PICKLEBALL**

INDOOR PORTABLE COURT

**HAR
TRU**

Designed for Professional Performance

Elevate Your Court, Elevate Your Game

The Pickle Flex Pro is a **portable, comfortable, high-performance indoor pickleball court**. It sets up quickly to create a game-ready playing surface. Made with interlocking tiles, and coated in vibrant *Har-Tru Sports Coatings*, the court is designed for temporary or permanent installation in a wide range of locations.

From clubs to convention centers, avid pickleball players will appreciate the court's balance of performance and comfort. The Pickle Flex Pro ensures remarkable speed of play, consistent ball bounce, foot traction, and comfort—a consistent and high-quality playing surface every time you step onto the court.

Quick Setup and Versatile Uses

The Pickle Flex Pro is designed for easy setup and takedown. Whether you need on-the-go play or a permanent installation

at your facility, the Pickle Flex Pro guarantees a high-performance court that won't compromise the surface it's installed on.

Setup for one court requires just four people and two hours. Single courts can be installed by yourself or by an authorized contractor. Setting the stage for competitive and exhilarating matches has never been easier.

Reduced Impact for Added Comfort

Pickle Flex Pro is meticulously engineered to reduce the impact of play on your body. Our signature design creates significant force reduction and energy restitution, combined with an excellent ball bounce. Players enjoy longer, more comfortable matches without sacrificing the thrill of high-intensity games.

Har-Tru's Signature Design

Clean, straight edges define the court. The surface is coated in classic tournament colors – Championship Blue, Light Blue, and Championship Green. Available in two sizes: Standard is a regulation-sized pickleball court, and Mini is a smaller court for tight spaces or portable play.

Sustainable Construction

- + 62% post-consumer recycled content
- + Coated with water-based acrylic
- + 100% organic liquid pigments

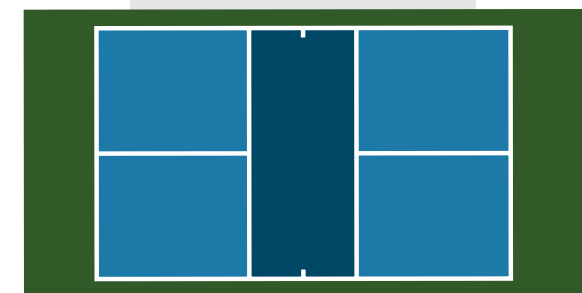

High-Performance Comfort

- + Force reduction of 17%+ to minimize body stress
- + Energy restitution of 80% for optimal comfort
- + High ball rebound rating for consistent play

STANDARD

- 31' 10" X 59' 10"
- Championship Blue (kitchen)
- Light Blue (play area)
- Championship Green (outside)

The **Standard** is configured for regulation play. Set it up, add a portable net, and it's game on!

MINI

- 11' 10" X 27' 10"
- Championship Blue (kitchen)
- Light Blue (play area)
- Championship Green (outside)

The **Mini** is perfect for small spaces. Find a permanent place to install it, or pack it up for on-the-go play!

Custom colors and multi-court arrangements are available on request.

"PICKLE FLEX PRO IS A GAME-CHANGER FOR TOURNAMENT AND VENUE OPERATORS. SIMPLE INSTALLATION, FOR COURTS THAT LOOK SHARP AND PLAY GREAT."

Kyle Ross — Topnotch Director of Events and Pickle in the Land Tournament Director
