

Here's a bit about us

We are Jim Cusack & Marcelo Mena, the partners & metal aficionados who established CJM Metalshaping, a unique, local metal art studio in Edmonton.

Both of us have extensive experience in the welding profession & are accomplished college instructors.

We've successfully taught the art of welding to adult, high school, international & Indigenous groups.

Having our own studio allows us to explore more of the creative, fun side of our craft & most importantly, share it with others.

** Please note: We respect those who would prefer to wear masks. We are fully vaccinated.*

Corporate Team Building

Metal Art Workshops

Our workshops are completely doable for anyone - even without previous experience working with metal.

They are interactive with demos & opportunities to collaborate & tryout tools & techniques in an engaging, safe & supportive environment.

For those that may be wary of launching themselves into something new - we'll do our best to get you over that hump to the part where it's actually fun. Our goal is to create a great experience for everyone, not just a workshop.

Great Vibes! + Great Space! + Great Experiences!

Make it your own

Pick & choose from ideas that suit your team & your objectives. Projects can be done in teams or individually + your masterpieces are yours to take home or to the office as conversation pieces!

"I just finished my first workshop with CJM & was so impressed with the high level of instruction, safety, the clean, well organized workshop & most of all the friendly atmosphere that Jim & Marcelo created.... when we finished there was wine & snacks for us to enjoy! Such a great experience...."

We can accommodate 10 - 12 people depending on the project. Prices start at \$125.00 per person + tax & are based on the type of project + material required.

What can you expect in a workshop?

Our Team Building Workshops are 3.5 hours & include: a safety component, a brief welding theory session in the classroom.

Learn how to spot weld & use metalshaping tools to create something like a flower, dragonfly, crown. We also have seasonal projects we can do such as angel wings, pumpkins, Christmas Villages, etc.

Our workshops begin with a safety & theory component in our classroom before we move to the fun part in the studio. You're also welcome to include something like an icebreaker. There's a comfy reception area for breaks & as an option, wine + treats when your workshop is completed.

"I have gone to 3 metal art workshops with CJM & they provide such great instruction, safety & fun that I keep going back! The best part is you don't need any prior experience with welding to do these projects! It's so satisfying to walk away with a metal art piece at the end of the evening. I would highly recommend going to their workshops."
