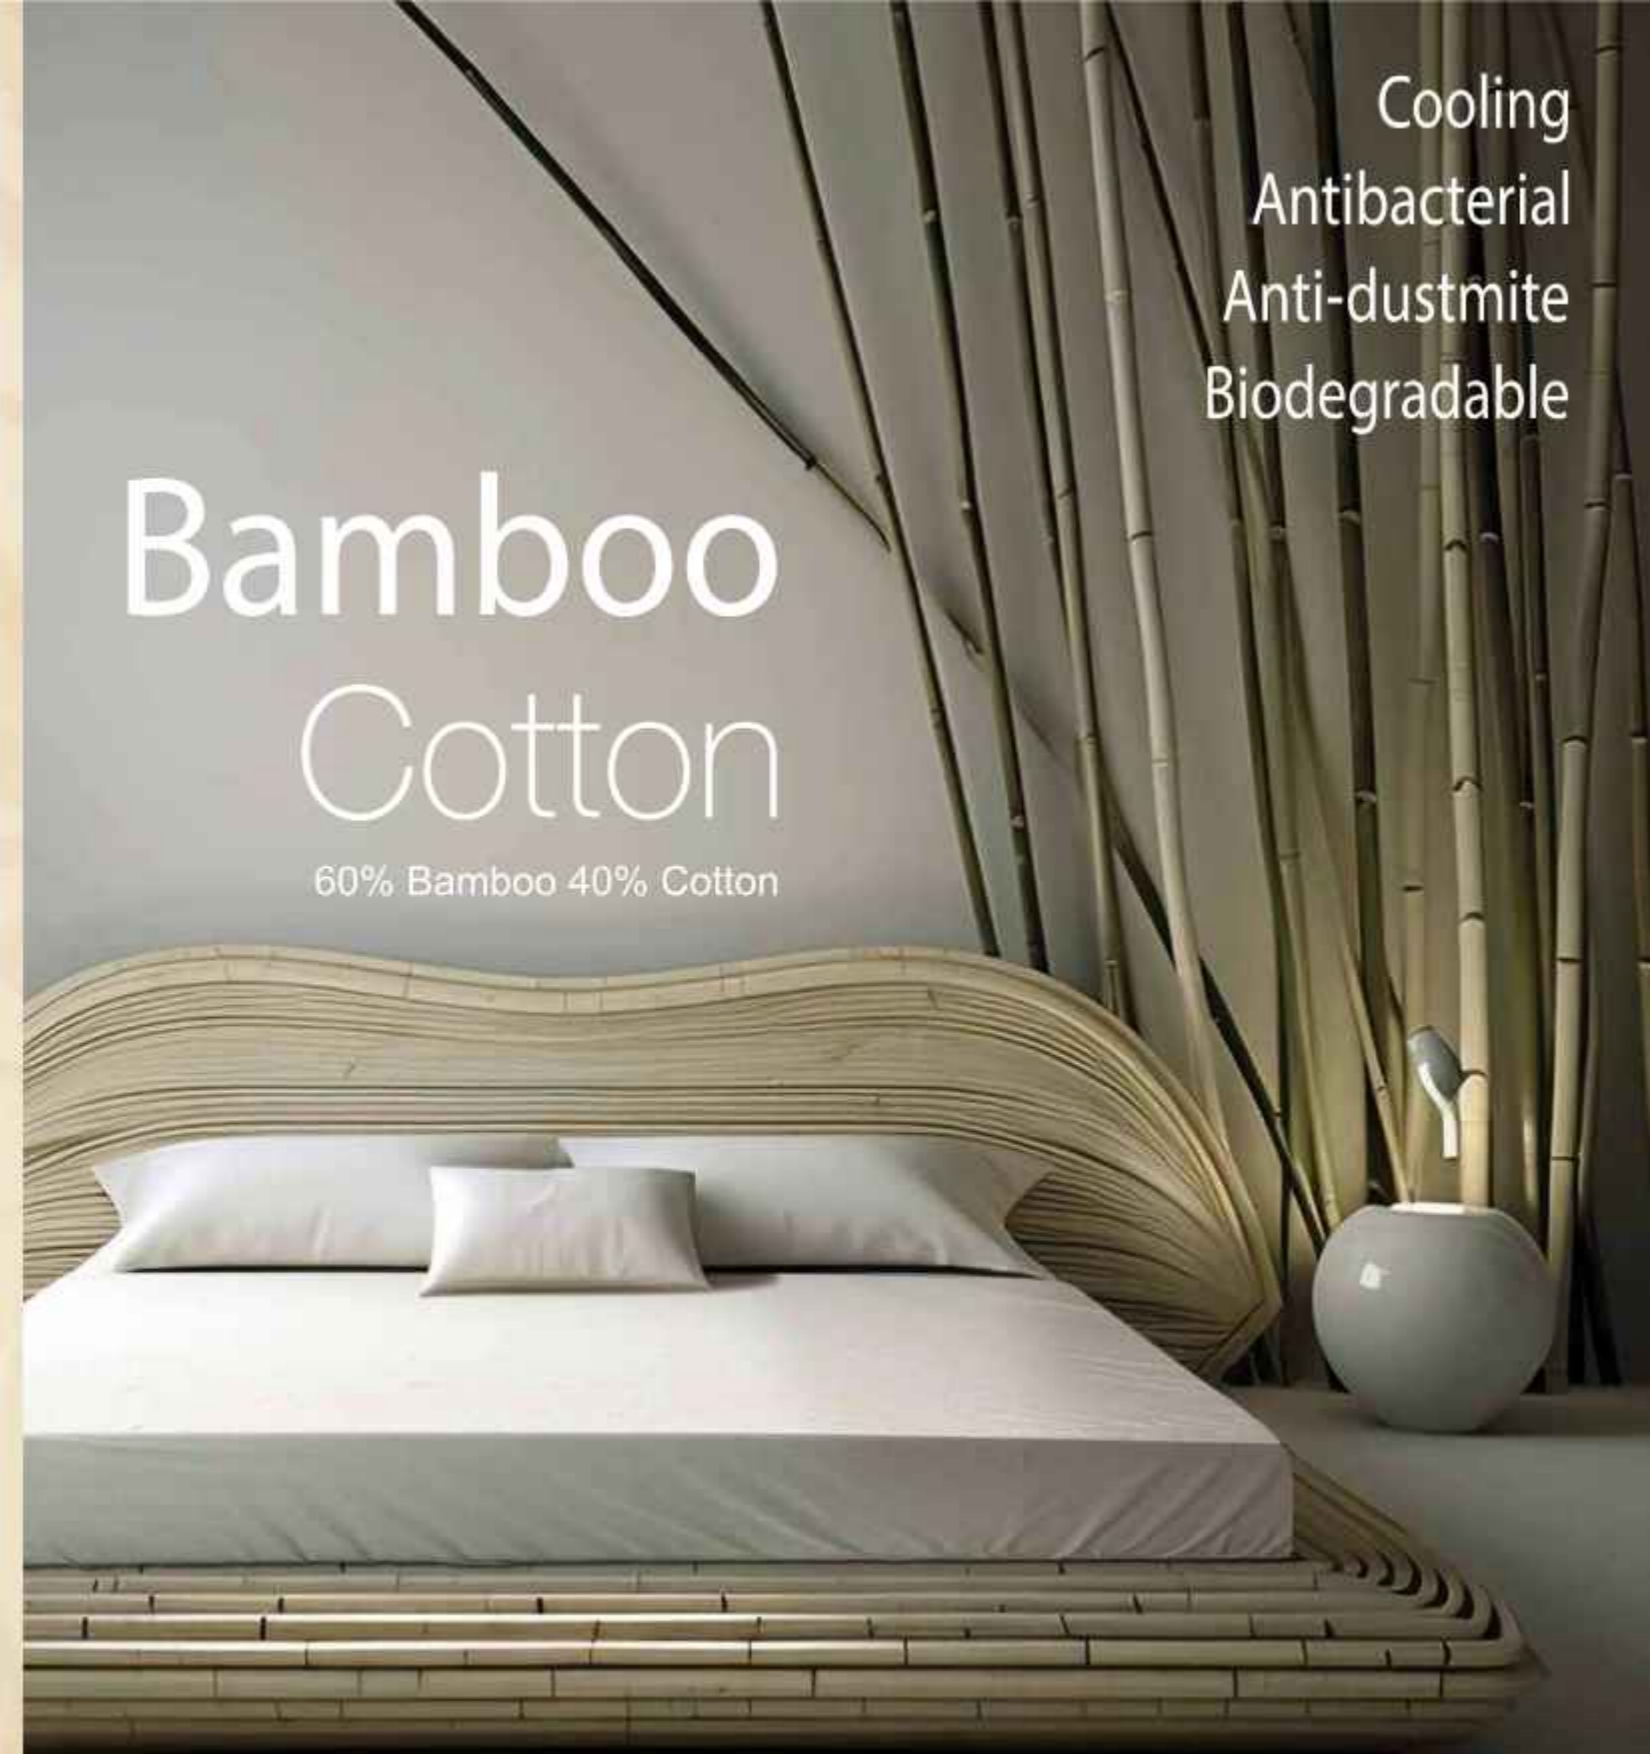

713*

Bamboo is considered one of the most effective fabrics at moisture-wicking compared with others like cotton or polyester due its unique structure. Bamboo fibers have a micro-structure filled with tiny gaps between individual cells that enhance breathability; this enables faster absorption rate. Moreover, unlike synthetic materials such as polyester which can trap odors over time because they do not breathe well enough – resulting in bacteria growth – Bamboo naturally resists bacterial growth making it an excellent choice.

RESULTS

Heat Absorption & Storage

Tests made according to **BS EN 16806-1: 2016** "Textiles Containing Phase Change Materials (PCM). Determination of the Heat Storage and Release Capacity" using a differential scanning calorimeter.

The **DSC** (Differential Scanning Calorimeter) is an instrument that measures any thermal transitions that occur in a material when it is subjected to a heating or a cooling process at a constant temperature ramp.

