The ability of a substance to be broken down physically and/or chemically by microorganisms resulting in the production of basic natural elements including carbon dioxide, methane, water, minerals, and new microbial cellular constituents (biomass).

The filling of our **Biodegradable** duvets and pillows are made from recycled plastic bottles which are extruded into soft, non-allergenic fibres. This process produces around 70% fewer carbon dioxide emissions, uses 70% less water and 40% less energy compared to standard fibre production. Eco duvets and pillows also comply with the **OEKO-TEX** and are **biodegradable**.
