

INNOVATIVE ECO-FRIENDLY SOLUTIONS

BENEFITS of producing Ultra-Lyte Products

Sustained Water Purity Dose drinking water at chlorine levels and help with the removal of bio-film build-up within waterlines and help remove algae from drinking troughs. Helps keep water free of bacteria, viruses, and parasites!

The Result: Improved water quality.

Diarrhea Bacterial action is proven beneficial on field strains of E-coli.

The Result: Regained livestock health & lower medication costs.

Mastitis Early detection increases success rate of recovery. Milk can be safely shipped following Ultra-Lyte use.

The Result: Infection control, in your own hands.

Strawberry Foot Replace chemicals with 100% Ultra-Lyte to help treat strawberry foot.

The Result: Lower production cost.

Disinfect and Cleanse Spray Ultra-Lyte directly on areas of concern.

The Result: Accelerated healing.

Facility and Equipment Protection Use Ultra-Lyte when disinfecting milk rooms, boots, trailers and farm equipment.

The Result: Improved Facility Sanitation.

Eliminate Milk-Line Washing Chemicals Ultra-Lyte and Ultra-Lyte Degreaser safely clean and sanitize standard milk line equipment (Clean in Place).

The Result: Increased Farmer Safety, Environmental Responsibility.

Pressure Washing for Deep Cleaning Ultra-Lyte Degreaser acts as a mild degreaser and remover of organic matter. Its mild alkaline solution with a pH of 11-12 is perfect for use within pressure washers to help remove soils and bio-film.

The Result: Reduced labour demands and lower production costs.

Ultra-Lyte and Ultra-Lyte Degreaser

By committing to a better environment for your cattle, a more natural immunity is ensured, resulting in healthier livestock.

Can you afford not to use Ultra-Lyte and Ultra-Lyte Degreaser in your operation?
