
WHY SHOULD YOUR COMPANY INVEST IN TELECOM MANAGEMENT?

Did you know that 80% of companies are affected by errors in telephony charges?¹

Solving this problem is simpler than you think. A precise **telecom management** is the **solution** your company needs to avoid losses and have better administrative **control** of assets.

If you don't know what we're talking about, don't worry. **We prepared this eBook for you!**

We hope this material will be useful when you are making an important decision! ;)

¹ Gartner

TELECOM MANAGEMENT: WHAT IS IT?

When we think about telecom management, we think of all the measures that companies can take to ensure that business telecommunication is done **efficiently**, contributing to the **internal functioning** and good relationship with **customers and partners**.

There's even a specific term for it: **TEM** (Telecom Expense Management).

One of the premises is to act **preventively** in order to eliminate **unnecessary** expenses. In practice, for example, it would be easier to understand **how much is spent** on fixed or mobile telephony services.

The 3 C's of Telecom Management: **Centralization, Costs and Control.**

It's simple and pure math:

Good telecom management =

+ profits for the organization,

- costs and

+ productivity.

Telecom management is the first step on a **successful journey**.

WHY SHOULD YOU INVEST IN TELECOM MANAGEMENT?

Cost reduction

With telecom management, we can analyze your needs and assist in purchasing the correct plan, avoiding unnecessary expenses and reducing your operating cost.

Contract management

We will register all telecommunications contracts (fixed, mobile, data link and its amendments) of your company. Thus, we can act directly in the renewal and anticipation of contracts that are about to expire.

WHY SHOULD YOU INVEST IN TELECOM MANAGEMENT?

Invoice and Tariff Management

Is your company actually using what is being charged??
With Telecom Management, it is possible to know that.
In case of incorrect charges, we call the operator to
reimburse the undue amounts.

Negotiation with Operators

We will analyze the best proposals to find out if they are
in accordance with your company's profile and with the
prices currently practiced in the market.
