

Message from the General Manager

As we move into the final quarter of 2024, I'd like to take a moment to express my gratitude for your continued support and trust in INCA. This has been a year of growth, innovation, and new challenges, and we are excited to share our latest advancements with you in this edition of **INCA Industry Insights**.

At INCA, we pride ourselves on delivering **cutting-edge solutions** that not only meet but exceed industry standards. From our **FRP non-slip materials** to the **fire-safe digital signage solutions** equipped with the world's smallest fire extinguisher, we are constantly evolving to ensure we provide the best possible products and services.

As we head into a busy month, with several key industry events on the horizon, I invite you to [connect with us](#).

Whether you're interested in our latest **fabrication projects**, the **AMFE fire suppression technology**, or simply want to explore how we can support your upcoming projects, our team is ready and eager to assist.

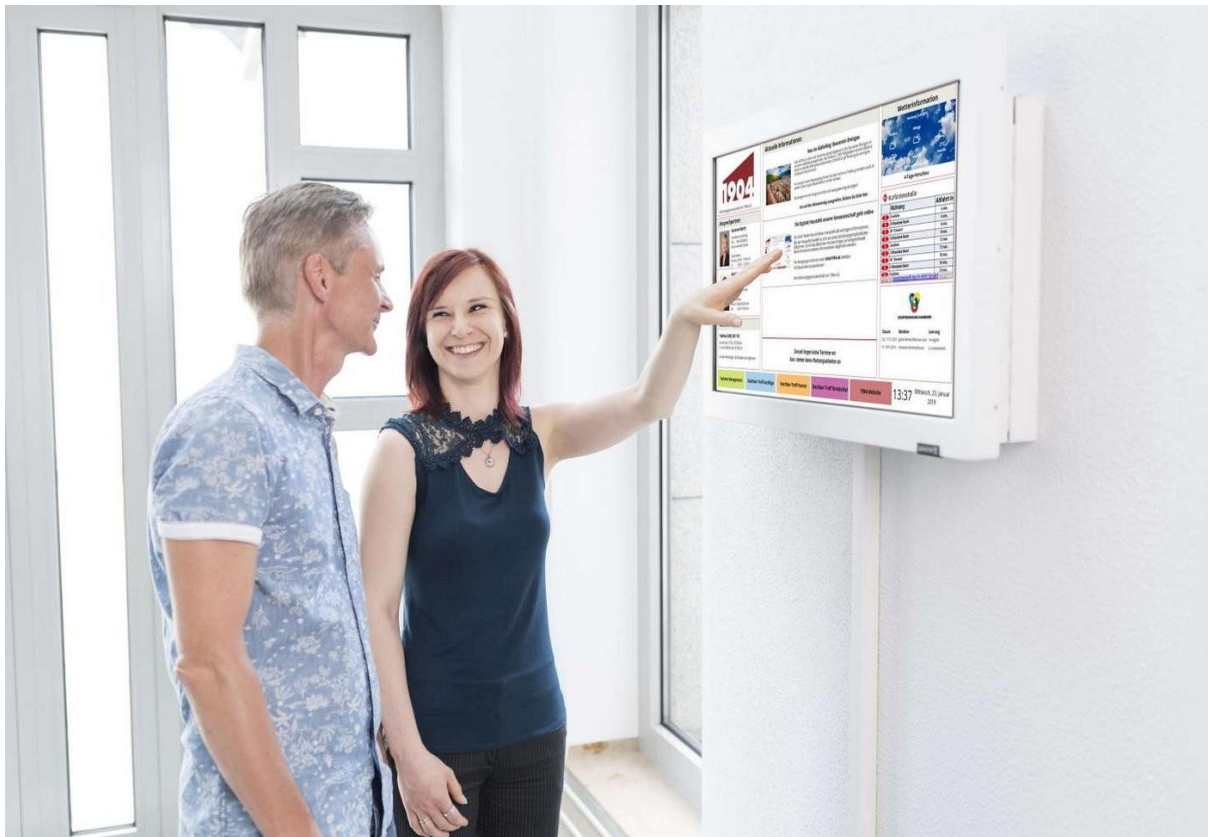

Your feedback and engagement are crucial to our continued success, and I look forward to what we can accomplish together in the months ahead.

Thank you once again for your partnership, and I hope to see many of you at the upcoming events.

Product Spotlight: Digital Signage with Fire Suppression Technology

Our digital signage solutions are more than just displays. Equipped with the world-renowned **EBLUB technology**, these screens transform from a potential fire risk to a safety-enhancing device that can even be used in **crowded areas and escape routes**.

