## Example of patient flow at a booking visit

 Patient attends reception. Clerical staff create health record for the pregnancy using unique ID.

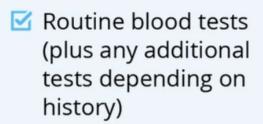

Patient directed to midwife station. Detailed history obtained.

4. Investigations conducted:

Initial dating ultrasound conducted or arranged.

Urinalysis

Blood pressure

Patient education and health promotion provided.

**7.** Follow-up appointment arranged.

6. Joint decision taken with patient on most suitable pathway for antenatal care. If medical or obstetric issue noted, patient is reviewed by obstetrician. Otherwise, booking visit ends.
