

Bags for the future

Non-Woven Polypropylene is a low cost fabric, excellent in rigidity and resistant to humidity.

The bags made from this fabric are very economical. These bags are reusable and recyclable, thereby reducing waste. They are extremely light weight and easy to carry. Polypropylene is the most popular of all non-woven fibres. Non-Woven polypropylene bags are becoming increasingly popular. Like Canvas bags they have a good resistance to wear and tear and are durable.
