

NEW FRAC PUMP

T-RX 3000 HP

HEAVY DUTY ENGINEERING

The new *T-RX 3000* Frac Pump Unit is a versatile platform for multiple power pack's configurations, to its new heavy-duty chassis are added better access for maintenance and designed for an easier and safer operation.

This unit its capable of pumping inhibited acid and other proppant laden stimulation fluids in harsh oilfield environments.

Trailer

- Length: 52' [15,860]
- Width: 8'6" [2,584]
- Height: 13'6" [4,100]

Engines

- MTU 16V4000T95 Tier IV Final
- QSK 60 Tier II Final
- CAT 3516C HD Tier II

PowerTransmission

- Twin Disc POWER SHIFT Ta908502
- CAT TH 55 E70
- ALISON 9832 OFS

Cooling System

- GHT Cube Style radiator

High Pressure Pump

- Weir SPM QEM 3000 Quintuplex
- Max pumping pressure: 15K PSI

Custom configuration

We configure the unit according to yours needs

WEIR SPM QEM 3000

Our company specializes in EPC projects for the Oil & Gas industry. Since the company opened in 2004, we have designed and manufactured oilfield equipment, including fracturing, cementing and stimulation, as well as cryogenic equipment for storage and transportation, API 650 tanks and LPG tanks.

- We count with facilities in Mar del Plata, Neuquen (Vaca Muerta) and Houston
- 217,000 SqFt and 100 Tons lifting capacity
- More than 200,000 BHP pumping on oil fields.

Neuquen
 [Vaca muerta area]
 Repair of pumps
 High line certification service
 Permanent stock of spare parts
 Safety slings - FSR system
 Special hoses
 Equipment rental

Mar del Plata
 QM Equipment
 Design and Construction of Pressure Vessel (ASME).
 International Trailer Fabrication Brand Qme.
 Design and Construction of Cryogenic Equipment.
 Design and Construction of Hydraulic Equipment.
 Applied Software development.
 Welding under ASME/AWS/API specifications.
 Structural Analysis and Design with Finite Element Model (FEM).
 Working with BOUREAU Veritas for DNV 2.7.1, ATX, ADR, IMDG, US DOT, API, UL and other certifications.
