### Bags that Breathe

Cotton is a soft natural fiber obtained from the seed pod of the cotton plant, a shrub native to tropical and subtropical regions around the world, including the Americas, India and Africa. Cotton remains the most miraculous fiber under the sun, even after 8,000 years. No other fiber comes close to duplicating all the desirable characteristics combined in cotton. The fiber of a thousand faces and almost as many uses, cotton is noted for its versatility, appearance, performance and above all, its natural comfort. The fiber is most often spun into yarn or thread to make a soft, breathable textile, which is the most widely used natural fiber cloth in clothing today. Cotton is both biodegradable and recyclable.
