MESSAGE FROM OUR CHIEF EXECUTIVE OFFICER

Muhammad Saqlain Khan

Maheen Textile Mills (Pvt) Ltd:

Pioneering Excellence with Visionary Leadership

Since 2010, Maheen Textile Mills has emerged as a global leader in the home textiles industry, combining innovation, sustainability, and superior craftsmanship.

We celebrate a journey defined by resilience, achievement, and impact. I have embarked on my career in the textile industry in 1997, gaining invaluable experience and a deep understanding of the market's complexities. With a mission to redefine the "standards of quality and sustainability in home textiles".

Rising to Global Challenges with Purpose

Under my guidance, Maheen Textile Mills has consistently addressed the pressing global challenges of climate change, resource scarcity, and social inequality. These efforts have not only strengthened our operations but also contributed to creating a positive environmental and social impact.

Sustainability Leadership

A 52% verified reduction in carbon footprint achieved in 2025 and the launch of a 2 MW solar energy project in 2025 underline our commitment to eco-conscious manufacturing.

Operational Excellence

Strategic energy-saving measures, such as optimized RO plant schedules and energy-free cooling solutions, reflect our dedication to resource efficiency.

Empowering Communities

Initiatives to increase women's workforce participation by a further 18% by 2028 to demonstrate our commitment to inclusivity and equality. Through our partners like Kaarwan and their extensive network across Pakistan with the women of Pakistan from Rural areas and train them to bring to you beautiful commercial works of art, which are recognized by leading organizations such as; British Asian Trust, UN Women, UNESCO and together paving the way.

Crafting Products with Purpose

Maheen Textile Mills has built a reputation for delivering products that seamlessly blend innovation, quality, and sustainability. From institutional bedding and luxury linens to eco-friendly blackout curtains and advanced waterproof mattresses, every product reflects our commitment to excellence and functionality. Trusted by industries ranging from healthcare to aviation and hospitality, our solutions meet the diverse needs of a global clientele.

A Vision for the Future

As we look toward the future, as a CEO my leadership continues to inspire our journey as a company. In 2026, we aim to achieve 60% sustainable material usage in production, advancing to 80% by 2030. These milestones align with our vision of creating a sustainable, prosperous future for our customers, stakeholders, and the planet.

Our 15th anniversary in 2026 marked a significant milestone in our journey. It was a celebration of the trust of our partners, The ongoing dedication of our team, and my vision as a CEO, my commitment to innovation and sustainability has been the cornerstone of success.

Maheen Textile Mills is not just a company; it is a legacy of progress, a symbol of resilience, and a beacon of leadership. We are poised to shape the future of home textiles and leave an enduring mark on the global stage.

Being well means doing our part to protect our environment, our obligations, and our health. Come along with us as we explore smarter shopping.

HEALTH

Devoted to promoting a healthier lifestyle

COMMUNITY

Promoting local manufacturing to help communities

ENVIRONMENT

Even minor adjustments can make a difference. Making sustainable decisions to improve everyone's quality of life.

maheentex.com

Certified by Better Cotton Initiative (BCI), Which is a global sustainability standard that promotes better cotton farming practices. It focuses on reducing environmental impact of cotton production, improving livelihood and economic development in cotton-producing areas, and ensuring fair labor practices.

The STANDARD 100 by OEKOTEX® certification ensures no harmful finishes or chemicals are used in the production of these fabrics making them safe for your family and safe for the environment.

Certified by Global Organic Textile Standard, woven/knitted fabric from 100% certified organic cotton. Organic cotton is grown without chemicals or pesticides, contributing to cleaner soil, air & water.

Certified by Global Recycle Standard (GRS) for product made with recycle material. It verifies the recycled content of products and ensures responsible, social, environmental & chemical practices in production.

Certified by ISO 9001:2015 is an internationally recognised standards for quality management system (QMS). This certification emphasis a process based approach, continuous improvement & risk based thinking across all operations.

Certified by ISO 14001:2015 is an internationally recognised standard for environmental management system (EMS). This certification provides a framework for organization to manage their environmental responsibilities efficiently & sustainability.

FSC® -certified products are made with sustainability sourced wood from forests that are responsible managed.

Certified by amfori BSCI certification, that ensures companies must follow ethical sourcing and social compliance standard across their supply chain. It focuses on improving working conditions, promoting fair wages, safe workplace, no child labor and environmental responsibility.

UTILITY

Serenity, Elegance, and Luxury

50% Bamboo / 50% Cotton

LUMA WAFFLE THROW

LIGHT AS AIR
SOFT AS A HUSH.

Thread Count 300 gsm

Woven from a delicate balance of 50% bamboo and 50% cotton, the Luma Waffle Throw carries the essence of quiet luxury. At 300 GSM, it offers a feather-light warmth with a cloud-soft touch, perfect for layering over still moments. Its breathable texture, drawn from nature, makes it a timeless skin companion whether draped over a chair, across a bed, or around your shoulders. Slow down, wrap up, and let the light in.

Moisture Wicking
Wicks away skin moisture and evaporates it into the air.

Thermal Regulating
Instant Cooling for a comfortable sleep.

Hypoallergenic
Kind to your skin and keeps away bacteria.

Anti Dust Mite & Allergen Barrier

Refined fabric for refined stays elevate every guest experience.

WHY CHOOSE EGYPTIAN COTTON?

Egyptian cotton is the finest cotton available and is considered to be one of the most luxurious fabrics in the world.

The overall finish is velvety soft and smoother because of its lovely long staple fibres, and it simply becomes softer the more you wash it.

Egyptian cotton is not only incredibly lightweight and durable, but it is also highly absorbing and capable of retaining vibrant colours.

Merine

LUXURY 144 THREAD COUNT

The scalloped flange, highlight by the rich blue trims offer a graceful and tailored finish.

Hotel quality luxury with a soft yet more substantial feel.

CLASSIC 200 THREAD COUNT

REVITALIFE®

SLEEP WELL

[SHEA BUTTER + COLLAGEN]

REVITALIFE® sleep well contains shea butter, olive oil, silk amino, derived from silk protein giving our products a luxurious soft and silk touch. Whilst retraining your skin moisture when you sleep.

