

REHABILITATION OF THE COLLEGEWAY FROM WINSTON CHURCHILL BOULEVARD TO MISSISSAUGA ROAD

Construction scheduled to commence: on or after July 24, 2023

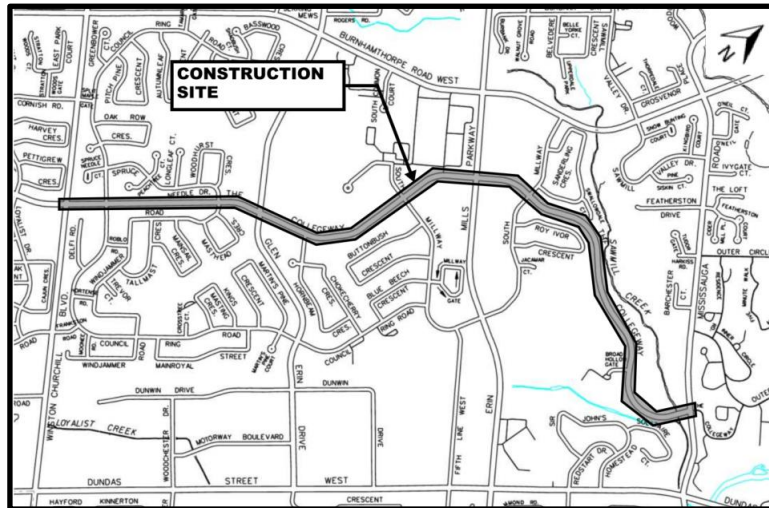

Construction scheduled to be completed: on or before November 30, 2024

Project Overview

The City will be rehabilitating The Collegeway from Winston Churchill Boulevard to Mississauga Road.

This project is part of the City’s Integrated Road Program, an initiative that aims to streamline the design and construction of infrastructure projects and improve collaboration during project delivery through the bundling of various road improvement projects. A map illustrating the project area is shown below.

The proposed work includes pavement rehabilitation, intersection improvements, new traffic signals and street lights, curb, sidewalk and catch basin repairs and maintenance, and installation of cycle tracks (Winston Churchill Boulevard to South Millway).

What to Expect During Construction

Impact/ Safety	Dust, noise and other inconveniences may be experienced. The City will make every effort to reduce these impacts. Avoid contact with hot asphalt or any construction material at all times.
Work Hours	Work will occur between 7:00am and 7:00pm, Monday to Friday.
Sprinkler Systems	During curb and sidewalk removal, sprinkler systems could become damaged. It is the property owner’s responsibility to remove fixtures such as sprinkler heads and sprinkler systems encroaching on City property prior to construction. The City will not be responsible for any damages to these fixtures.
Driveways Access	Access to driveways may be interrupted for short periods due to construction. If the curb in front of the property is being replaced, the construction crew will remove half of the driveway at a time to allow for access at all times. If you have more than one driveway, at least one driveway will remain open at all times. Driveway access to single detached homes: During road resurfacing, driveway access will be interrupted for approximately two-three days. Arrangements will be made for parking exemptions on surrounding streets.
Parking	On-street parking on The Collegeway is prohibited. Residents can park on side streets if their driveway is not accessible due to construction. Parking enforcement officers will not issue tickets for “Parking in Excess of Five

	Hours” while your driveway is not accessible. Parking tickets will still be issued for violations such as parking against the traffic flow, parking too close to a corner, fire hydrant or other parking restricted areas.																																																																															
Traffic and Pedestrians	Roads	Vehicle lanes will be reduced from four lanes to two lanes in sections, throughout construction.																																																																														
	Sidewalks	Sidewalks will be maintained and kept opened at all times, with sufficient signage, to guide pedestrians around the work area.																																																																														
	Trails	Access to Glen Erin/5 th Line Trail from The Collegeway will be closed, however the trail will remain open.																																																																														
Trees	Tree pruning and removals will be required to accommodate the new in-boulevard cycling infrastructure.																																																																															
Transit Service	Please be advised that the following transit infrastructure (stops/shelters) will be improved to meet the principles and goals outlined in the Accessibility for Ontarians with Disabilities Act (AODA) and MiWay’s Standard Drawings as part of the construction. There is a potential for temporary service disruptions at these stops. Should maintaining these stops not be feasible due to construction impacts, a temporary bus stop location as close to the original stop location shall be proposed if required. Please direct your inquiries to: miway.infrastructure@mississauga.ca

Utility Disruptions	Temporary disruptions to utilities, i.e. gas, hydro, water, cable, telecommunications may be experienced. Every effort will be made to minimize disruption and promptly restore services. . Once the project is complete, the cables will be buried accordingly. Should you require any further information please see contact information below: Bell Customer Service: 1-866-310 BELL (2355) https://support.bell.ca Rogers Customer Service: 1-866-ROGERS1(764-3771) https://www.rogers.com/consumer/support/contactus																																																																															
Restoration Works	The construction site will be restored after construction has been completed and will be weather dependent.																																																																															

Please do not hesitate to contact us if you have any questions and/or concerns.
