

FESTIN POUR LE SOL • FEAST FOR THE SOIL

MIX Boost

All purpose
natural fertilizer

3.5 - 9 - 4

8% Ca

2% Mg

ROOTER,
EFFICIENT AT PLANTATION AND
IN MAINTENANCE

IDEAL
FOR
POTTED
CULTURES

PRODUCE HEALTHIER AND MORE PRODUCTIVE PLANTS!

- Fine granular fertilizer not soluble
- Rich in phosphate, magnesium and calcium
- Doesn't contain manure, nor any industrial animal byproducts
- Promotes growth and bloom
- Authorised in organic cultures

Ingredients : organic fishbone, organic alfalfa meal, organic soy meal, organic shrimp meal, rock phosphate, steatite, potassium sulfate omri.

INSTRUCTIONS

GERMINATED SEED TRANSFER

Incorporate 150g (3/4cup.) / 30L of potting soil. 5g (1/2tsp) per container of 11cm (4").

GARDEN AND LANDSCAPE

Apply 600g (3cups) / 10m² (107ft²).
Incorporate into the soil.

POT TO SOIL TRANSPLANT

Cell-pack plants and plants in pots of 9-11cm (3-4") : Apply 30g (1tbsp).
1 gal. container : Apply 40g
10 gal. container : Apply 100g

IN POT CULTURES

Vegetables and annual plants :

Add 1g / L of soil. Ex: 100g (1/3cup.) / container of 15 gal.
Repeat application every 4 to 6 weeks.

Tropical, perennial, bush, and trees :

Add 1g / L of soil once per year.

At plantation or during maintenance, apply the fertilizer, incorporate into the soil and then water.

To activate life in the soil, in the spring, add a good quality compost and mycorrhizae and apply CARENCE LIQUID SEAWEED.

***DO NOT DILUTE IN WATER.**

MIX Boost

Each of **MIX MINERAL'S** ingredients has its own characteristics and has been carefully chosen for very specific reasons, namely to increase the yield of your plants by providing them with the nutrients they need and to improve soil fertility.

WITH THESE 7 INGREDIENTS, THIS AMENDMENT IS A TRUE FEAST FOR THE SOIL.

FISH BONE MEAL: Very rich in phosphates. Stimulates soil biology. Promotes flowering, resistance to cold, disease and insects. Its action is progressive and lasting, without risk of burns.

ORGANIC ALFALFA MEAL: Amendment containing organic matter and nitrogen. It promotes the biological activity of the soil and the life of composting worms.

ORGANIC SOYBEAN MEAL: Rich in nitrogen which helps plants grow.

ORGANIC SHRIMP MEAL: Source of

nitrogen, phosphate and calcium. Also contains chitin, a biostimulant.

FOSSIL BONE: Rich in phosphate (natural mineral phosphate) and calcium.

STEATITIS: Amendment rich in magnesium.

OMRI POTASSIUM SULPHATE: Source of potassium and sulfur. Potassium helps in the rigidity of the stems and supports the plants in their production of flowers and fruits.

ANALYSE MINIMUM GARANTIE

Nitrogen	3,5%
Phosphate P2O5	9,2%
Phospate	4%
Potassium K2O	4,5%
Calcium	8%
Magnesium	2%