Bedding with Outlast® for a better sleep

The Outlast® thermo-technology proactively regulates heat and moisture to ensure a better, deeper sleep. As part of an independent study, various subjects have tried out bedding with Outlast® thermo-technology. The test participants ranged from women in the menopause to couples with different heat perceptions. The result: Thanks to Outlast® thermo-technology, temperature peaks in the microclimate can be minimized, which also successfully reduces sleep disorders caused by them.

Suitable for duvets, pillows, covers and mattress protections

Sustainable Odour Control Technology

BI-OME® NTL is a new, bio-based, non-harmful odour control technology which guarantees an optimal freshness and hygiene for all kinds of textiles. The active ingredient is seed oil, which is derived from the seeds of the Margosa plant.

Margosa Tree: Azadirachta indica, commonly known as neem, nimitree or Indian lilac belongs to family of medicinal plants.

YOUR ADVANTAGES

- Vegetal origin active ingredient
- 95 % biobased
- Active against microorganisms
- Prevents odour formation
- Anti-dustmite

Wash durable: product lifetime

Sustainable – Recyclable

GMO free: Halal, Kosher ingredients
EU registered active ingredients
TK BPR registered

ANTI-ALLERGY

REVITALIFE®

ANTI-ALLERGY

[PLANT BASED + VEGAN]

PLANT-BASED

A drive towards the use of more sustainable products has led to the introduction of alternative solutions to address this discomfort. Many plants and flowers produce antimicrobial chemicals as a defence mechanism towards threats like bacteria, fungi and moulds. More and more plant-based antimicrobials are used in food and cosmetics as a preservative. These plant-based, biocidal ingredients gave us inspiration to develop a new range of Odour Control Technology products.

Antimicrobial Technology

BI-OME® is a permanent, non-harmful odour control technology which guarantees an optimal freshness and hygiene for our bed linen.

Your Advantages

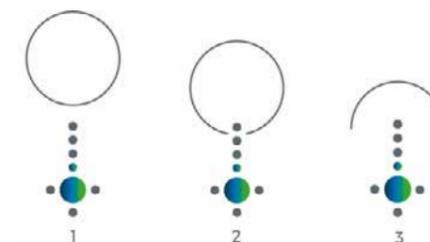

- Prevents odour formation
- Eliminates all types of microorganisms (bacteria, algae, fungi)
- Anti-dustmite

BI-OME® is different from silver based products because:

- No migration to the skin, nor the environment
- Excellent skin tolerance (OECD 406, HRIPT)
- Free of heavy metals, silver, TBT, formaldehyde, triclosan, arsenic
- Non toxic to waste water bacteria (activated sludge)
- Biodegradable (OECD 209/302B)
- BPR and EPA registered

biodegradable
performance plant based
permanent lifetime

- Antimicrobial**
1. Microorganisms are attracted by the fabric coating.
 2. Once in contact with the coating, their cell membrane is punctured.
 3. This deactivates the microorganism, preventing growth and proliferation.

A Journey Of Sustainability

We transform discarded plastic bottles into soft, durable fibers reducing waste and giving it new life. Our eco-friendly process uses clean solar power, minimizing environmental impact. Each product is a step toward a cleaner future crafted with precision, made with purpose.

ECO PILLOWS

Biodegradable

Filled with 100% soft non allergenic Fibers recycled from plastic and finished with a 100% cotton cover. The eco pillow provides the benefit of exceptional comfort while remaining environmental friendly.

ECO DUVETS

Biodegradable

The ECO duvet has a filling made of 100% recycled plastic bottles which have been extruded into soft, non-allergenic Fibers.

The filling of our Biodegradable duvets and pillows are made from recycled plastic bottles which are extruded into soft, non-allergenic Fibers. This process produces around 70% fewer carbon dioxide emissions, uses 70% less water and 40% less energy compared to standard Fiber production. Eco duvets and pillows also comply with the OEKO-TEX and are biodegradable.

ALOE SENSE

Microfiber Aloe Vera

Our 3D ReGen Fiber is made locally from recycled bottles, ensuring a SILKY SOFT feel as well as good washability, whilst protecting and restoring the environment.

REVITALIFE®

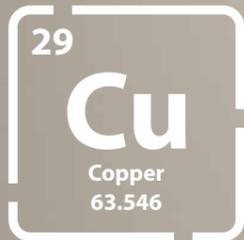

BODY REPAIR FORMULA

Superoxide Dismutase helps break down potentially harmful oxygen molecules in cells.

COPPER FOR GROWTH

Copper is a vital nutrient for a child's growth, playing a key role in bone strength, red and white blood cell production, cholesterol regulation, heart function, and brain development.

A survey on 300 people suffering from arthritis, who wore copper bracelets, showed that a significant number of them has received benefits from the bracelet.

HOW COPPER WORKS

The innovative copper yarn is able to ensure human wellness thanks to its main properties perfect for three main essential uses:

- * bio-chemist use: it allows skin to absorb copper;
- * electro-magnetic use: as a resonant frequency;
- * bio-electric use: regulating microorganism.

This is an important discovery based on the ancient Cupro Therapy, that shows how copper can be assimilated by the skin, not only by eating or drinking.

PERFORMANCE

1. Antistatic Property: It disperses electric charges accumulated from the external environment
2. Metabolic Property: If absorbed by the skin copper supports human body growth and its wellness.
3. Antioxidant Property: It allows to fight free radicals that cause skin's ageing.
4. Transparent Property: It speeds up to moisture transfer process.
5. Heat Regulating Property: Keeps the temperature constant.

COOLING: THERMAL REGULATION

Reducing skin humidity, and keeps your body at a constant temperature through moisture wicking.

ANTIOXIDANT - ANTI AGEING - REJUVENATION

Moisture wicking speeds up the sweat evaporation process, Copper contains the super oxide dismutase enzyme: it has a strong antioxidant action that eliminates free radicals, the main cause of ageing therefore contributing to rejuvenate your body.

COPPER AGAINST AGEING

Copper is an ally against skin ageing, for adults a daily copper amount is recommended.

ANTISTATIC

The electricity charged from the environment or during workouts is absorbed by the body and dissipated due to resonant frequency of copper and the body's characteristic frequencies. This helps ground the mind.

PERMANENT

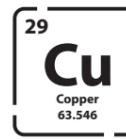

Thanks to its structure, it maintains a constant effectiveness over time, even after many washings. For the life of the product.