The enthalpy, or the amount of heat energy absorbed in the heating process (or released in the cooling process) by the **TOC** treatment is measured and quantified as joules/g (J/g) and shown as the curve in a thermogram. The amount of energy absorbed or released is characteristic of the PCM used and is known as the latent heat.

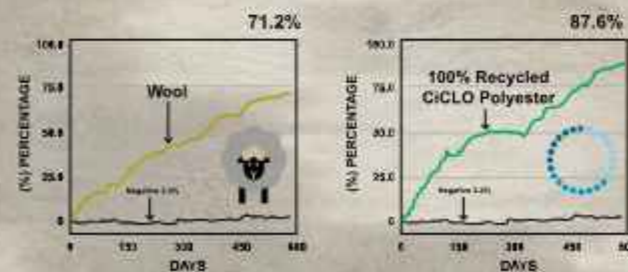

For easier comparison on textile substrates, the enthalpy in J/g is converted to J/m² by taking the fabric weight into consideration - a normalized form to present the thermal performance of textiles.

Sample ID	Heat storage and release capacity (J/m ²) (melting process) ⁽¹⁾		
	Unwashed	10 washes ⁽²⁾	Retention
Sample A Ref: T200 100% Cotton	1550 - 1800	950 - 1100	61%

(1) At least three tests are conducted in different areas of the sample.

(2) Based on ISO 6330:2012: A-4M.

**Synthetic fibers treated with
CiCLO® technology
biodegrade like natural materials,
at rates similar to wool.**

Comparative results of parallel tests run on wool samples along with 100% recycled CiCLO polyester.

bi·o·de·grad·a·ble
/ bīōde'grādəb(ə)l/

The ability of a substance to be broken down physically and/or chemically by microorganisms resulting in the production of basic natural elements including carbon dioxide, methane, water, minerals, and new microbial cellular constituents (biomass).

CiCLO \ sēklō \

Translation: "cycle"

Definition: A scientifically proven nature-based solution designed to reduce the persistence of fugitive synthetic (a.k.a. "plastic") microfiber pollution in our environment.

FABRIC: 100% BCI COTTON
FILLING: 100% BIODEGRADABLE RECYCLED POLYESTER

The OBP Program is designed to removal of Ocean Bound Plastic from the environment by adding value in effectively collecting and treating it before it reaches the ocean.

