Dermal Solutions offers (IPL) Intense Pulse Light using Energist Ultraplus.

Have you ever thought what it would be like not to worry about epilation or waxing appointments? Well we have the most advanced method to permanently reduce unwanted hair. The IPL raises the temperature within the hair shaft and destroys the hair follicle therefore rendering it unable to produce a new hair.

Hair growth is generally uneven and the success of this treatment is conditional upon hair growth being in a particular pattern, therefore a course of treatment is required to destroy a number of different hair follicles.

A free 15-minute consultation is required to establish the suitability of this treatment. A price guide and treatment outline will be discussed at the time of consultation.