WELLNESS - BENEFICIAL FOR HUMAN BODY

Copper is necessary for growth, metabolism development and good health.

MICRONONE[®]
THE NEW STANDARD OF CLEAN™

The **MicronOne** Waterproof Mattress Protector delivers superior protection while supporting a cool, comfortable night's rest. Engineered with advanced fabric technology, **MicronOne** safeguards your mattress from accidental spills and everyday messes on all sides, while its breathable design promotes airflow to prevent heat build-up for a more restorative sleep. Like all **MicronOne** products, this range creates a trusted barrier against allergens, dust mites, and bed bug concerns.

REMOVABLE TOP

Built for lasting quality, every **MicronOne** protector features a waterproof shield reinforced seams for durability, a secure fit that stays smooth and wrinkle-free, and stretchable side panels designed to fit any mattress depth. Even after years of regular use and washing, **MicronOne** remains a reliable, tear-resistant layer of protection you can count on.

*Approved Manufacturer
& Worldwide Distributor*

**CERTIFICATION
BED BUG PROOF**

"Independent testing confirmed that no bed bugs escaped our encasement, compared to an average **53%** escape rate in ordinary products"

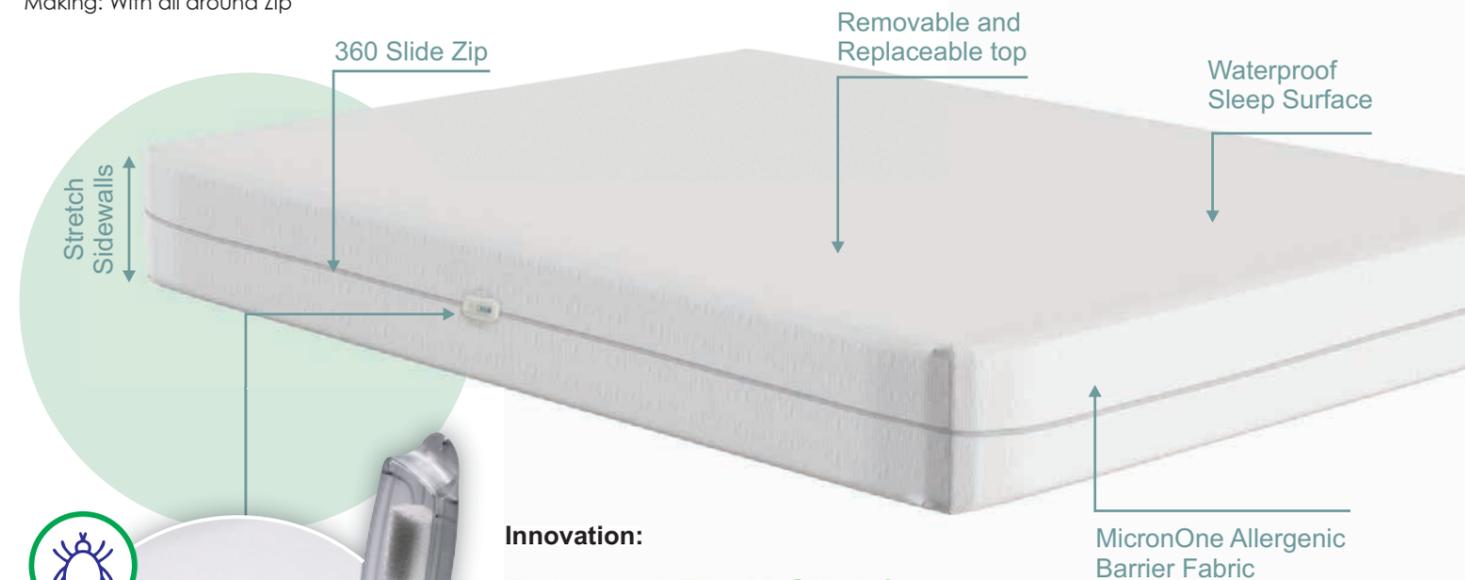

How MicronOne Works

MicronOne is a next-generation bedding protection system designed with four-way protection to safeguard against allergens, dust mites, bed bugs, and micro-toxins. Its stretchable fabric with a removable top ensures both comfort and convenience. Easy to fit and engineered for breathability, **MicronOne** delivers a healthier, cooler, and more hygienic sleep environment night after night.

Top Body & Top Skirt: 100% Polyester Interlock Mesh 130 GSM with Water Repellent & Breathable Lamination
Lower Body & Lower Skirt: 100% Polyester Interlock Mesh 120 GSM
Making: With all around Zip

Innovation:

Patented Zip-N-Click® Closure

- ✓ For bed bug protection
- ✓ Replaces Velcro flaps that are not secure and harbor bed bugs
- ✓ Does away with zip ties that require dangerous razor knives to remove
- ✓ Used on 1.5 million+ hotel beds

How MicronOne Works

MicronOne is a next-generation bedding protection system designed with four-way protection to safeguard against allergens, dust mites, bed bugs, and micro-toxins. Its stretchable fabric with U-shape opening in select designs provides complete coverage, blocking particles from every possible angle.

Easy to fit and engineered for breathability, MicronOne delivers a healthier, cooler, and more hygienic sleep environment night after night.

PRO MATTRESS ENCASEMENT

Top Body: 100% Polyester Interlock 130 GSM with Breathable Lamination
 Lower Body & Skirt: 100% Polyester Interlock 120 GSM
 Making: With Zip across the width on bottom side.

MATTRESS ENCASEMENT

Mattress Encasement is designed to gently shield your mattress from everyday spills and accidents with a water-repellent finish. Unlike laminated waterproof protectors, Encasement maintains a natural fabric feel, breathable comfort, and quiet flexibility-keeping your sleep environment fresh and cozy.

MICRONONE
 THE NEW STANDARD OF CLEAN™

What is MicronOne

MicronOne Technology

MicronOne is Fabric innovation, engineered with microscopic 1-micron pores that block allergens like dust mites, pollen, and pet dander, while also preventing bed bugs and micro-toxins from passing through. Unlike traditional protective fabrics,

MicronOne maintains airflow for cool, breathable comfort without trapping heat. Safe from harmful chemicals and easy to wash, it combines advanced protection with everyday practicality to create a healthier, cleaner sleep environment.

WHY MicronOne IS NEEDED ?