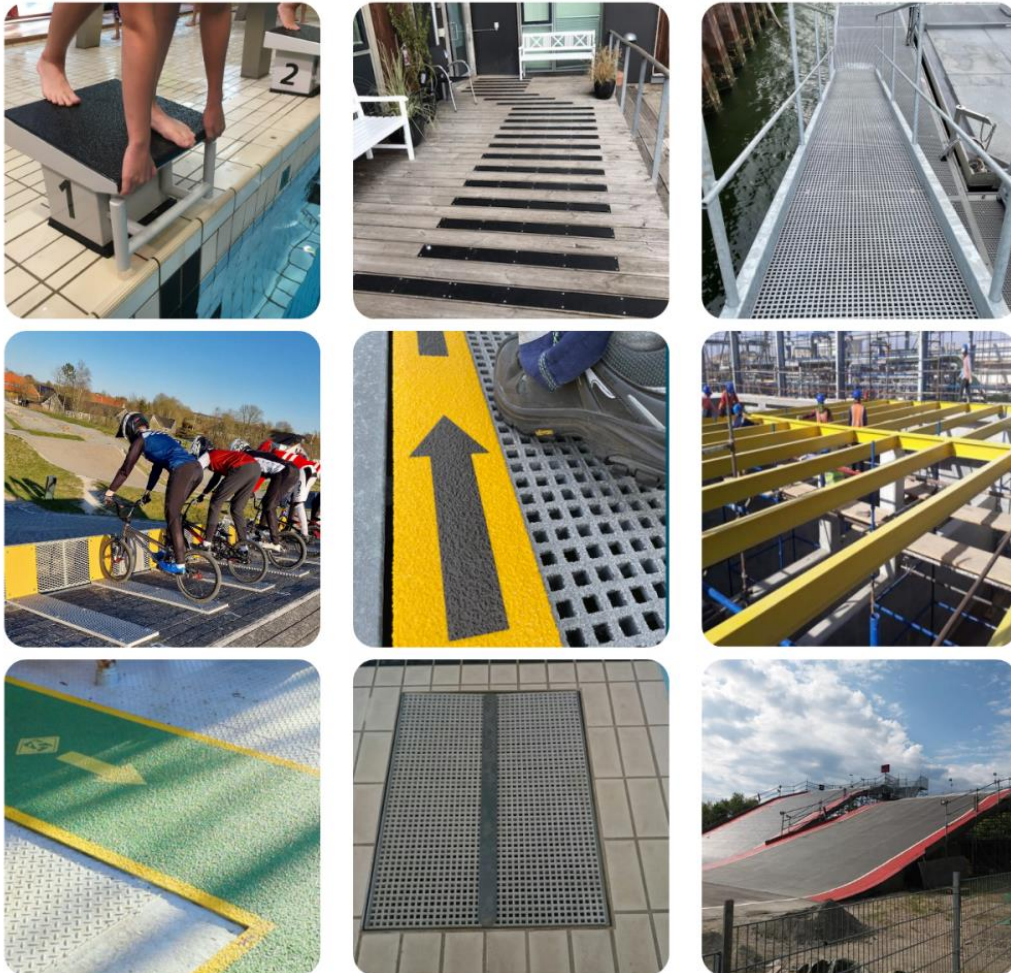

With built-in **fire suppression**, our larger models are ideal for busy spaces where safety is critical. If you're looking for a **durable, interactive solution** that guarantees safety, reach out to schedule a demo.

FRP Non-Slip Solutions: Maximising Safety Across Industries

Safety should never be compromised. Our **FRP non-slip solutions** offer superior slip resistance, especially in high-risk environments. Rated **R13**, the highest possible slip-resistance rating, our FRP products ensure that even at a **35-degree incline with water**, there's a minimal risk of slipping.

These solutions are perfect for industrial and commercial settings, providing enhanced durability and ease of installation. If your facility requires long-lasting anti-slip protection, we're here to help.

Custom Fabrication Services: Tailored to Your Project Needs

At INCA, we pride ourselves on delivering **custom fabrication solutions** that meet the unique needs of every client. Whether you need **FRP, metal, or hybrid fabrication**, we have the expertise and flexibility to handle projects of any scale.

Our team collaborates closely with clients to design, manufacture, and deliver solutions that exceed expectations, ensuring high-quality results every time.

Safety Tip of the Month: Fire Safety in Crowded Areas

When installing digital signage in crowded areas, it's crucial to prioritise **fire safety**. Always choose screens with **fire suppression features**, like our **EBLUB-equipped digital signage**, to reduce risks. For high-traffic areas like shopping malls, airports, or hospitals, these features can be lifesaving.

Upcoming Events: Join Us in October!

We are attending the following industry events this month:

- **The Big 5 Construct Qatar** (October 15-17, 2024)
- **INDEX Design Qatar** (October 15-17, 2024)
- **Cityscape Qatar** (October 15-17, 2024)
- **Milipol Qatar** (October 29-31, 2024)

If you'd like to meet with us at any of these events to discuss your project needs, please reach out at info@incaqatar.com.

Stay Connected

Thank you for reading the October edition of INCA Industry Insights. We're here to provide innovative solutions for all your **fabrication, safety, and digital signage** needs.

Don't forget to follow us on **LinkedIn** for real-time updates and future newsletters. For inquiries, feel free to reach out to our team.

Contact us for **product demonstrations** or to request more information.
