

## **Catapult Rides Bio - Long (226 Words)**

Catapult Rides is an Orlando-based indie rock band delivering “retrofied originals” with equal parts sincerity and smirk. Their music blends ’90s/’00s nostalgia with the restless energy of modern alternative — thoughtful lyrics, earworm hooks, and harmonies that friends and family have generously described as “somewhat pleasing” and “better than expected.”

The lineup — Jerry Eisen (guitar, vocals), Felipe Torres (guitar, vocals), Matt Wilkinson (drums, vocals), and Ingo Hutzenlaub (bass) — is built on friendship and a contractual agreement to rehearse nearly once a week. The result? A tightly woven stage performance that's impassioned and authentic.

Actual critics (surprisingly less harsh than family) have described the band’s sound as “intellectual and lyrically dense, with a straight delivery over unexpected rhythms that pull from ’90s pop alternative and modern indie rock.”

Their latest single, Love GPT, carries that ethos forward after their debut, Figure It Out. With momentum building, Catapult Rides is plotting an EP for late 2025, plus more live dates, new singles, and merch that will have you asking, “Should I go with the \$5 sticker or the \$55 hoodie?” Answer: both.