MicronOne encasements protect you and your family from harmful allergens, micro-toxins, dust mites, bed bugs, and the buildup of their fecal matter over time in any mattress, box spring, or pillow.

MicronOne is one of the most trusted and advanced sleep and bedding protection product lines, featuring cutting-edge fabric technology for lasting comfort and safety. Each MicronOne product is crafted with unique attributes, features, and benefits to deliver complete peace of mind and healthier sleep.

FITTED MATTRESS PROTECTOR

Body: 100% Polyester Interlock 130 GSM with Breathable Lamination
 Skirt/Frill: 100% Polyester Interlock 100 GSM
 Making: All-around elastic

Mechanically eliminates harmful pathogens and mitigates the growth of mold and fungus.

Mitigates the growth of odor-causing bacteria.*

Prevents damage from harmful ultraviolet light.

Breaks up surface tension of water, speeding drying times and enhancing wicking/cooling properties.

Permanent application: Testing shows 0mg in waste water after 20 washes.

Reduces micro pollutants in the environment, and does not affect the recyclability of the treated fabric.

Other fabric treatments prevent textiles from being able to be recycled. If it could be recycled before being treated with FUZE, it can be recycled after being treated with FUZE.

Waterproof Mattress Protector

FUZE textile treatment is a chemical-free, water-based solution that permanently adheres to the fabric without any binders.

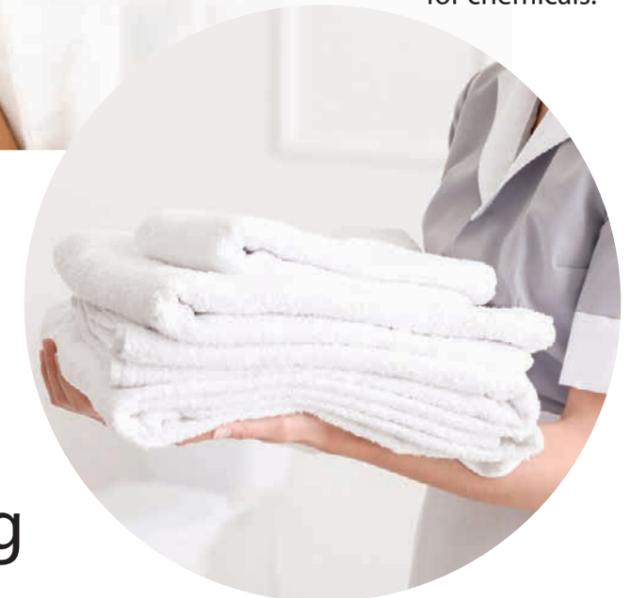

FUZE uses elements taken from the earth to help our planet by reducing the need for chemicals.

The most environmentally sustainable hospitality focused textile treatment technology ever invented.

Moisture Wicking Cooling

Your Advantages

- Prevents odour formation
- Eliminates all types of microorganisms (bacteria, algae, fungi)
- Anti dustmite

Other fabric treatments prevent textiles from being able to be recycled. If it could be recycled before being treated with FUZE, it can be recycled after being treated with FUZE.

biopure.™

Smart Temp uses a patented hydro-functional polymer

The importance of body temperature control

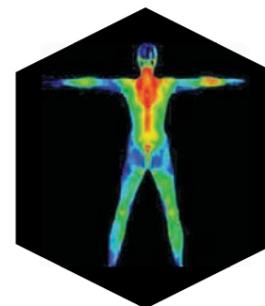

- The hypothalamus is regulating the **internal temperature** of the body and its vital organs (36,5-37,5 °C)
- The body uses various physical processes to **generate** and maintain heat (metabolism, muscle action) **OR** to **reduce heat** (conduction, convection, radiation and evaporation)
- One important mechanism to prevent overheating is the production of sweat, resulting in **evaporative cooling**

How the skin regulates body temperature

- 2 mechanisms: blood vessels and sweat glands
- Cold: shivering, blood vessels contract and maintain heat
- Warm: blood vessels enlarge and bring more blood to the skin surface where heat is released and **sweat glands** secrete sweat onto the skin surface and the 99% water evaporates and extracts heat

HeiQ Smart Temp

CiCLO®

SUSTAINABLE TEXTILE TECHNOLOGY

We use breathable eco friendly membrane with multi flex features for maximum comfort.

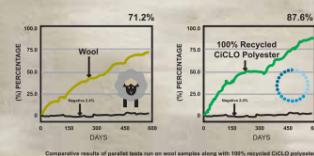

Absorbent multi layers keep you dry.

Our products are washable at 90°C. for up to 50 washes.

Synthetic fibers treated with CiCLO® technology biodegrade like natural materials, at rates similar to wool.

WATERPROOF MATTRESS PROTECTOR

100% BIODEGRADABLE RECYCLED POLYESTER FILLING

Micro-Fresh®
FRESHER FOR LONGER

Universal Fit
A thicker premium elastic helps to ensure a more secure fit.
Fully fitted skirt options available.

This multi flex membrane is quiet and allows air to permeate while blocking liquids, allergens, bacteria and dust mites.

HYDROSTATIC HEAD PRESSURE TEST
BS EN 20811:1992
Area 100 cm²
SPECIMEN 1 >1000*

Odour Prevention
No bacteria, No odours, reduces the need for intensive cleaning and extends the lifespan of your products.

