

24/7/365 Telemedicine by an ODP approved provider via the STAT waiver program in Pennsylvania

At Senacare, we provide a broad scope of medical services to individuals and organizations caring for those with intellectual and/or developmental disabilities.

We combine a traditional relationship based medical approach and leverage cutting-edge technology to make quality healthcare accessible to people wherever they are and organize care in the comfort of their own homes.

How to enroll in the program:

- The Supports Coordinator assist individuals with their families or guardians to elect Senacare services on the the individua's ISP using the W7032 proceedure code. This can be done anytime during the year by performing a critical revission or duing the annual ISP renewal process.
- Unlimited calls to Senacare - Inviduals can use the telemedicine services immediately as soon as they are enrolled for the service.

Telemedicine covers some of the following issues:

- Assessment to determine the urgency of conditions (ie ER vs urgent care or can wait to be seen by PCP)
- Rash, fever, cough, pain, pink eye, diarrhea, urine infections, falls, seizures, injuries, and various seasonal illnesses.
- Prescription refills, general guidance for medical conditions, Mental health symptoms, Medication management, and others

Information Required Prior to Enrollment

Please send the following information to Senacare via email at office@senacare.com prior to enrolling the patient in the STAT ODP Program:

- Patient Demographics
- Insurance Information
 - Medical History
- Current Medication List
- Pharmacy Information

Please ensure all required information is submitted before enrollment to help facilitate a smooth and timely enrollment process.
