

INDUSTRY INSIGHTS

SEPTEMBER 2024

Message from the GM:

Dear Readers Welcome to our September edition of INCA Industry Insights. As we continue to expand our offerings and enhance our services, I'm excited to share some of our latest achievements and insights with you. This month, we're showcasing innovative projects that underline our commitment to safety and quality. Thank you for your continued trust in INCA.

Injector Frame with FRP Grating

Project Overview:

We recently completed a critical project involving the fabrication of an injector frame with FRP grating for a major regional oil services company. This project not only enhanced safety and efficiency but also showcased our ability to deliver under challenging conditions.

Recent Projects Highlight:

Adapter Pin Fabrication:

In addition to the injector frame, we successfully completed the fabrication of adapter pins for the same client, reinforcing our ability to deliver precise, high-quality components on a tight deadline.

Product Spotlight: FRP Non-Slip Material

Key Features:

Our FRP non-slip material is designed for maximum safety with a slip resistance rating of R13—the highest available. This ensures that even on surfaces inclined at 35 degrees with water running down them, the risk of slipping is significantly minimised.

DIN 51130/Class	R9	R10	R11	R12	R13
Slip angle (°)	6-10	10-19	19-27	27-35	>35
Slip Resistance	Very Low	Low	Medium	High	Very High

Safety Tip of the Month: Identifying High-Risk Slippery Areas

This month's tip focusses on how to identify high-risk areas for slips and falls in your facility. Look for surfaces frequently exposed to water, oil, or other slick substances, and assess the risk levels. Installing high-rated slip-resistant materials like our FRP products can significantly reduce accidents and improve workplace safety.

Upcoming Events:

ConteQ Expo 2024: *'re attending ConteQ Expo 2024 on September 16th at the Qatar National Convention Centre. Our General Manager will be present, and we'd love to meet up with you at the event. If you'd like to schedule a meeting, please reach out to us at info@incaqatar.com.*

Contact Us Today:

We're here to help with your next project. Whether you need custom fabrication or safety solutions, our team is ready to assist. For a limited time, we're offering a free consultation to help you identify and mitigate safety risks in your facility. Contact us today to schedule your session, or visit our [website](#) for more information.