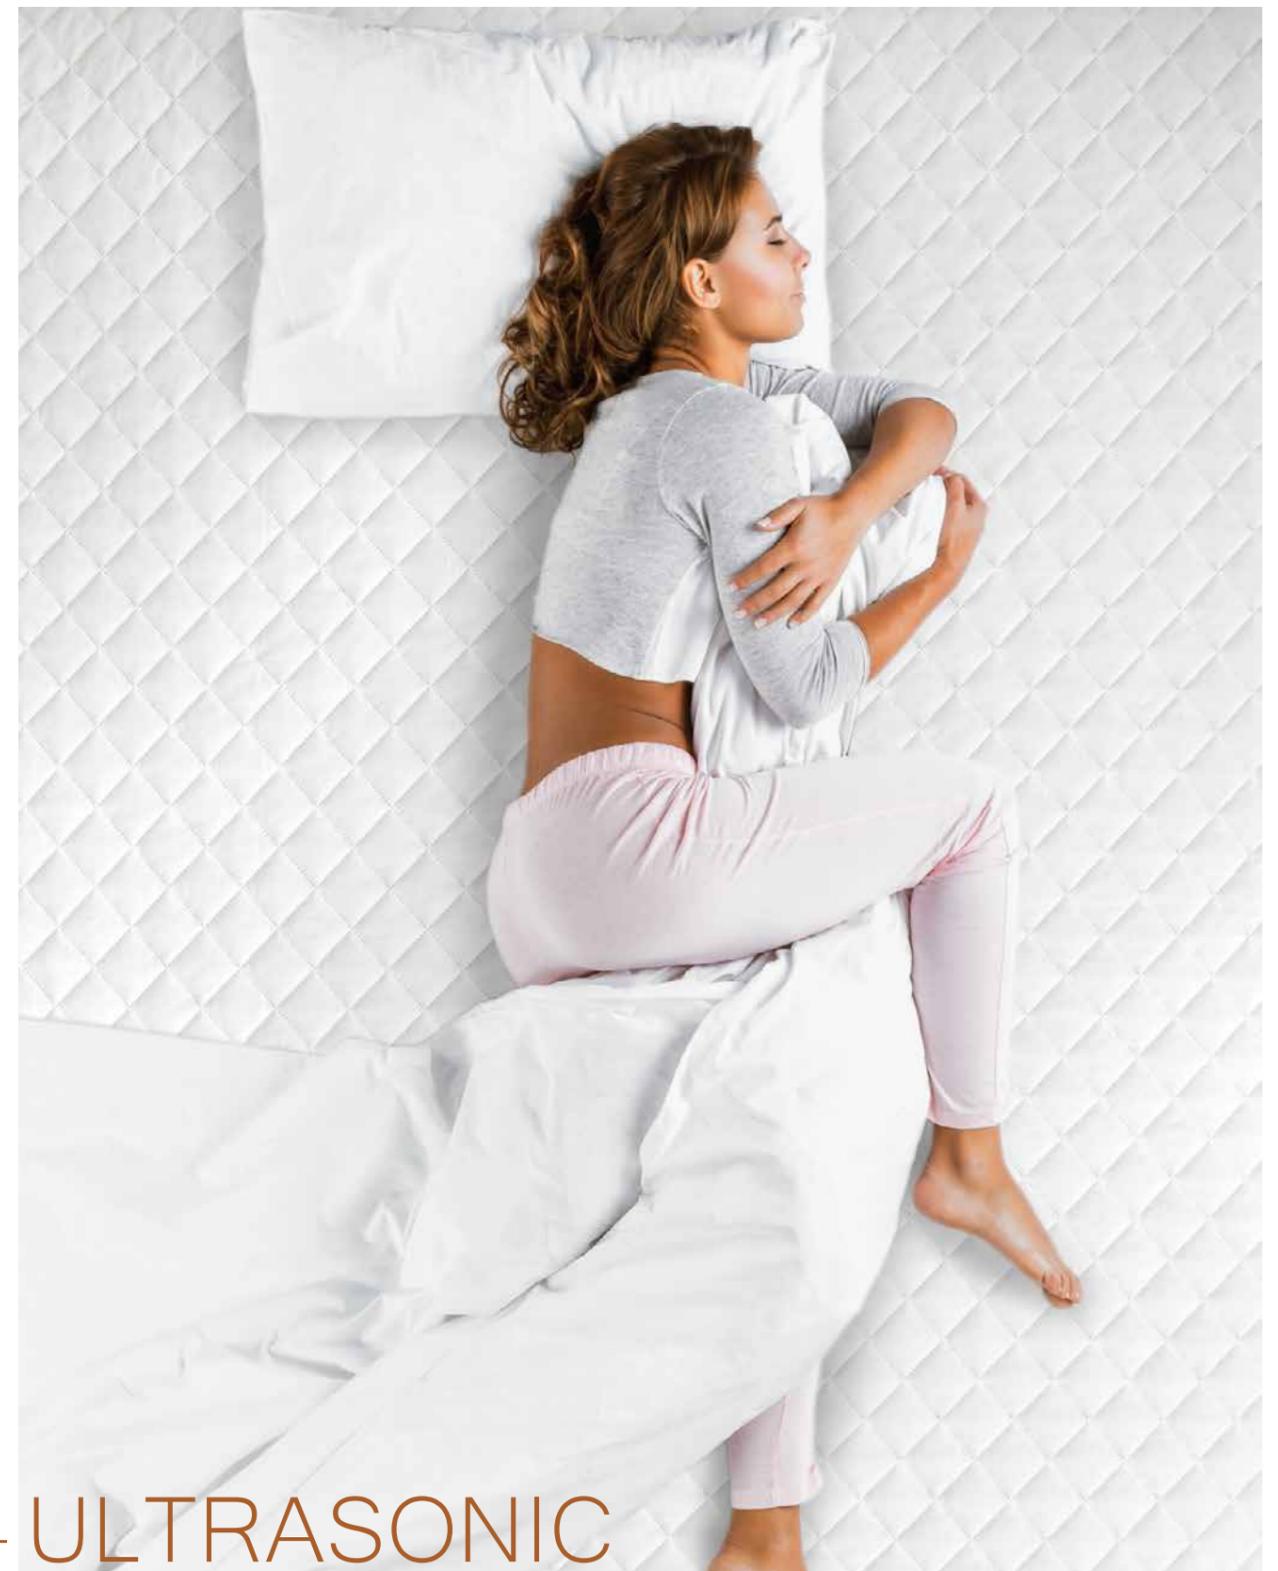

Viral Protection
It is tested and proven to reduce the cross contamination of viruses (including COVID-19).

Mould Prevention
Micro-fresh® prevents mould growing.

Hypoallergenic
Free from plastic and suitable for the most sensitive of skin types.

