18IN METAL TOWER

**ASSEMBLY
MANUAL**

18IN METAL STAND ASSEMBLY MANUAL

INTRODUCTION

Follow this guide to assemble an 18in metal tower stand from start to finish.

If you purchased a tower stand with your blind, please refer to that assembly guide to assemble the tower first, then come back to finish the setup of the blind on the fully assembled tower stand.

SAFETY DISCLAIMER

At no time shall 360 Hunting Blinds be liable for any accidents due to normal or improper use of blinds or tower stands.

We recommend that you follow standard safety procedures when entering and exiting the blind, or climbing or decending the ladder.

Always use a gear rope to raise and lower your equipment into the blind.

Always use the handrail with both hands when climbing the ladder.

Never use the door handle to pull yourself onto the platform or stabalize your entry and exit.

STEP 1

FASTEN LEGS TO STAND

Each leg is designed to slide right over the parallel 2 x 4 supports.

Position the leg so the outside edge sits flush with the inside of the 2 x 4 cross support.

Each leg will take 6 gold lags. Fasten all 4 legs securely to the platform.

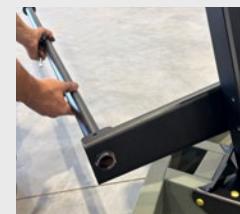

STEP 2

ATTACH BRACKETS & ROD

Find the 2 mounting brackets that attach to the front 2 legs. Use a drill or a ratchet to tighten the bolts securely.

Take the platform rod and slide it through the holes of the mounting brackets. Line up the bolt holes, insert bolt, and tighten securely. Flip the legs & base once these steps are complete.

STEP 3

LADDER PLATFORM & LEGS

Slide the bolts through the holes of the 2 legs & platform, but do not fully tighten legs to platform.

Position the step between the 2 ladder legs. Insert the bolts through the pre-drilled holes.

Attach feet to bottom of the ladder. Keep feet bolts loose so feet can pivot & adjust to uneven terrain. Tighten the remaining bolts securely, installed in this step.

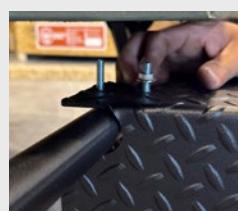

STEP 4

ATTACH PLATFORM TO RAIL

Carefully lift the platform you have built and set it in place on the platform rod. Center the platform on the platform rod before fastening.

Secure platform, using the provided U-bolts & nuts. Repeat on opposite side. Tighten firmly with a wrench.

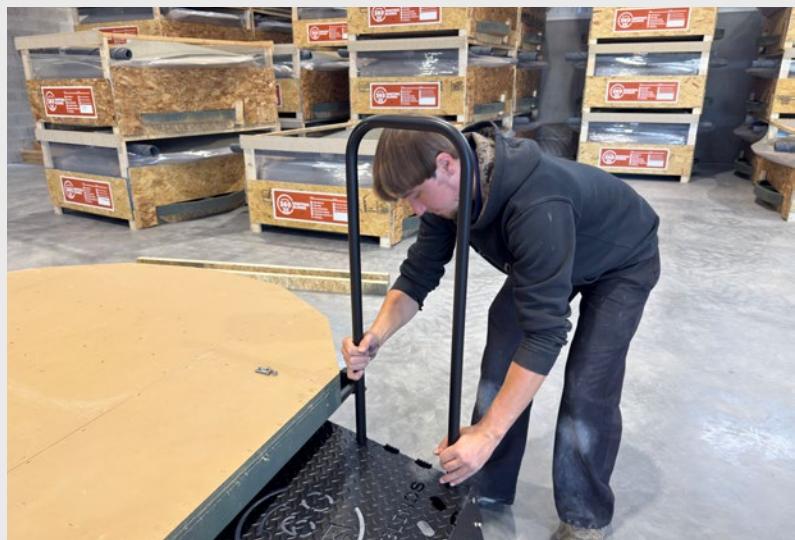

STEP 5

INSTALL HAND RAILS

Insert platform rails into predrilled holes on ladder platform.

Line up rail & platform holes, insert bolts through each hole & tighten with drill or ratchet.

Be sure to double check all bolts & nuts, ensuring everything is snug before completing the 18in metal tower install.

STEP 5

INSTALL HAND RAILS

Insert platform rails into predrilled holes on ladder platform.

Line up rail & platform holes, insert bolts through each hole & tighten with drill or ratchet.

Be sure to double check all bolts & nuts, ensuring everything is snug before completing the 18in metal tower install.