OCEAN BOUND PLASTIC WATERPROOF MATTRESS PROTECTOR

WITHIN THIS MORE EXTENSIVE DEFINITION, FOUR CATEGORIES OF OBP HAVE BEEN DEFINED IN THE OBP CERTIFICATIONS PROGRAM:

POTENTIAL OBP

Inadequately collected plastic waste located within a 50 km distance of the coastline

WATERWAYS OBP

Inadequately collected plastic waste located 200m from rivers & in rivers

SHORELINE OBP

Inadequately collected plastic waste located 200m from shores

FISHING MATERIAL

Used fishing gears and plastic bycatch

WHAT IS BEING VERIFIED AND CERTIFIED?

The Certification guarantees the respect of social, environmental, quality and traceability criteria:

- No child labour
- Fair working conditions
- Fair payments to the waste pickers

- Adequate waste management
- Having a quality management system

- Respect of OBP collection criteria from the first level of collection
- Traceability of OBP all along its journey

WHAT IS OBP?

Ocean Bound Plastic (OBP) is a type of plastic waste defined as "at risk of ending up in the ocean". It generates 80% of plastic marine litter and most of the time, does not have a commercial value.

OBP is an "Abandoned Plastic Waste" (microplastics, mezzo-plastics and macro-plastics), located within 50km from shores where waste management is inexistent or inefficient.

When already located in a landfill or managed dump site, the plastic waste is not considered as OBP.

However, when abandoned in an uncontrolled or informal dump site, this waste is considered as OBP.

70% OCEAN BOUND PLASTIC
30% RECYCLED POLYESTER

ANTI DUST MITE & ALLERGEN BARRIER
ANTI BACTERIAL

WHO IS ZERO PLASTIC OCEANS?

ZERO PLASTIC OCEANS.

70% OCEAN BOUND PLASTIC
30% RECYCLED POLYESTER

Concerned by the ever-increasing plastic pollution of the environment and the ocean in particular the founders started a model for companies to finance the collection of Ocean Bound Plastic (called ZPO Initiative)

biodegradable botanic origin TENCEL™ Lyocell fibers

COOL-TEMPERATURE REGULATING

waterproof mattress protector

TENCEL™ Lyocell fill keeps your mattress fresh and protected, with a moisture-wicking cooling boost to help prevent overheating while you sleep.

Offering moisture control and a cloud-like feel, TENCEL™ Lyocell fibers are nature's answer to a more refreshing night's sleep.

Plant-based Performance

Fiber

TENCEL™ Lyocell fibers

TENCEL™ Lyocell fibers have gained a commendable reputation for their closed loop production process, which transforms wood pulp into cellulose fibers with high resource efficiency and low environmental impact.

benefit

botanic origin

TENCEL™ Lyocell fibers are derived from sustainable wood sources – sustainably managed forests. Wood and pulp used by the Lenzing Group is harvested from certified and controlled sources.

benefit

biodegradable

All TENCEL™ standard Lyocell fibers are biodegradable and compostable under industrial, home, soil, fresh water and marine conditions, thus they can fully revert back to nature.

Suitable for duvets, pillows, covers and mattress protections

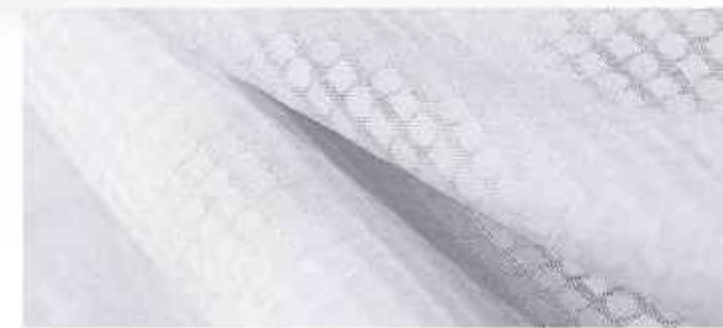

Outlast is a specialist in proactive heat management system for home textiles. The Heidenheim company uses a technology originally developed by NASA. The temperature regulating fabrics can be used in many different areas and products to add value in functionality and comfort. by using natural wax and the laws of physics.

The Outlast® thermo-technology proactively regulates heat and moisture to ensure a better, deeper sleep. As part of an independent study, various subjects have tried out bedding with Outlast® thermo-technology. The test participants ranged from women in the menopause to couples with different heat perceptions. The result: Thanks to Outlast® thermo-technology, temperature peaks in the microclimate can be minimized, which also successfully reduces sleep disorders caused by them.