ULTRASONIC MICROFIBER QUILTED

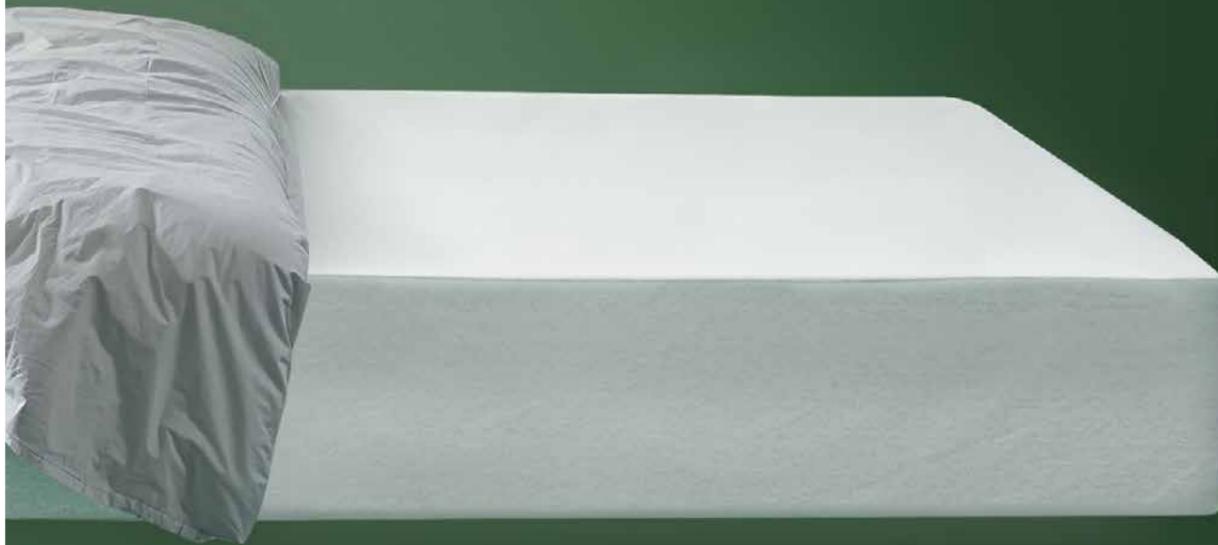

Experience the fusion of modern technology and everyday comfort with our Ultrasonic Microfiber Quilted collection. Crafted using advanced ultrasonic quilting stitch-free, seamless, and durable this design ensures long-lasting quality without compromising softness. The ultra-fine microfiber fabric offers a smooth, breathable, and lightweight touch, making it perfect for all seasons. A clean, elegant pattern adds a refined look to your bedroom while resisting wrinkles and wear. Ideal for both luxury and daily use, it's comfort redefined through innovation.

BAMBOO COTTON

60% Bamboo 40% Cotton

- Cooling
- Antibacterial
- Anti-dustmite
- Biodegradable

Stronger and more durable better wrinkle resistance
smooth silky softness Naturally resistant to weak acids.
Biodegradable Antistatic Properties in Nature.

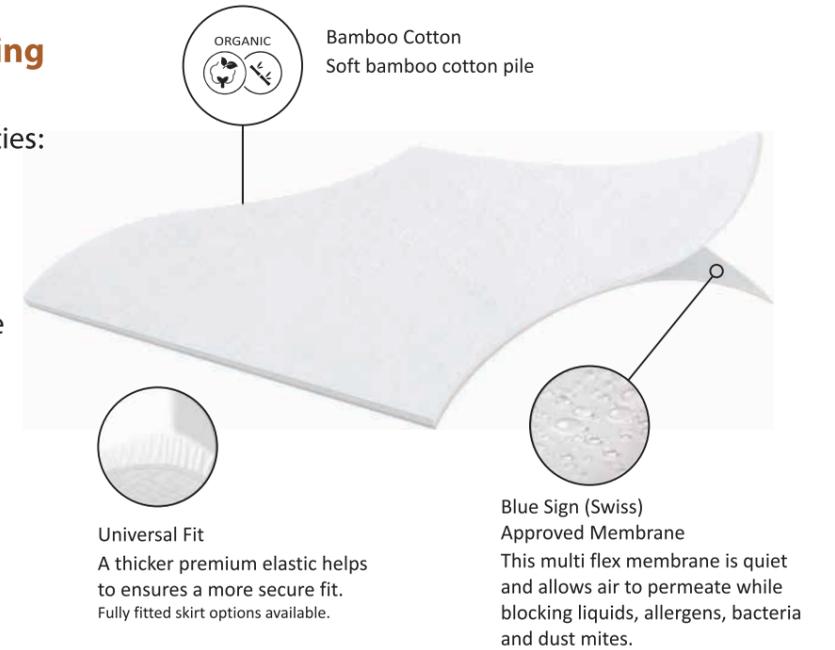

Benefits Of Bamboo Moisture Wicking

Bamboo has several advantages over other fabrics beyond its moisture-wicking properties: Eco-friendly Bamboo requires less water to grow than cotton and doesn't need harmful pesticides.

Using bamboo in place of cotton can reduce a product's carbon footprint significantly.

Hypoallergenic

All organic bamboo fibers are naturally hypoallergenic due to being free from harsh chemical treatments. It makes it suitable for people with allergies or sensitive skin.

Universal Fit
A thicker premium elastic helps to ensure a more secure fit. Fully fitted skirt options available.

Blue Sign (Swiss) Approved Membrane
This multi flex membrane is quiet and allows air to permeate while blocking liquids, allergens, bacteria and dust mites.

FLANNELL

What does "moisture wicking" mean in relation to bamboo?

Moisture wicking refers to the ability of a fabric or material to draw moisture away from the skin and transfer it to the surface, where it can evaporate quickly. In relation to bamboo, this means that the fabric has the ability to keep you dry by absorbing sweat and other forms of moisture and moving them away from your body.

Bamboo fabric has natural wicking properties due to its unique structure. The fibers are naturally porous, which allows for air circulation and aids in evaporation of any moisture that is absorbed by the fabric.

Bamboo is considered one of the most effective fabrics at moisture-wicking compared with others like cotton or polyester due its unique structure. Bamboo fibers have a micro-structure filled with tiny gaps between individual cells that enhance breathability; this enables faster absorption rate. Moreover, unlike synthetic materials such as polyester which can trap odors over time because they do not breathe well enough – resulting in bacteria growth – Bamboo naturally resists bacterial growth making it an excellent choice.

Moisture Wicking
Wicks away skin moisture and evaporates it into the air.

Thermal Regulating
Instant cooling for a comfortable sleep.

Hypoallergenic
Kind to your skin and keeps away bacteria.

Anti Dust Mite & Allergen Barrier

RESULTS

Heat Absorption & Storage

Tests made according to BS EN 16806-1: 2016 Textiles Containing "Phase Change Materials" (PCM).

