

SMART DESIGNS

COINLAUNDRY

Shift your perspective. Go beyond boundaries. Imagine new possibilities.

From there, new business opportunities are born. Possibilities continue to expand.

Yamamoto Manufacturing is looking toward the future of the coin laundry business, proposing next-generation equipment that leads the industry — featuring innovative materials such as “Feluche,” which combines design appeal with outstanding durability.

Drive Satisfaction and Revenue with Value-Added Features
Powered by YAMAMOTO's Exclusive Technology

- Added features like mite removal and enhanced cleaning.
- Increase ticket size and revenue.
- Differentiate your store.

Add-On Options

Customize wash programs with add-ons like deep cleaning, mite removal, and deodorizing.

Option.
1

Mite Removal Add-On

Mite Removal Cycle uses hot air to eliminate dust mites that can trigger allergies, asthma, and eczema.

Option.
3

Deep Clean Cycle

Tackles tough stains and odors for a deeper clean while reducing deformation and fabric damage.

Option.
2

Selectable Detergents

Flexible settings to match store needs. Configure paid add-ons like degreasing and antibacterial enzymes, or opt out of softener.

Remote Control

Control your machine from a Smartphone

Resolve up to 80% of operational issues remotely via your smartphone, reducing store visits and boosting customer satisfaction.

Plasmacluster Auto Sanitization Standard Across All Models

Equipped in washer-dryers and dryers to enhance cleanliness and sanitization, delivering a safer, more comfortable user experience.

Equipped with a Plasmacluster ion generator for sanitization and static reduction.

Point 1

Releases sanitizing ions during drying for effective garment disinfection.

Point 2

Reduces static buildup, minimizing shocks when removing clothes.