"Determination of the Heat Storage and Release Capacity" using a differential scanning calorimeter.

The DSC (Differential Scanning Calorimeter) is an instrument that measures any thermal transitions that occur in a material when it is subjected to a heating or a cooling process at a constant temperature ramp.

The enthalpy, or the amount of heat energy absorbed in the heating process (or released in the cooling process) by the TOC treatment is measured and quantified as joules/g (J/g) and shown as the curve in a thermogram. The amount of energy absorbed or released is characteristic of the PCM used and is known as the latent heat.

For easier comparison on textile substrates, the enthalpy in J/g is converted to J/m² by taking the fabric weight into consideration – a normalized form to present the thermal performance of textiles.

Sample ID	Heat storage and release capacity (J/m ²) (melting process) ⁽¹⁾		
	Unwashed	10 washes ⁽²⁾	Retention
Sample A Ref: T200 100% Cotton	1550 - 1800	950 - 1100	61%

(1) At least three tests are conducted in different areas of the sample.

(2) Based on ISO 6330:2012: A-4M.

QUILTED WATERPROOF MATTRESS PROTECTOR

Engineered for comfort and protection, the Biofrost Quilted Waterproof Mattress Protector combines advanced functionality with a soft, breathable quilted surface.

Synthetic fibers treated with
CiCLO® technology
biodegrade like natural materials,
at rates similar to wool.

Comparative results of parallel tests run on wool samples along with 100% recycled CiCLO polyester.

bi·o·de·grad·a·ble
/ bīōde'grādəb(ə)l/

The ability of a substance to be **broken down physically and/or chemically by microorganisms resulting in the production of basic natural elements** including carbon dioxide, methane, water, minerals, and new microbial cellular constituents (biomass).

CiCLO \ sēklō \

Translation: "cycle"

Definition: A scientifically proven nature-based solution designed to reduce the persistence of fugitive synthetic (a.k.a. "plastic") microfiber pollution in our environment.

FABRIC: 100% BCI COTTON
FILLING: 100% BIODEGRADABLE RECYCLED POLYESTER

The OBP Program is designed to removal of Ocean Bound Plastic from the environment by adding value in effectively collecting and treating it before it reaches the ocean.

OCEAN BOUND PLASTIC WATERPROOF MATTRESS PROTECTOR

WITHIN THIS MORE EXTENSIVE DEFINITION, FOUR CATEGORIES OF OBP HAVE BEEN DEFINED IN THE OBP CERTIFICATIONS PROGRAM:

POTENTIAL OBP

Inadequately collected plastic waste located within a 50 km distance of the coastline

WATERWAYS OBP

Inadequately collected plastic waste located 200m from rivers & in rivers

SHORELINE OBP

Inadequately collected plastic waste located 200m from shores

FISHING MATERIAL

Used fishing gears and plastic bycatch

WHAT IS BEING VERIFIED AND CERTIFIED?

The Certification guarantees the respect of social, environmental, quality and traceability criteria:

No child labour
Fair working conditions
Fair payments to the waste pickers

Adequate waste management
Having a quality management system

Respect of OBP collection criteria from the first level of collection
Traceability of OBP all along its journey

WHAT IS OBP?

Ocean Bound Plastic (OBP) is a type of plastic waste defined as “at risk of ending up in the ocean”. It generates 80% of plastic marine litter and most of the time, does not have a commercial value.

OBP is an “Abandoned Plastic Waste” (microplastics, mezzo-plastics and macro-plastics), located within 50km from shores where waste management is inexistent or inefficient.

When already located in a landfill or managed dump site, the plastic waste is not considered as OBP.

However, when abandoned in an uncontrolled or informal dump site, this waste is considered as OBP.

70% OCEAN BOUND PLASTIC
30% RECYCLED POLYESTER

ANTI DUST MITE & ALLERGEN BARRIER
ANTI BACTERIAL

ZERO PLASTIC OCEANS.

70% OCEAN BOUND PLASTIC
30% RECYCLED POLYESTER

WHO IS ZERO PLASTIC OCEANS?

Concerned by the ever-increasing plastic pollution of the environment and the ocean in particular the founders started a model for companies to finance the collection of Ocean Bound Plastic (called ZPO Initiative)

Eucalyptus

biodegradable botanic origin TENCEL™ Lyocell fibers

COOL-TEMPERATURE REGULATING waterproof mattress protector

TENCEL™ Lyocell fill keeps your mattress fresh and protected, with a moisture-wicking cooling boost to help prevent overheating while you sleep.

Offering moisture control and a cloud-like feel, TENCEL™ Lyocell fibers are nature's answer to a more refreshing night's sleep.

Plant-based Performance

fiber

TENCEL™ Lyocell fibers

TENCEL™ Lyocell fibers have gained a commendable reputation for their closed loop production process, which transforms wood pulp into cellulosic fibers with high resource efficiency and low environmental impact.

benefit

botanic origin

TENCEL™ Lyocell fibers are derived from sustainable wood sources - sustainably managed forests. Wood and pulp used by the Lenzing Group is harvested from certified and controlled sources.

benefit

biodegradable

All TENCEL™ standard Lyocell fibers are biodegradable and compostable under industrial, home, soil, fresh water and marine conditions, thus they can fully revert back to nature.

- Thermal Regulating: Keep you warm in winter and cool in summer.
- Moisture Wicking: Wicks away skin moisture and evaporates it into the air.
- Anti Dust Mite & Allergen Barrier
- Hypoallergenic: Kind to your skin and keeps away bacteria.

PLANT-BASED PERFORMANCE

TENCEL™ Waterproof Mattress Protector is an eco-friendly mattress protector made from new age eucalyptus pulp fibre, Tencel Silky-smooth, antibacterial and can wick 50% more moisture than cotton.

This luxury Tencel® mattress protector is as gentle on your skin as it is on the planet. Made from a micro-thin, stretch-knit Tencel® fabric, bonded onto a whisper quiet waterproof backing, this is the ultimate in single-layer mattress protectors.

- Thermal Regulating: Instant cooling for a comfortable sleep.
- We use breathable eco friendly membrane with multi flex features for maximum comfort.
- Our products are washable at 90°C. for up to 50 washes.
- Soft: Pre-washed and stays soft wash after wash

{ PETA - APPROVED VEGAN }

FLANNELETTE WATERPROOF PROTECTOR

ORGANIC COMFORT & PROTECTION

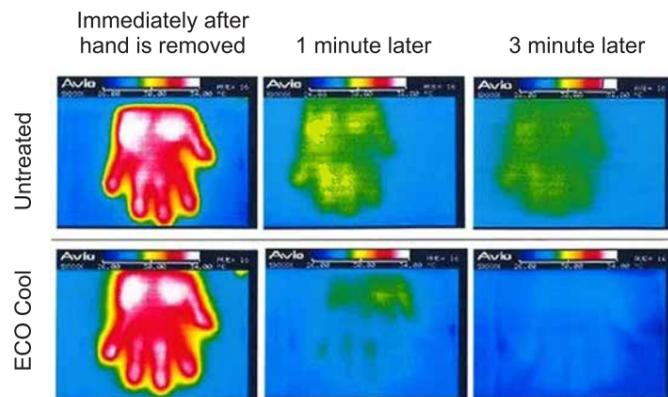

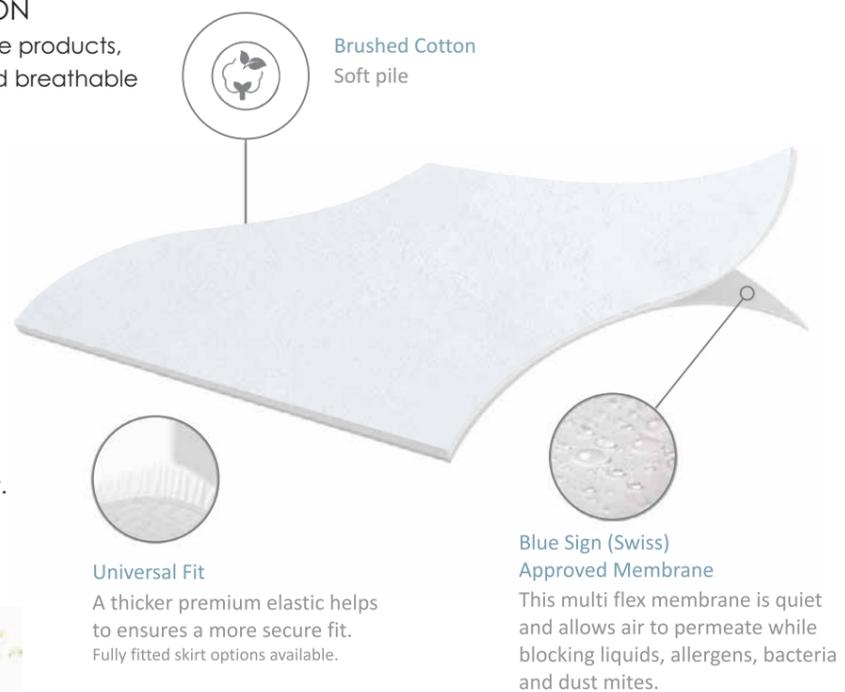

Because our mission is creating sustainable products, we prefer our fully organic, absorbent and breathable Organic Cotton Mattress Pad Protector.

This is why we made this Organic Waterproof Mattress Protector.

This lightweight pad is waterproof, machine-washable, and dependable in protecting your mattress from life's little accidents.

The waterproof polyurethane is thin, so it doesn't have a plastic-like crinkle or rubbery noise, and you won't overheat.

Plus with its layer of soft GOTS organic certified cotton

Our products are washable at 95°C. for up to 50 washes.

We use breathable eco friendly membrane with multi flex features for maximum comfort.

3 LAYER WATERPROOF

Engineered for ultimate defense and comfort, our 3-layer waterproof design features a breathable top layer, an absorbent middle core, and a protective TPU backing. This advanced structure blocks liquids, prevents stains, and allows air circulation keeping your mattress fresh, dry, and comfortable. Quiet, durable, and perfect for everyday use.

- Lyocell Fabric has more sustainability as compared to Normal Cotton
- Lyocell is stronger and durable than Normal cotton / Viscose
- Lyocell has wrinkle resistance as compare to Normal Cotton
- Lyocell has Excellent breathability and keep you cool as compare to Normal Cotton
- Lyocell smooth silky softness.
- Lyocell is Resistant to dilute alkalis, weakened by strong acids
- Lyocell is Biodegradable
- Lyocell Burns slow as compare to cotton
- Lyocell is not Prone to Static.
- Recommended washing based on 50% BCI cotton 50% Lyocell is 60 degrees.

Sustainable

VORTEX gives the twist of the fibre by air, not by using any rotating parts like other spinning systems. Rotating parts require more energy to speed up, but VORTEX has comparatively lesser energy consumption even though the speed is increased.

One characteristic of VORTEX yarn is that it is less hairy, this makes it possible to reduce the sizing in the weaving process, leading to possible reduction in greenhouse gases. Also, the VORTEX yarn's structure allows for less lint shedding potentially making it gentle to water when products are washed. VORTEX yarns are also more wash resistant and anti-pilling, making products last longer and therefore become more sustainable.

The overall advantages of vortex yarn over the ring and rotor yarns:

- **Better resistance to pilling and abrasion:** This gives longer-lasting fabric performance through a greater number of washing cycles. Uses less chemicals in finishing.
- **Less hairiness:** This reduces potential problems in fabric production and gives a smooth appearance to the fabric.
- **Less shrinkage:** Unlike ring spun yarn, the structure of VORTEX yarns means they are less prone to shrink.
- **Moisture absorption and drying:** The looser structure of fibres at the centre of vortex yarns means that they absorb moisture and dry quickly.

BEDDING: POLYCOTTON
 Poly cotton is hard-working, comfortable, Durable and practical.
 Ideal for hospitals, nursing homes and other Healthcare uses.

Qualities range from 130gsm plus
 Suitable for Laundering at thermal disinfection temperatures

OPTIONS:

50washes
Compliant with
BS7175 Source 5

Duvet Production

Multi Needle

Our Digital Multi Needle Machines are wider width with auto thread & reverse stitching options, helping to create your perfect quilting patterns

Single Needle

Our digital Single Needle Machines can create any design possibly imaginable.

Pillow Production

Fully automatic blown fill line

our automated pillow production converts raw fibre into open fibre and also directly into ball fibre, before being blown directly into the shaken pillow.

(weight variance +-20grams).
